Listening Homework 2

Book 3 Unit 2

Questions 1-5 Sentence completion

Write **ONE WORD AND/OR A NUMBER** from the indicated SHORT audio. Do not add % where it is printed.

1. [2.2-S02] **In this growing method, plants receive nutrients without being planted in the _____.**
2. [2.2-S02] **The comparison helps listeners understand nutrients as what plants need to eat: plant _____.**
3. [2.2-S03] **Desalination makes seawater drinkable by removing its _____.**
4. [2.2-S03] **Daily fresh-water production can reach _____ litres, but that is the maximum output.**
5. [2.2-S04] **Because the farms use solar rather than fossil energy, their environmental harm is _____.**

Listening Homework 2

Book 3 Unit 2

Questions 6-10 Sentence completion

Write **ONE WORD AND/OR A NUMBER** from the indicated SHORT audio. Do not add % where it is printed.

6. [2.4-S02] **Emma's examples include contamination of _____, a dairy drink, as well as tea, beef and fish.**

7. [2.4-S03] **Jack contrasts nuclear power with other sources by calling it relatively _____ despite its large output.**

8. [2.4-S04] **Emma argues that construction pollution continues for many _____ before a plant is ready.**

9. [2.4-S05] **Jack's criticism is that panels and turbines take up too much _____.**

10. [2.4-S05] **Jack says a nuclear plant stays in use for longer: the alternatives do not last as _____.**

Listening Homework 2

Book 3 Unit 2

Questions 11-15 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

11. [2.2-S01] **What order does the speaker promise for the explanation?**

- ☐ A. How desert farming works, benefits, then problems
- ☐ B. How to build cities, then sell vegetables, then travel
- ☐ C. How food prices rise, then tourism, then farming

12. [2.2-S02] **What question does the speaker raise about the proposed growing method?**

- ☐ A. Whether nutrients make vegetables unsuitable for supermarkets.
- ☐ B. Whether sunlight can damage the food grown in water.
- ☐ C. Whether using a scarce resource limits its environmental value.

13. [2.2-S02] **What role do nutrients have in the growing method?**

- ☐ A. They replace the sunlight needed by plants.
- ☐ B. They provide food for plants growing in water.
- ☐ C. They remove salt from seawater before it is heated.

14. [2.2-S03] **What does the description show about the use of heat?**

- ☐ A. It is used for warmth only after electricity is bought.
- ☐ B. It serves both power generation and keeping plants warm.
- ☐ C. It helps store seawater without changing its temperature.

15. [2.2-S03] **What source of water does Sundrop Farms use?**

- ☐ A. Seawater
- ☐ B. Collected rainwater
- ☐ C. Water from a river

Listening Homework 2

Book 3 Unit 2

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

16. [2.4-S02] **What policy does Emma specifically criticize?**

- ☐ A. Permitting governments to place nuclear plants near cities.
- ☐ B. Encouraging residents to return while the area remains unsafe.
- ☐ C. Permitting companies to supply food from the affected area.

17. [2.4-S02] **What lasting danger does Emma connect with nuclear accidents?**

- ☐ A. They only affect plant employees for one day
- ☐ B. Their environmental effects can continue for many years
- ☐ C. They stop all electricity production worldwide

18. [2.4-S04] **Why does Emma prefer solar and wind energy?**

- ☐ A. She believes they require more construction machinery.
- ☐ B. She considers them safer and more affordable alternatives.
- ☐ C. She thinks they provide a temporary source of fuel.

19. [2.4-S05] **How does Jack challenge the idea that solar and wind are better choices?**

- ☐ A. He points to wildlife, land-use, cost and lifespan drawbacks.
- ☐ B. He accepts their lower costs but doubts their local popularity.
- ☐ C. He focuses on their dependence on imported oil and gas.

20. [2.4-S05] **What does Jack say about nuclear power after a plant is built?**

- ☐ A. It cannot protect countries from oil prices
- ☐ B. It can produce energy at low cost
- ☐ C. It needs more fuel every year

Listening Homework 2

Book 3 Unit 2

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

21. [2.2-S02] **Which TWO locations does the speaker say hydroponics could support?**

- ☐ A. Only tropical forests
- ☐ B. Antarctica
- ☐ C. Only European cities
- ☐ D. Only coastal Australia
- ☐ E. Mars

22. [2.2-S03] **Which TWO results of heating seawater are described?**

- ☐ A. The mirrors create pesticides
- ☐ B. Salt becomes plant food
- ☐ C. Rainwater fills the pipes
- ☐ D. Steam produces electricity
- ☐ E. Hot water warms the greenhouse

23. [2.2-S03] **Which TWO products have Australian farms grown using hydroponics?**

- ☐ A. Rice
- ☐ B. Tomatoes
- ☐ C. Cucumbers
- ☐ D. Wheat
- ☐ E. Coffee

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

24. [2.4-S03] **Which TWO other energy industries does Jack name when comparing deaths?**

- ☐ A. Coal
- ☐ B. Oil refining
- ☐ C. Solar-panel manufacturing
- ☐ D. Hydropower
- ☐ E. Wind-turbine maintenance

25. [2.4-S05] **Which TWO disadvantages of solar and wind does Jack identify?**

- ☐ A. They require no investment
- ☐ B. They produce power at all times
- ☐ C. They have limited lifespans
- ☐ D. They always harm no wildlife
- ☐ E. They need land

Passage A

A Mangroves grow along some warm coasts, between the land and the sea. Residents of Bayford wanted to restore a damaged mangrove area beside their village. Their first idea was to plant as many young trees as possible during one weekend. A local researcher suggested a different starting point: find out why the earlier trees had disappeared. The group compared old photographs, spoke to fishers and walked around the site at different stages of the tide. They discovered that a blocked channel had changed how water reached part of the land.

B The group first worked on the channel, with advice from people experienced in coastal restoration. They then marked three small areas for a planting trial. The sites differed in how often seawater covered them. Volunteers planted the same number of young trees in each area and recorded their height. Every month, they checked which trees were still alive. Counting only the trees planted would have made the project look successful immediately. Checking survival would show whether the young plants could actually grow in the places chosen for them.

C After six months, one area had lost many more trees than the others. The volunteers initially blamed people walking across it, but their records suggested another problem. This low area remained underwater for longer, and the surviving trees had grown very little. The group decided not to plant another large batch there straight away. Instead, it asked for further advice about the water conditions. A disappointing result was useful because it stopped the team repeating the same approach across a much larger area.

Passage A

D The project also changed how visitors moved around the shore. A narrow raised path allowed people to see the trees without stepping among the young plants. Signs explained why some areas were closed temporarily. Local fishers helped choose the route so that it did not block the places where they carried equipment to their boats. Two residents trained as volunteer guides. They explained the project using photographs and simple maps, including pictures of the unsuccessful planting area. Visitors could therefore see both the purpose of the work and the difficulties involved.

E At the end of the first year, the group published a short report. It included survival counts, changes in tree height and comments from fishers and visitors. The report did not claim that planting trees had solved every coastal problem. The team had not yet measured whether the restored area reduced damage during storms, and it would take longer to understand that question. The next stage would expand planting only in suitable places while continuing the monthly checks. For Bayford, progress meant learning which methods worked locally, not announcing the largest possible number of new trees.

Reading Homework 2

Book 3 Unit 2

Questions 1-5 True, False, Not Given

TRUE: agrees with the passage. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

1. The group investigated earlier tree losses before beginning its planting trial.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

2. The first planting weekend was planned for June.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

3. Different numbers of young trees were planted at the three trial sites.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

4. The volunteers checked survival once a month.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

5. The poorest trial area remained underwater for less time than the others.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 6-10 True, False, Not Given

TRUE: agrees with the passage. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

6. The poor result led directly to another large batch being planted in the same area.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

7. Fishers helped choose a visitor route that preserved access for carrying equipment.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

8. The volunteer guides were paid for every tour.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

9. The first report proved that the restored area reduced storm damage.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

10. Further planting would be limited to suitable places.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 11-15 Matching information

Which paragraph contains each piece of information? Tick **ONE** box. You may use a letter more than once.

11. Volunteer guides use photographs of an unsuccessful planting area when explaining the project.

☐ A ☐ B ☐ C ☐ D ☐ E

12. A low area stays underwater longer and its surviving trees show little growth.

☐ A ☐ B ☐ C ☐ D ☐ E

13. A blocked channel is found to have changed how water reaches the land.

☐ A ☐ B ☐ C ☐ D ☐ E

14. The group identifies a benefit it has not yet measured.

☐ A ☐ B ☐ C ☐ D ☐ E

15. A result prevents a mistake being repeated on a larger scale.

☐ A ☐ B ☐ C ☐ D ☐ E

Questions 16-20 Matching information

Which paragraph contains each piece of information? Tick **ONE** box. You may use a letter more than once.

16. Evidence from the past helps explain current conditions.

☐ A ☐ B ☐ C ☐ D ☐ E

17. Local workers influence the route used by visitors.

☐ A ☐ B ☐ C ☐ D ☐ E

18. The same starting number is planted in several places.

☐ A ☐ B ☐ C ☐ D ☐ E

19. The next stage limits planting to suitable places and keeps monthly monitoring.

☐ A ☐ B ☐ C ☐ D ☐ E

20. The project distinguishes trees planted from trees surviving.

☐ A ☐ B ☐ C ☐ D ☐ E

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question.

21. Which TWO actions show a change from the original plan to plant as much as possible?

- ☐ A. Judging success immediately from the number planted.
- ☐ B. Ignoring photographs because they were old.
- ☐ C. Investigating why the earlier trees had disappeared.
- ☐ D. Beginning with a small trial after work on the channel.
- ☐ E. Planting the whole area before checking its water supply.

22. Which TWO features made the trial useful for comparing the sites?

- ☐ A. Volunteers counted trees only in the area with the best results.
- ☐ B. Each area began with the same number of young trees.
- ☐ C. Survival was checked repeatedly rather than only counting planting.
- ☐ D. Every site remained underwater for exactly the same time.
- ☐ E. The planting totals alone established long-term success.

23. Which TWO conclusions about the failed area follow from the records?

- ☐ A. Its longer time underwater gave the team reason to investigate water conditions.
- ☐ B. Expanding the same method immediately could repeat the problem.
- ☐ C. Walkers had been proved to cause all the losses.
- ☐ D. The results established that mangroves could not grow anywhere in Bayford.
- ☐ E. The surviving trees had grown more than those at every other site.

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question.

24. Which TWO statements explain how visitor access was balanced with other needs?

- ☐ A. Fishers helped preserve working access when the route was chosen.
- ☐ B. The route required fishers to stop carrying equipment to their boats.
- ☐ C. All access to the shore was permanently prohibited.
- ☐ D. Guides hid the unsuccessful area from visitors.
- ☐ E. The raised path let visitors see trees without stepping among young plants.

25. Which TWO claims could the group reasonably make at the end of the first year?

- ☐ A. It had measured a reduction in storm damage.
- ☐ B. It had solved every coastal problem.
- ☐ C. Its main measure of progress was the largest possible planting total.
- ☐ D. It had evidence about survival and changes in tree height.
- ☐ E. Its next stage would use what the local trials had shown.

Speaking Homework 2

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "A wind farm".
both benefits and risks / has / A wind farm

2. Start with "Local people".
should consider / carefully / Local people / the advantages

3. Start with "The new turbines".
The new turbines / from the village / might affect / the view

4. Start with "Clean energy".
could create / in the area / new jobs / Clean energy

5. Start with "The council".
will need / before its decision / The council / evidence

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Your friend supports a wind farm because it is clean. Choose disadvantage or advantage.

Friend: **What is one positive point?**

You: Clean energy is an _____ of wind power.

7. Situation: The project may need new staff, but the number of jobs is uncertain. Choose could or must.

Friend: **What might the project do for workers?**

You: It _____ create local jobs.

8. Situation: Several residents have already rejected the plan. A speaker predicts that everyone will agree tomorrow. Choose unlikely or certain.

Friend: **Is that prediction realistic?**

You: It is _____ that everyone will agree.

9. Situation: Some residents oppose the plan because they expect noise. Choose supporters or opponents.

Friend: **Who is worried about the noise?**

You: The _____ may mention the noise.

10. Situation: A notice gives May as the start date, but the confirmed date is June. Choose incorrect or unnecessary.

Friend: **Is the date on the notice right?**

You: No, the date is _____.

Speaking Homework 2

Book 3 Unit 2

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Explain the next steps in the turbine project.

Opening: The village has a plan for cleaner energy.

A	Once this preparation is complete, they may install the turbine.
B	The council has approved a turbine near the old factory.
C	After that approval, workers could prepare the site.

12. Explain a possible problem with an unsuitable site.

Opening: One proposed location may not be practical.

A	To avoid this disruption, the council could choose a quieter site.
B	Building work beside that school could disturb the pupils.
C	This location is next to a primary school.

13. Explain a possible benefit for a local training centre.

Opening: The town is considering skills as well as energy.

A	A local college could offer training for these jobs.
B	Those trainees could later help to maintain the turbines.
C	The project may create a few technical jobs.

14. Explain why the first plan may need to change.

Opening: The engineers are checking the proposed access road.

A	To prevent this vehicle damage, engineers may suggest a different route.
B	The first plan places the access road through a wet field.
C	Heavy vehicles could damage this wet ground in winter.

15. Explain how a small change could save a local resource.

Opening: We want to protect the trees near the site.

A	The designers are considering moving the turbine ten metres east.
B	Keeping clear of this woodland edge could protect its oldest trees.
C	That small move could avoid the edge of the woodland.

Speaking Homework 2

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

16. Describe a wind-turbine plan near an unused factory. Say one thing it could provide and one possible problem.

Model: An unused factory site could hold one wind turbine. It might provide clean electricity for nearby buildings. However, the construction road could cause noise for a short time. The council could share the timetable with local people.

17. Describe a solar-panel project on a school roof. Include one benefit and one practical condition.

Model: The school could place solar panels on its flat roof. They might provide electricity for classrooms during the day. The project needs a safe route for workers to reach the roof. Parents could receive information before work begins.

18. Explain why a project beside a river may need extra planning.

Model: A small energy project could be built beside the river. Heavy rain might make the ground unsafe for vehicles. Engineers could plan the work for the drier months. This may reduce the risk of damage.

Speaking Homework 2

Book 3 Unit 2

Questions 19-20 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

19. Describe a change to make a turbine plan less harmful to birds.

Model: The first plan puts a turbine near a line of trees. This location may be unsuitable for birds. The designers could move it to open ground. The new position might reduce the risk to wildlife.

20. Describe a community energy notice. Say what may happen next and why people need clear information.

Model: The council has posted a notice about a new energy project. Residents may visit the library to see the map. Some people could have questions about the construction dates. Clear information may prevent unnecessary worry.

Speaking Homework 2

Book 3 Unit 2

Questions 21-22 Describe the picture

Write key words, then record 3 connected sentences for each question. Use the words if helpful.

Words: benefit / risk / opponent

21. Describe the people and the wind turbine. Then say one possible use for the turbine.

Words: opponent / risk / environmental

22. Imagine the group is checking the site. Describe one visible detail, then give one question about a possible environmental risk.

Speaking Homework 2

Book 3 Unit 2

Questions 23-25 Describe the picture

Write key words, then record 3 connected sentences for each question. Use the words if helpful.

Words: environmental / benefit / risk

23. Describe the people and the map. Then say how the map could help an environmental project.

Words: provide / benefit / risk

24. Imagine the group is planning a local project. Describe one visible detail, then say one resource the project could provide.

Words: benefit / risk / solution

25. Imagine the group must choose between two sites on the map. Describe the map, then suggest one simple way to reduce risk.

Writing Homework 2

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "Because of drought,".

farmers / Because of drought, / have less water / for crops

2. Start with "As a result,".

some plants / cannot grow / well / As a result,

3. Start with "The city".

The city / by improving buses / air pollution / has reduced

4. Start with "Deforestation".

on hillsides / soil erosion / can lead to / Deforestation

5. Start with "Recycling more materials".

the amount of waste / could reduce / Recycling more materials

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose crisis or trend. The town has almost no water left.

The town is facing a water _____.

7. Choose resource or disaster. This word means a useful supply.

The village shares a limited water _____.

8. Choose consequence or construction. This word means building work.

Road _____ has begun near the forest.

9. Choose contribute to or consist of. This phrase means help cause.

Heavy traffic can _____ air pollution.

10. Choose annual or unlimited. The report is published once each year.

The council publishes an _____ environmental report.

Writing Homework 2

Book 3 Unit 2

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a drought chain.

A	Farmers have less water for their crops.
B	The region receives less rain than usual.
C	As a result, food production may fall.

☐ C-A-B ☐ C-B-A ☐ B-A-C

12. Order an air-pollution chain.

A	More vehicles release gases into the air.
B	Traffic increases near the city centre.
C	Consequently, air quality becomes worse.

☐ C-B-A ☐ B-A-C ☐ A-B-C

13. Order a deforestation chain.

A	Heavy rain can then cause soil erosion.
B	People remove trees from a hillside.
C	The soil has fewer roots to hold it in place.

☐ B-A-C ☐ C-A-B ☐ B-C-A

14. Order a recycling chain.

A	This reduces the amount of waste sent away.
B	Students separate paper from other rubbish.
C	The paper is collected for recycling.

☐ A-C-B ☐ C-A-B ☐ B-C-A

15. Order an energy-saving chain.

A	The school replaces old bulbs with LED bulbs.
B	Therefore, the school reduces its energy use.
C	The new bulbs use less electricity.

☐ C-A-B ☐ A-C-B ☐ B-C-A

Writing Homework 2

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write your own answer with different details.

16. Imagine a village has little water after a dry season. Describe the problem and one response. Use crisis and resource.

Model: The village faces a water crisis after a long dry season. Its small reservoir is an important resource. Residents are collecting water carefully. The council could help them plan how much to use each day.

17. Imagine your town is checking air quality near a busy road. Describe what it could investigate. Use environmental and contribute to.

Model: Noise near a busy road is an environmental issue in this town. Heavy traffic may contribute to the problem. The council could record noise at different times. Residents could describe when it disturbs them most.

18. Imagine building work is proposed near a forest. Describe the plan and one concern. Use construction and ecosystem.

Model: A new road is planned beside a wetland in this area. Construction could disturb its ecosystem. The council should study the site carefully. A different route may cause less damage.

Writing Homework 2

Book 3 Unit 2

Questions 19-20 Follow the model

Use the model to help you express different content in 4 connected sentences. Write your own answer with different details.

19. Imagine a school tracks recycling each month. Describe what it records and how the record could help. Use trend and predict.

Model: The school records its electricity use each month. Teachers look for a trend in the figures. The record may help them predict future demand. They could then plan suitable energy-saving actions.

20. Imagine a town publishes a yearly report about its parks. Explain what to include. Use annual and challenge.

Model: A village publishes an annual report about water use. One challenge is keeping enough water for both homes and farms. The report describes the amount used by each group. Residents can discuss the findings at a meeting.

Writing Homework 2

Book 3 Unit 2

Questions 21-22 Describe the picture

Write 3 connected sentences for each question. Use the words if helpful.

Words: destruction / cause / consequences

21. Describe the hillside and the bare area. Suggest one possible environmental consequence.

Words: cause / destruction / effect

22. Imagine trees have been removed from the bare area. Explain a possible cause-and-effect chain.

Writing Homework 2

Book 3 Unit 2

Questions 23-25 Describe the picture

Write 3 connected sentences for each question. Use the words if helpful.

Words: contribute to / ecosystem / challenge

23. Describe the tree-planting activity and one challenge the volunteers may face.

Words: effect / contribute to / ecosystem

24. Explain one possible effect of planting trees. Add a practical condition for this benefit.

Words: predict / effect / annual

25. State one question a group could investigate after planting.
