Listening Homework 2

Book 2 Unit 4

Questions 1-5 Sentence completion

Write **ONE WORD AND/OR A NUMBER** from the indicated SHORT audio. Do not add % where it is printed.

1. [S01] **Carbon dioxide is identified as the gas responsible for warming the Earth's _____ .**
2. [S01] **The loss of trees worsens warming, which then continues to _____ the remaining forest.**
3. [S01] **The change is not only in the amount of rain: receiving less rain also changes how rainforests _____ .**
4. [S02] **Even with official promises, _____ say action is not happening quickly enough.**
5. [S02] **Scientists give a time limit for the predicted complete changes: the next _____ years.**

Listening Homework 2

Book 2 Unit 4

Questions 6-10 Sentence completion

Write **ONE WORD AND/OR A NUMBER** from the indicated SHORT audio. Do not add % where it is printed.

6. [S03] **The purple frog is described as one of the world's most _____ animals.**

7. [S03] **Biju's connection with Delhi University is professional: he is a _____ .**

8. [S03] **The frog's problems tell Biju about warming in rainforests described as _____ .**

9. [S04] **Biju hopes to get people _____ in saving this frog.**

10. [S04] **Biju warns that poor planning could make whole kinds of animals or plants disappear: some _____ .**

Listening Homework 2

Book 2 Unit 4

Questions 11-15 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

11. [S01] **What does 'global cleaners' mean in this report?**

- ☐ A. Trees take in a gas that contributes to warming.
- ☐ B. Trees keep the air temperature the same throughout the year.
- ☐ C. Trees make rain wash pollution out of the atmosphere.

12. [S01] **Which gas is connected with heating the atmosphere?**

- ☐ A. Carbon dioxide
- ☐ B. Water stored in roots
- ☐ C. Oxygen only

13. [S02] **Why do scientists mention animals and plants?**

- ☐ A. To explain why governments disagree about the rainfall figures.
- ☐ B. To describe the exact animals that will replace the purple frog.
- ☐ C. To give examples of a wider change in the forests.

14. [S02] **How does the forecast describe its timescale?**

- ☐ A. The next 80 years
- ☐ B. The next eight weeks
- ☐ C. The last 45 days

15. [S03] **Why does the reporter contrast some people's view with Biju's?**

- ☐ A. Biju and the public disagree about where the frog was found.
- ☐ B. Biju sees wider meaning in a loss others may dismiss.
- ☐ C. Biju thinks the frog's unusual sound makes it safe from warming.

Listening Homework 2

Book 2 Unit 4

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

16. [S03] **What unusual sound is used to describe the frog?**

- ☐ A. An ocean wave
- ☐ B. A small chicken's sound
- ☐ C. A train whistle

17. [S03] **What is stated about Biju's connection to the frog?**

- ☐ A. He discovered it in 2003
- ☐ B. He first saw it in a zoo in 1980
- ☐ C. He brought it from Tokyo last year

18. [S04] **Why are many people meeting next week?**

- ☐ A. To discuss new methods of identifying rainforest species.
- ☐ B. To discuss the climate and ways to save rainforests.
- ☐ C. To discuss how to prepare a forecast of daily rainfall.

19. [S04] **How certain is the final prediction about the frog?**

- ☐ A. It is a confirmed loss that has already happened.
- ☐ B. It is a recovery expected by the time of the next meeting.
- ☐ C. It is a possible result if forest climate is ignored.

20. [S04] **What comes immediately after the report?**

- ☐ A. A weather report
- ☐ B. A gardening competition
- ☐ C. A university sports interview

Listening Homework 2

Book 2 Unit 4

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

21. [S01] **Which TWO links explain the warming-and-forest cycle?**

- ☐ A. Temperature changes guarantee normal forest growth.
- ☐ B. Removing trees reduces all warming.
- ☐ C. Less rain stops every change in the forest.
- ☐ D. Further warming damages the forest.
- ☐ E. Trees take in a gas that heats the atmosphere.

22. [S02] **Which TWO elements belong to the prediction?**

- ☐ A. A claim that government work is already complete.
- ☐ B. A period of 80 years
- ☐ C. All forests within eight days
- ☐ D. 45 percent of forest areas
- ☐ E. No effect on plants

23. [S03] **Which TWO viewpoints are contrasted?**

- ☐ A. Biju denies that warming affects India.
- ☐ B. Biju treats its problems as a sign of wider damage.
- ☐ C. Some people dismiss the loss of one frog type.
- ☐ D. All people agree the frog's call is the main problem.
- ☐ E. Everyone thinks the frog is already safe.

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

24. [S03] **Which TWO relationships are stated for the animal?**

- ☐ A. Its difficulties reflect warming's effects on rainforests.
- ☐ B. Its fast running guarantees survival.
- ☐ C. Its survival depends on looking after forests.
- ☐ D. Its chicken-like noise causes global warming.
- ☐ E. Its discovery ended all forest damage.

25. [S04] **Which TWO statements correctly express the warning?**

- ☐ A. The coming meeting is a weather forecast only.
- ☐ B. The frog's extinction is announced as a completed fact.
- ☐ C. The frog's disappearance is presented as a possibility.
- ☐ D. Species may be lost if planning is delayed.
- ☐ E. No action can ever affect the outcome.

Passage A

A At Rivergate School, hot afternoons were becoming difficult for students. Some classrooms felt uncomfortable after lunch, and teachers noticed that students asked for more breaks. The head teacher did not want to buy equipment before understanding the problem. She asked a science class to measure the temperature in eight rooms for four weeks. Students used the same kind of thermometer in every room and recorded results at the same times each day. They also noted whether sunlight was entering through the windows.

B The records showed that the rooms facing west were usually warmest in the afternoon. Two classrooms in the oldest building stayed cooler because large trees shaded their windows. This surprised students who had expected every old room to be uncomfortable. On cloudy days, the differences between rooms were smaller. The class put the results on a simple map, using orange for warmer rooms and blue for cooler ones. Teachers could then see which places needed attention first, instead of treating all classrooms in the same way.

C The school fitted outside blinds to the hottest windows. Staff also moved one afternoon reading class to a room on the other side of the building. New trees were planted beside the playground, although everyone understood that they would need time to grow. For the first summer, a covered area provided shade there. The school checked that its drinking-water stations worked before the warm season began. These changes used the existing buildings differently as well as adding a few new features.

Passage A

D Students helped explain the changes to families. They made a notice showing where the cooler rooms and shaded areas were. The sports timetable moved some outdoor lessons to the morning, when the playground was less hot. During an official heat warning, staff followed the school's safety plan and changed activities as necessary. The students' measurements helped with everyday planning, but they did not replace official advice. Families received messages about timetable changes through the usual school communication system, rather than through a new app.

E After the blinds were installed, the class repeated the measurements. The western rooms were cooler than before, but the students were careful about their conclusion. Some days in the second period were also cloudier. They decided to compare more days with similar weather before saying exactly how much the blinds helped. The project taught them that a useful answer may need several checks. Their final display included both the improvements they had observed and the questions they still wanted to investigate.

Reading Homework 2

Book 2 Unit 4

Questions 1-5 True, False, Not Given

TRUE: agrees with the passage. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

1. The head teacher wanted measurements before choosing equipment.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

2. The thermometers were borrowed from a nearby university.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

3. Students measured each room at different times every day.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

4. The students used blue to show the warmest rooms on their map.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

5. Every family preferred receiving messages by phone.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 6-10 True, False, Not Given

TRUE: agrees with the passage. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

6. Cloudy weather reduced the differences between room temperatures.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

7. The new trees provided full shade immediately.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

8. The students' work was used alongside the school's safety arrangements.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

9. The second set of measurements took place in exactly the same weather as the first.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

10. The school will buy air conditioning next year.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 11-15 Matching information

Which paragraph contains each piece of information? Tick **ONE** box. You may use a letter more than once.

11. A building's age does not explain all the temperature differences.

☐ A ☐ B ☐ C ☐ D ☐ E

12. Another factor may partly explain an improvement.

☐ A ☐ B ☐ C ☐ D ☐ E

13. The first stage uses the same tools and times.

☐ A ☐ B ☐ C ☐ D ☐ E

14. An existing way of contacting families is kept.

☐ A ☐ B ☐ C ☐ D ☐ E

15. A temporary solution is used while a natural feature develops.

☐ A ☐ B ☐ C ☐ D ☐ E

Questions 16-20 Matching information

Which paragraph contains each piece of information? Tick **ONE** box. You may use a letter more than once.

16. Pupil-collected evidence does not replace official safety guidance.

☐ A ☐ B ☐ C ☐ D ☐ E

17. The supply of drinking water is checked before the warm season.

☐ A ☐ B ☐ C ☐ D ☐ E

18. The presence of sunshine at windows is recorded alongside temperature.

☐ A ☐ B ☐ C ☐ D ☐ E

19. Colours on a map help identify where action is most urgent.

☐ A ☐ B ☐ C ☐ D ☐ E

20. Unanswered questions are included in the final presentation.

☐ A ☐ B ☐ C ☐ D ☐ E

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question.

21. Which TWO choices made the first measurements more consistent?

- ☐ A. Using the same kind of thermometer.
- ☐ B. Recording at random times.
- ☐ C. Using the same times each day.
- ☐ D. Measuring only the rooms expected to be hottest.
- ☐ E. Replacing room measurements with student opinions.

22. Which TWO findings show room conditions depended on more than age?

- ☐ A. All old rooms were warmest.
- ☐ B. Every room had the same temperature on sunny days.
- ☐ C. West-facing rooms were usually warmest.
- ☐ D. The newest rooms had no windows.
- ☐ E. Two old classrooms stayed cooler under trees.

23. Which TWO solutions worked without waiting for new trees to grow?

- ☐ A. One class moved to another room.
- ☐ B. Every old building was replaced.
- ☐ C. Sports activities were all cancelled permanently.
- ☐ D. A covered area offered shade.
- ☐ E. New trees immediately shaded the whole playground.

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question.

24. Which TWO statements explain the limits of students' measurements?

- ☐ A. They allowed families to ignore timetable changes.
- ☐ B. They proved heat warnings were unnecessary.
- ☐ C. They supported everyday planning.
- ☐ D. They replaced the official heat-warning advice.
- ☐ E. They were useful alongside the safety plan.

25. Which TWO reasons explain further checks after fitting the blinds?

- ☐ A. The second period was identical in weather.
- ☐ B. Cloudier weather could partly explain lower temperatures.
- ☐ C. Any improvement proves the blinds caused all of it.
- ☐ D. Comparing similar weather could clarify the blinds' effect.
- ☐ E. The students never measured west-facing rooms.

Speaking Homework 2

Book 2 Unit 4

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "We".
We / our route / change / decided to

2. Start with "The children".
the trees / finished / planting / The children

3. Start with "Our group".
is going to / on local weather / do research / Our group

4. Start with "I".
prefer / walking / I / in the shade

5. Start with "The dry weather".
in our garden / The dry weather / can affect / the plants

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Your group decided to stay inside. Choose staying or stay.

Friend: **What did you decide to do?**

You: We decided to _____ inside.

7. Situation: You have finished watering the plants. Choose watering or water.

Friend: **Are you still busy in the garden?**

You: No, I have finished _____ the plants.

8. Situation: Your plan is to study local rainfall. Choose do or are.

Friend: **What is your group going to study?**

You: We _____ going to study local rainfall.

9. Situation: You prefer the shaded path. Choose shaded or open.

Friend: **Which path would you like to take?**

You: The _____ one, please.

10. Situation: Your group will do research about trees. Choose do or make.

Friend: **How will you find out more?**

You: We will _____ some research first.

Speaking Homework 2

Book 2 Unit 4

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Explain why your route changed.

Opening: We chose a different way home today.

A	The branch blocked our usual path.
B	A strong wind brought a branch down.
C	Because of that blockage, we used the other path.

12. Explain a garden plan.

Opening: The garden needs a little attention this week.

A	That dry weather has left the soil hard.
B	We are going to check the plants in that soil.
C	The weather has been unusually dry.

13. Describe a class investigation.

Opening: We want to learn from our own observations.

A	We write each measurement in a notebook.
B	Our class is measuring rain in the school garden.
C	The notebook will help us compare different days.

14. Explain a change to a visit.

Opening: Our visit will still happen, but at a different time.

A	So we plan to walk in the morning instead.
B	The afternoon is going to be very hot.
C	That heat could make the walk uncomfortable.

15. Explain why you chose an activity.

Opening: I would like to stay outdoors a little longer.

A	Sitting under the trees lets me watch them quietly.
B	Some of those birds rest in the trees.
C	I enjoy watching birds near the river.

Speaking Homework 2

Book 2 Unit 4

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

16. Explain how you would change an outdoor plan because of the forecast.

Model: We planned to play football in the afternoon. The forecast says it may be very hot. We are going to play earlier instead. That should make the game more comfortable.

17. Describe a small weather investigation. Say what you want to learn and how.

Model: I want to find out which part of our garden is warmest. I plan to measure the temperature in two places. I will do this at the same time each day. Then I can compare the results.

18. Describe a weather-related problem and a practical change to a routine.

Model: The strong wind keeps moving our papers. We cannot read them easily outside. We plan to use the covered study area. It should protect the papers from the wind.

Speaking Homework 2

Book 2 Unit 4

Questions 19-20 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

19. Explain an outdoor activity you prefer. Include the weather and one reason.

Model: I prefer walking in the morning. The air is usually cooler then. I enjoy seeing the birds beside the lake. I can return home before the afternoon becomes warm.

20. Explain a class plan connected with weather or wildlife. Give a reason for one step.

Model: Our class is going to plant trees. First, we need to choose suitable places. We want the trees to give shade near the playground. We will ask the gardener for advice.

Speaking Homework 2

Book 2 Unit 4

Questions 21-22 Describe the picture

Write key words, then record 3 connected sentences for each question. Use the words if helpful.

Words: dry / prefer / carefully

21. Describe the person checking the weather before cycling.

Words: prevent / carefully / dry

22. Explain a possible plan if rain starts during this ride.

Speaking Homework 2

Book 2 Unit 4

Questions 23-25 Describe the picture

Write key words, then record 3 connected sentences for each question. Use the words if helpful.

Words: dry / energy / wildlife

23. Describe the trees and the dry ground in the park.

Words: save / dry / wildlife

24. Say what people could do to save water in this dry weather.

Words: dry / become / wildlife

25. Explain one effect if dry weather lasts for a long time.

Writing Homework 2

Book 2 Unit 4

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "Rainfall".

increased / to twelve millimetres / from five / Rainfall

2. Start with "The temperature".

The temperature / a maximum / in July / reached

3. Start with "The minimum".

early in the morning / occurred / The minimum

4. Start with "The temperature".

The temperature / three degrees / dropped / by

5. Start with "The rainfall total".

almost unchanged / The rainfall total / was

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Data: 15°C then 21°C. Choose by or to.

The temperature rose _____ six degrees.

7. Data: 19°C then 13°C. Choose by or to.

The temperature fell _____ 13°C.

8. Data: 2 mm then 9 mm. Choose an increase or a decrease.

There was _____ in rainfall.

9. Data: daily highs 18°C, 22°C, 20°C. Use one number from the data.

The maximum was _____°C.

10. Data: 11°C then 12°C. Choose huge or slight.

There was a _____ rise of one degree.

Writing Homework 2

Book 2 Unit 4

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a report of a changing temperature.

A After reaching that value, it stayed constant until two.
B At dawn, the record shows 6°C.
C Over the next six hours, it rose to 15°C.

☐ A-C-B ☐ A-B-C ☐ B-C-A

12. Order an explanation of a rise.

A This was an increase of 6 mm.
B That increase was the largest daily change shown.
C Rainfall rose from 4 mm to 10 mm in the data.

☐ A-C-B ☐ B-A-C ☐ C-A-B

13. Order a report of a brief storm.

A A storm began at three in the report.
B When it ended, rainwater covered the steps.
C It lasted for twenty minutes.

☐ B-C-A ☐ A-C-B ☐ C-A-B

14. Order a report of a minimum.

A After that low point, the temperature began to rise.
B The temperature reached its minimum just before dawn.
C It was 2°C at that time.

☐ C-A-B ☐ B-C-A ☐ A-C-B

15. Order a report of a steady period.

A At two, it began to fall again.
B The temperature reached 14°C at noon.
C It remained at that level for two hours.

☐ A-C-B ☐ C-B-A ☐ B-C-A

Writing Homework 2

Book 2 Unit 4

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write your own answer with different details.

16. Describe the changes using data: 6 a.m. 4°C; noon 13°C; 3 p.m. 13°C; 9 p.m. 7°C.

Model: The temperature began at 5°C. It rose to 14°C by noon. It stayed at that level until three. By nine, it had fallen to 8°C.

17. Describe rainfall using data: Monday 2 mm; Tuesday 9 mm; Wednesday 6 mm; Thursday 0 mm.

Model: Rainfall started at 1 mm in the record. It increased to 8 mm the next day. It then fell to 5 mm. There was no rain on the final day.

18. Describe the high and low points using data: morning 6°C; afternoon 19°C; evening 12°C. Mention the size of the rise.

Model: The minimum temperature was 5°C in the morning. It rose by 12 degrees. The afternoon maximum was 17°C. It then fell to 10°C in the evening.

Writing Homework 2

Book 2 Unit 4

Questions 19-20 Follow the model

Use the model to help you express different content in 4 connected sentences. Write your own answer with different details.

19. Describe a weather event in a new place. Give time, duration and an effect.

Model: A rain shower began at noon in the village. It lasted fifteen minutes. Water covered part of the market square. Visitors waited under the shop roofs.

20. Use data to describe two periods: morning rainfall 12 mm; afternoon 12 mm; evening 3 mm. Add the amount of the decrease.

Model: Rainfall was 10 mm in the first period. It stayed at 10 mm in the second. In the final period, it fell to 4 mm. The decrease was 6 mm.

Writing Homework 2

Book 2 Unit 4

Questions 21-22 Describe the picture

Write 3 connected sentences for each question. Use the words if helpful.

Words: increase / fall / precipitation

21. Describe the weather observer's equipment. Data: rainfall increased from 4 mm to 8 mm.

Words: maximum / drop / decrease

22. Describe a possible change after this observation. Data: the maximum temperature dropped from 18°C to 13°C.

Writing Homework 2

Book 2 Unit 4

Questions 23-25 Describe the picture

Write 3 connected sentences for each question. Use the words if helpful.

Words: rise / careful / dangerous

23. Describe the water level at the river bank. Data: the level rose by 10 cm after rain.

Words: reach / cover / precipitation

24. Explain one possible effect of this river change. Data: rainfall reached 25 mm.

Words: careful / dangerous / fall

25. Write one contrast between a dry path and this wet river bank.
