Listening Homework 1

Book 3 Unit 2

Questions 1-5 Sentence completion

Write **ONE WORD AND/OR A NUMBER** from the indicated SHORT audio. Do not add % where it is printed.

1. [2.2-S01] **The desert food-growing proposal uses _____ energy.**

2. [2.2-S02] **NASA's interest comes from the possibility of growing food in any _____ .**

3. [2.2-S03] **The mirrors direct heat towards a pipe containing _____ .**

4. [2.2-S03] **On cold desert nights, some hot water warms the _____ .**

5. [2.2-S03] **Supermarkets are interested because the vegetables are grown without _____ or other chemicals.**

Listening Homework 1

Book 3 Unit 2

Questions 6-10 Sentence completion

Write **ONE WORD AND/OR A NUMBER** from the indicated SHORT audio. Do not add % where it is printed.

6. [2.4-S01] **Supporters mentioned by the host say nuclear plants create less _____ than traditional plants.**

7. [2.4-S02] **Emma says people left their homes because they might be exposed to _____ .**

8. [2.4-S03] **Jack includes _____ , meaning water-powered electricity, in his comparison of worker deaths.**

9. [2.4-S04] **Emma says air pollution during construction comes from hundreds of _____ .**

10. [2.4-S05] **One of Jack's objections to wind turbines concerns their effect on _____ .**

Listening Homework 1

Book 3 Unit 2

Questions 11-15 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

11. [2.2-S01] **What route will the explanation follow?**

- ☐ A. Different energy sources, farming locations, then food prices.
- ☐ B. The history of desert farming, its costs, then its markets.
- ☐ C. How the system works, its possible benefits, then its problems.

12. [2.2-S02] **What difficulty must the desert-growing system address?**

- ☐ A. Plants receive nutrients but cannot use the sunlight.
- ☐ B. Sunlight is plentiful but water is scarce.
- ☐ C. Water is available but the sunlight is too weak.

13. [2.2-S03] **How does Sundrop Farms differ from traditional farming in the explanation?**

- ☐ A. It heats fresh water before adding seawater to it.
- ☐ B. It grows crops outdoors rather than in a building.
- ☐ C. It starts with seawater instead of taking fresh water.

14. [2.2-S04] **How certain is the speaker about the future of desert farms?**

- ☐ A. He thinks their environmental costs prevent future use.
- ☐ B. He believes they have already replaced traditional farms.
- ☐ C. He sees potential but says the future is uncertain.

15. [2.4-S01] **What difference in priorities introduces the debate?**

- ☐ A. Supporters stress low costs; opponents stress limited fuel.
- ☐ B. Supporters stress lower pollution; opponents stress danger.
- ☐ C. Supporters stress local jobs; opponents stress building time.

Listening Homework 1

Book 3 Unit 2

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

16. [2.4-S02] **How does Emma respond to the claim that nuclear accidents are rare?**

- ☐ A. Their frequency matters more than their environmental effects.
- ☐ B. Their serious lasting effects still make them a concern.
- ☐ C. Their effects are usually limited to the plant itself.

17. [2.4-S03] **Why does Jack compare nuclear accidents with other energy industries?**

- ☐ A. To argue that accident reports focus too much on workers.
- ☐ B. To show that the alternatives produce less electricity.
- ☐ C. To judge nuclear risks alongside the risks of alternatives.

18. [2.4-S04] **Which part of a plant's life does Emma use to challenge the clean-air claim?**

- ☐ A. The years after the plant stops operating.
- ☐ B. The period when the plant sells electricity.
- ☐ C. The years spent constructing the plant.

19. [2.4-S05] **What distinction is central to Jack's cost argument?**

- ☐ A. Building is expensive, but producing energy later costs little.
- ☐ B. Building costs fall when a plant produces less electricity.
- ☐ C. Building is cheap, but buying fuel later is expensive.

20. [2.4-S05] **Why does Jack connect nuclear power with protection for poorer countries?**

- ☐ A. It could reduce their exposure to rising oil and gas prices.
- ☐ B. It could remove the need to invest in energy production.
- ☐ C. It could make neighbouring countries buy more oil and gas.

Listening Homework 1

Book 3 Unit 2

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

21. [2.2-S02] **Which TWO elements do plants need according to the speaker?**

- ☐ A. Water
- ☐ B. Sunlight
- ☐ C. Pesticides
- ☐ D. Oil
- ☐ E. Plastic packaging

22. [2.2-S02] **Which TWO features describe hydroponics?**

- ☐ A. It requires no sunlight
- ☐ B. Plants grow in water
- ☐ C. Nutrients are added to the water
- ☐ D. Plants must grow in soil
- ☐ E. It cannot grow vegetables

23. [2.2-S03] **Which TWO steps occur at Sundrop Farms?**

- ☐ A. Oil is poured onto vegetables
- ☐ B. Mirrors heat oil in a pipe
- ☐ C. Plants grow outside at night
- ☐ D. Salt is removed from seawater
- ☐ E. Fresh water is taken from a river

Listening Homework 1

Book 3 Unit 2

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

24. [2.4-S01] **Which TWO positions introduce the nuclear-power debate?**

- ☐ A. Supporters say fuel is unlimited
- ☐ B. Opponents oppose electricity use
- ☐ C. Supporters stress low pollution
- ☐ D. Both sides reject all energy production
- ☐ E. Opponents stress risk

25. [2.4-S04] **Which TWO concerns does Emma raise about nuclear plants?**

- ☐ A. Building a plant is unsuitable for low-income countries
- ☐ B. Plant construction is affordable for every country
- ☐ C. Construction pollution ends the need for renewable energy
- ☐ D. Wind power needs radioactive fuel
- ☐ E. Construction creates air pollution

Passage A

A Mangroves grow along some warm coasts, between the land and the sea. Residents of Bayford wanted to restore a damaged mangrove area beside their village. Their first idea was to plant as many young trees as possible during one weekend. A local researcher suggested a different starting point: find out why the earlier trees had disappeared. The group compared old photographs, spoke to fishers and walked around the site at different stages of the tide. They discovered that a blocked channel had changed how water reached part of the land.

B The group first worked on the channel, with advice from people experienced in coastal restoration. They then marked three small areas for a planting trial. The sites differed in how often seawater covered them. Volunteers planted the same number of young trees in each area and recorded their height. Every month, they checked which trees were still alive. Counting only the trees planted would have made the project look successful immediately. Checking survival would show whether the young plants could actually grow in the places chosen for them.

C After six months, one area had lost many more trees than the others. The volunteers initially blamed people walking across it, but their records suggested another problem. This low area remained underwater for longer, and the surviving trees had grown very little. The group decided not to plant another large batch there straight away. Instead, it asked for further advice about the water conditions. A disappointing result was useful because it stopped the team repeating the same approach across a much larger area.

Passage A

D The project also changed how visitors moved around the shore. A narrow raised path allowed people to see the trees without stepping among the young plants. Signs explained why some areas were closed temporarily. Local fishers helped choose the route so that it did not block the places where they carried equipment to their boats. Two residents trained as volunteer guides. They explained the project using photographs and simple maps, including pictures of the unsuccessful planting area. Visitors could therefore see both the purpose of the work and the difficulties involved.

E At the end of the first year, the group published a short report. It included survival counts, changes in tree height and comments from fishers and visitors. The report did not claim that planting trees had solved every coastal problem. The team had not yet measured whether the restored area reduced damage during storms, and it would take longer to understand that question. The next stage would expand planting only in suitable places while continuing the monthly checks. For Bayford, progress meant learning which methods worked locally, not announcing the largest possible number of new trees.

Reading Homework 1

Book 3 Unit 2

Questions 1-10 Summary completion

Write **ONE WORD** from the indicated paragraphs. Questions 1-5: **A-B**. Questions 6-10: **C-D**.

Residents compared old **(1)** _____ and consulted fishers before identifying a blocked **(2)** _____. After restoring water access, they marked **(3)** _____ small trial areas. At planting, each tree's **(4)** _____ was recorded. Monthly survival checks identified trees still **(5)** _____.

The low area remained **(6)** _____ for longer, so residents sought advice about water **(7)** _____. The route did not block places where fishers carried equipment to their **(8)** _____. Guides used photographs and simple **(9)** _____. Alongside the purpose, they explained **(10)** _____ such as the unsuccessful planting area.

Questions 11-15 List of Headings

Match each specified paragraph with its best heading. Tick **ONE** box. Some headings are not used.

i. Providing access while protecting local work

ii. Finding the cause of earlier tree losses

iii. Reporting limits and planning selective expansion

iv. Measuring storm protection before any planting

v. Restoring the entire coast in one weekend

vi. Using a setback to avoid repeating a mistake

vii. Testing survival in different conditions

11. Paragraph A

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

12. Paragraph B

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

13. Paragraph C

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

14. Paragraph D

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

15. Paragraph E

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question.

16. Why did Bayford investigate first?

- ☐ A. To find why earlier trees disappeared
- ☐ B. To advertise a weekend event
- ☐ C. To count every visitor

17. What had changed water access?

- ☐ A. A fishing boat
- ☐ B. A blocked channel
- ☐ C. A new footpath

18. Why were three trial areas used?

- ☐ A. They differed in seawater cover
- ☐ B. They were all closed to visitors
- ☐ C. They had identical soil

19. Why were survival counts important?

- ☐ A. They measured storm damage
- ☐ B. They made planting quicker
- ☐ C. They showed whether trees could grow

20. Why was the low area not replanted immediately?

- ☐ A. It lacked signs
- ☐ B. It stayed underwater longer
- ☐ C. Visitors disliked it

Reading Homework 1

Book 3 Unit 2

Questions 21-25 Single choice

Tick **ONE** answer, A-C, for each question.

21. Who helped choose the path route?

- ☐ A. Only tourists
- ☐ B. School children
- ☐ C. Local fishers

22. What did guides show visitors?

- ☐ A. Successful and unsuccessful areas
- ☐ B. Only tall trees
- ☐ C. Private boats

23. What was not yet measured?

- ☐ A. Visitor comments
- ☐ B. Storm protection
- ☐ C. Tree height

24. Where would planting expand?

- ☐ A. The boat route
- ☐ B. Every low area
- ☐ C. Suitable places

25. What did progress mean?

- ☐ A. Ending monthly checks
- ☐ B. Planting the largest number
- ☐ C. Learning local methods

Speaking Homework 1

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "Wind power".
for homes / Wind power / can provide / clean energy

2. Start with "Solar panels".
Solar panels / our use of fossil fuels / might reduce

3. Start with "The future of nuclear power".
is / The future of nuclear power / uncertain

4. Start with "Hydroponic farms".
Hydroponic farms / food / in dry places / could grow

5. Start with "Using less electricity".
will help / Using less electricity / the environment

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Your friend says wind power has no disadvantages. Choose disagree or agree.

Friend: **What do you think about that claim?**

You: I _____ because turbines can affect birds.

7. Situation: Your class is discussing a future solar project. Choose will or might.

Friend: **What could happen if the project is approved?**

You: It _____ provide cheaper energy.

8. Situation: A student calls fossil fuels unlimited. Choose incorrect or correct.

Friend: **Is that statement right?**

You: That is _____; fossil fuels can run out.

9. Situation: Your friend asks about a wind turbine near homes. Choose possible or impossible.

Friend: **Could the turbine cause noise?**

You: It is _____ that some neighbours will hear it.

10. Situation: You are talking about a future drought. Choose will not or may not.

Friend: **Will every farm have enough water?**

You: Some farms _____ have enough water.

Speaking Homework 1

Book 3 Unit 2

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Explain a possible benefit of solar panels.

Opening: Our school could produce some of its own power.

A	The school might therefore buy less power from the grid.
B	The school uses a lot of electricity.
C	Solar panels could produce some of that electricity.

12. Explain a concern about a wind farm.

Opening: There is something we should check about the proposed site.

A	The planners should study the route before building.
B	The proposed turbines would stand near a bird route.
C	Some birds could be affected by the moving blades.

13. Explain why water may become scarce.

Opening: People in that area are worried about water.

A	This dry weather has reduced the water stored in its reservoir.
B	The reduced supply may not meet the needs of homes and farms.
C	The area has had very little rain this year.

14. Explain a future food solution.

Opening: Growing food there will need a different approach.

A	This system is known as hydroponics.
B	To address that problem, it is considering growing plants in nutrient-rich water.
C	The farm needs a way to grow food with less land.

15. Explain why a family may use less energy.

Opening: We have found a small way to cut our electricity use.

A	The comparison showed that LEDs used less for the same amount of light.
B	We compared the electricity used by old bulbs and LED bulbs.
C	Because of this difference, we will replace the old bulbs.

Speaking Homework 1

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write key words, then record your answer.

16. State whether you support a solar-panel project at school. Give two reasons.

Model: I support the solar-panel project. It could provide clean electricity for classrooms. It might also reduce the school's energy costs.

17. Describe one possible risk of a wind farm and one way to investigate it.

Model: A wind farm might affect birds that fly through the area. Experts could watch the birds in different seasons. Their findings could guide the plan.

18. Explain how a home could use less energy. Include a future result.

Model: My family could turn off lights in empty rooms. We could also use shorter showers. These changes might lower our electricity use.

Speaking Homework 1

Book 3 Unit 2

Questions 19-20 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write key words, then record your answer.

19. Describe a water problem and one possible response.

Model: The town may have less water after a long dry season. Residents could collect rainwater for gardens. This might save clean water for drinking.

20. Give an opinion about a hydroponic farm. Include a benefit and an uncertainty.

Model: A hydroponic farm could grow vegetables with less land. It might provide local food in dry areas. However, the equipment may be expensive.

Speaking Homework 1

Book 3 Unit 2

Questions 21-22 Describe the picture

Write key words, then record 2-3 sentences for each question. Use the words if helpful.

Words: alternative / provide / resource

21. Describe the two visible energy sources.

Words: alternative / provide / resource

22. Explain why this place may use alternative energy.

Speaking Homework 1

Book 3 Unit 2

Questions 23-25 Describe the picture

Write key words, then record 2-3 sentences for each question. Use the words if helpful.

Words: resource / system / solution

23. Describe the garden and the water containers.

Words: resource / provide / crisis

24. Suggest one possible use for the collected water.

Words: system / solution / crisis

25. Describe one environmental problem that collecting rainwater could help address.

Writing Homework 1

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "Climate change".

serious effects / Climate change / on the planet / can have

2. Start with "Fossil fuels".

are / Fossil fuels / a limited resource

3. Start with "Public transport".

to pollution / one solution / Public transport / may be

4. Start with "Hydroponics".

is / Hydroponics / a system / for growing plants

5. Start with "The factory".

near the river / air pollution / causes / The factory

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose cause or effect. Rising temperatures are a result of climate change.

Rising temperatures are an _____ of climate change.

7. Choose resource or disaster. Water is something people need and use.

Clean water is an important _____.

8. Choose geographical or environmental. This issue concerns pollution and climate.

Air pollution is an _____ issue.

9. Choose unlimited or limited. Fossil fuels can run out.

Fossil fuels are a _____ resource.

10. Choose solution or pollution. Using buses can help reduce dirty air.

Public transport can be part of the _____.

Writing Homework 1

Book 3 Unit 2

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a climate-change cause-and-effect chain.

A	This releases gases into the atmosphere.
B	People burn fossil fuels for energy.
C	These gases contribute to climate change.

☐ C-A-B ☐ B-A-C ☐ B-C-A

12. Order an explanation of a water crisis.

A	The region has received little rain for months.
B	The area is now experiencing a water crisis.
C	Reservoir levels have fallen during the dry period.

☐ A-B-C ☐ A-C-B ☐ B-C-A

13. Order an explanation of hydroponics.

A	They add nutrients to water for the plants.
B	Some farms grow plants without using soil.
C	This system is called hydroponics.

☐ B-A-C ☐ B-C-A ☐ A-C-B

14. Order an explanation of air pollution.

A	The cars release pollution into the air.
B	As a result, the city has poor air quality.
C	Many people drive private cars into the city.

☐ A-B-C ☐ C-A-B ☐ B-C-A

15. Order an explanation of a renewable-energy choice.

A	It has a sunny area near the edge of town.
B	It is considering solar panels for that area.
C	The town needs more electricity for new homes.

☐ B-A-C ☐ C-B-A ☐ C-A-B

Writing Homework 1

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write your own answer with different details.

16. Explain one cause and effect of air pollution. Use because or as a result.

Model: Many people drive short distances because buses are infrequent. As a result, more cars release pollution near the school. Better bus services could reduce this problem.

17. Describe a water crisis and one possible solution.

Model: The area has had very little rain, so its reservoirs are low. This water crisis affects homes and farms. The town could ask people to use less water.

18. Explain a benefit of hydroponics and one limitation.

Model: Hydroponics can grow plants in water without soil. This could help dry areas produce food. However, the system needs equipment and careful control.

Writing Homework 1

Book 3 Unit 2

Questions 19-20 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write your own answer with different details.

19. Describe an action to reduce fossil-fuel use.

Model: The school could install bicycle parking because more students may cycle. As a result, fewer families might drive short journeys. This could reduce fossil-fuel use.

20. Explain an environmental issue and a response.

Model: Plastic waste is an environmental issue near the river. It can enter the water after heavy rain. The town could add bins and organise regular clean-ups.

Writing Homework 1

Book 3 Unit 2

Questions 21-22 Describe the picture

Write 2-3 sentences for each question. Use the words if helpful.

Words: construction / ecosystem / consequences

21. Describe the forest and the road.

Words: construction / issue / consequences

22. Explain one possible issue shown by the scene.

Writing Homework 1

Book 3 Unit 2

Questions 23-25 Describe the picture

Write 2-3 sentences for each question. Use the words if helpful.

Words: effect / challenge / trend

23. Describe the recycling activity and the materials people are sorting.

Words: effect / trend / challenge

24. Explain one possible effect of the recycling activity.

Words: trend / predict / effect

25. Describe a trend the community could track.
