Listening Homework 3

Book 3 Unit 2

Questions 1-6 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

1. [2.2-L01] **The talk presents desert farming as a possible response to climate-related problems.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

2. [2.2-L01] **The speaker says deserts have little sunlight but abundant fresh water.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

3. [2.2-L01] **Hydroponics involves growing plants in water rather than soil.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

4. [2.2-L01] **NASA scientists are developing a method that could allow food production in very different climates.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

5. [2.2-L01] **The nutrients used in hydroponics cost twenty dollars per litre.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

6. [2.2-L01] **Plants need nutrients to help them grow.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Listening Homework 3

Book 3 Unit 2

Questions 7-11 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

7. [2.2-L02] **Sundrop Farms uses seawater rather than fresh water at the start of its process.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

8. [2.2-L02] **The mirrors cool oil before it enters the pipe.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

9. [2.2-L02] **Steam provides electricity when seawater reaches 160 degrees Celsius.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

10. [2.2-L02] **All heated water is sent to the desalination plant.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

11. [2.2-L02] **The desalination plant can make up to 10,000 litres of fresh water daily.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 12-15 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

12. [2.2-L02] **The first supermarket to sell Sundrop vegetables was in Sydney.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

13. [2.2-L02] **The vegetables are said to be grown without pesticides or other chemicals.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

14. [2.2-L02] **The greenhouse is described as having wooden walls and a wooden ceiling.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

15. [2.2-L02] **Sundrop employs exactly two hundred people.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Listening Homework 3

Book 3 Unit 2

Questions 16-20 Matching information

Which LONG audio contains each piece of information? Tick **ONE** box. You may use a code more than once.

16. Possible food production in extremely different climates

☐ 2.2-L01 ☐ 2.2-L02

17. A definition of a system in which crops grow in water

☐ 2.2-L01 ☐ 2.2-L02

18. A contrast between traditional farms and a company using seawater

☐ 2.2-L01 ☐ 2.2-L02

19. A temperature at which steam is used to generate electricity

☐ 2.2-L01 ☐ 2.2-L02

20. A three-part plan for the structure of a talk about desert farming

☐ 2.2-L01 ☐ 2.2-L02

Listening Homework 3

Book 3 Unit 2

Questions 21-25 Matching information

Which LONG audio contains each piece of information? Tick **ONE** box. You may use a code more than once.

21. A process that removes salt to make water safe to drink

☐ 2.2-L01 ☐ 2.2-L02

22. A concern that a climate solution might use a scarce resource

☐ 2.2-L01 ☐ 2.2-L02

23. A reason supermarkets are interested in the crops

☐ 2.2-L01 ☐ 2.2-L02

24. A second use for heated water during cold desert nights

☐ 2.2-L01 ☐ 2.2-L02

25. An explanation of why plants require nutrients

☐ 2.2-L01 ☐ 2.2-L02

Growing Above the Classrooms Passage B

A At Glenhill School, science teacher Mr Ahmed wanted students to see how food could be grown where soil was scarce. The flat roof above the art rooms received good daylight but could not safely hold deep beds of earth. He proposed a small hydroponic farm, in which plant roots receive water containing dissolved nutrients instead of growing in soil. Before buying equipment, the school asked a structural engineer to check the roof load and spoke to the caretaker about access, drainage and electrical safety.

B The engineer approved a lightweight system of narrow channels on raised frames. A covered tank held the nutrient solution, and a small pump carried it through the channels before it returned to the tank. Students measured the solution rather than adding fertiliser by guesswork. The roof was given a locked gate, a non-slip path and a collection tray beneath the channels. These changes made the area safer, but they also meant that only supervised groups could work there; the farm was not an open lunchtime garden.

C Each science class grew lettuce and basil from seedlings. Students checked the water level, measured acidity and recorded the height of a sample of plants every Friday. A rota meant that one class did not receive all the easy tasks while another did only cleaning. When leaves showed pale patches, students compared their measurements with the recommended nutrient range before changing the solution. They did not immediately blame sunlight, because clouds and temperature could also affect growth. The records helped them explain a decision rather than simply report whether the plants looked healthy.

Growing Above the Classrooms Passage B

D The system used less water than watering separate soil beds because most of the solution returned to the tank. Yet the pump and a small fan used electricity, particularly on hot days. Mr Ahmed included both facts in the project display. The school did not describe the roof farm as free from environmental costs. It also found that checking the equipment during holidays was difficult: a volunteer caretaker could inspect the tank, but could not replace a full lesson team. A timer reduced unnecessary pumping, though it did not remove the need for regular checks.

E After one term, the cafeteria used a small amount of the lettuce in sandwiches, while the basil was taken home by students who had helped harvest it. The harvest was too limited to supply school lunches, but it gave students a real example of nutrient cycling, water use and planning. Mr Ahmed suggested another small roof system only where a building had suitable light, safe access, reliable electricity and staff time for maintenance. Glenhill's trial was useful because it showed both how hydroponics works and the practical conditions required to keep it working.

Reading Homework 3

Book 3 Unit 2

Questions 1-10 Summary completion

Write **ONE WORD** from the indicated paragraphs. Questions 1-5: **A-B**. Questions 6-10: **C-D**.

At Glenhill, an **(1)** _____ checked the roof before the system used **(2)** _____ in water. A pump returned solution to a **(3)** _____, and safe **(4)** _____ required a locked **(5)** _____.

Students measured **(6)** _____ and plant height. The system used less **(7)** _____, but the **(8)** _____ and **(9)** _____ used **(10)** _____.

Reading Homework 3

Book 3 Unit 2

Questions 11-15 List of Headings

Match each specified paragraph with its best heading. Tick **ONE** box. Some headings are not used.

i. Conditions for expansion

ii. Using measurements

iii. An immediate permanent change

iv. A solution for every location

v. Recognising costs and limits

vi. Operating a supervised system

vii. Checking roof suitability

11. Paragraph A

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

12. Paragraph B

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

13. Paragraph C

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

14. Paragraph D

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

15. Paragraph E

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question.

16. Why was a structural engineer involved before the project began?

- ☐ A. To decide whether the roof could carry the proposed system
- ☐ B. To calculate the price of cafeteria sandwiches
- ☐ C. To choose which students could join the project

17. Why did the school choose hydroponics instead of deep soil beds?

- ☐ A. Students were unable to measure plant growth
- ☐ B. The art rooms needed more natural light
- ☐ C. The roof could not safely support deep earth

18. How did the circulation system reduce unnecessary water use?

- ☐ A. Rainwater was stored in separate soil beds
- ☐ B. Each class emptied the tank after a lesson
- ☐ C. Solution returned to the tank after moving through channels

19. Why were access controls installed on the roof?

- ☐ A. The area involved safety and could be used only under supervision
- ☐ B. The caretaker wanted to prevent any measurements
- ☐ C. The plants needed complete darkness at lunchtime

20. Why did students check nutrient readings before changing the solution?

- ☐ A. They needed to make all plants grow at the same speed
- ☐ B. They wanted evidence for a response to pale leaves
- ☐ C. They were required to replace the solution every Friday

Reading Homework 3

Book 3 Unit 2

Questions 21-25 Single choice

Tick **ONE** answer, A-C, for each question.

21. Why did students avoid blaming sunlight immediately?

- ☐ A. Clouds and temperature could also affect growth
- ☐ B. Basil cannot grow in hydroponics
- ☐ C. The roof received no daylight at all

22. Why was the timer useful?

- ☐ A. It made the roof safe for unsupervised visitors
- ☐ B. It reduced pumping when continuous operation was unnecessary
- ☐ C. It eliminated the need to inspect the tank

23. What made holiday care a practical limitation?

- ☐ A. The roof was closed for all of the school year
- ☐ B. The nutrient tank could not be checked in hot weather
- ☐ C. One caretaker could inspect the system but could not replace a full class team

24. Why was the lettuce harvest described as limited?

- ☐ A. It could be eaten only by the science teacher
- ☐ B. It was unsuitable for sandwiches
- ☐ C. It demonstrated the system but could not supply school lunches

25. What conditions would justify another roof system?

- ☐ A. Suitable light, safe access, reliable power and staff maintenance time
- ☐ B. A larger roof and permanent student access
- ☐ C. No pump, no safety checks and no staff rota

Speaking Homework 3

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "In my view,".
the wind farm / could be / In my view, / a useful solution

2. Start with "However,".
However, / might cause / the project / some local problems

3. Start with "The council".
should listen to / both sides / of the debate / The council

4. Start with "One benefit".
the turbines / One benefit / produce clean energy / is that

5. Start with "A possible risk".
A possible risk / may be affected / wildlife / is that

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: You support the idea but want to check the cost. Choose agree or refuse.

Friend: **Could solar panels help our school?**

You: I _____, but we need to check the cost first.

7. Situation: Your friend wants to build turbines near homes. Choose worried or delighted.

Friend: **What do you think of putting the turbines here?**

You: I am _____ about the noise near these homes.

8. Situation: Your group is comparing sites before deciding. Choose before or after.

Friend: **Shall we choose this site now?**

You: Let us check the wildlife _____ we decide.

9. Situation: Your partner gives a reason for a cycle lane. Choose price or point.

Friend: **A protected lane could make the journey safer.**

You: That is a good _____; safety matters.

10. Situation: You want to hear the quieter group member’s view. Choose pay or think.

Friend: **We have heard two views about the park plan.**

You: Maya, what do you _____ about it?

Speaking Homework 3

Book 3 Unit 2

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Order a short position on a wind farm.

Opening: I would support the idea after a few checks.

A	However, the council should check its effect on wildlife.
B	It could provide clean energy for local homes.
C	In my view, the town should consider the wind farm.

12. Order a short response about cycling.

Opening: Cycling to school should feel safer.

A	The school should ask families whether this change would help them cycle.
B	Some pupils avoid cycling because their route feels unsafe.
C	A protected lane could address that safety concern.

13. Order a short response about plastic bottles.

Opening: We could make it easier to refill our bottles.

A	A water-refill station could reduce this waste.
B	Many students buy drinks in plastic bottles.
C	The school should consider installing one.

14. Order a short response about tree planting.

Opening: A few trees could improve the playground.

A	Trees could provide shade and improve the area.
B	The school should choose species that suit the site.
C	The playground has little shade in summer.

15. Order a short response about food waste.

Opening: The canteen could learn something from what students leave.

A	This information might help the canteen prepare less waste.
B	The canteen throws away unused food each day.
C	Students could record which meals are often left.

Speaking Homework 3

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

16. Speak about a wind farm. State a position, one benefit, one risk, and a recommendation.

Model: Solar panels on the school roof could provide clean electricity. However, the roof must be safe enough for the equipment. The school should ask an engineer to check it. I would support the project if the report is positive.

17. Give a recorded cause-and-effect response about a school recycling scheme.

Model: The town uses many plastic bags in local shops. If shoppers bring reusable bags, less plastic may enter rubbish bins. This could reduce waste in the area. Shops should offer a clear reminder at the entrance.

18. Speak about a way to save water. Give a reason, a possible result, and advice.

Model: The school could encourage students to reuse unwanted clothes. This may reduce the amount of material sent away as waste. However, the school needs a clean place to collect items. A monthly swap event could be a useful start.

Speaking Homework 3

Book 3 Unit 2

Questions 19-20 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

19. Give a recorded response to a proposal to plant trees. Include a counter-point.

Model: The beach has rubbish after busy weekends. Volunteers could collect it before it reaches the sea. However, a clean-up alone may not stop future litter. The town should also provide more bins and signs.

20. Speak about your view on a car-free day. Support the view with a practical condition.

Model: The canteen could prepare fewer meals that students rarely choose. This may reduce food waste at lunchtime. However, it must still provide enough choices. Students could give feedback before the menu changes.

Speaking Homework 3

Book 3 Unit 2

Questions 21-22 Describe the picture

Write key words, then record one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: alternative / benefit / risk

21. Imagine the presenter is proposing solar panels for the school. Give your opinion, a reason and one point to check.

Words: solution / risk / provide

22. Imagine the presenter says solar energy would help the school. Respond and ask one useful follow-up question.

Speaking Homework 3

Book 3 Unit 2

Questions 23-25 Describe the picture

Write key words, then record one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: solution / environmental / risk

23. Imagine the students are planning a park clean-up. Give one suggestion and explain how it could help.

Words: environmental / risk / solution

24. Imagine the students must choose an area of the park to clean. Suggest what they should discuss first.

Words: provide / benefit / solution

25. Imagine you propose a regular clean-up at this park. Explain your idea and invite a partner to comment.

Writing Homework 3

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "Climate change".

has / and effects / Climate change / many human causes

2. Start with "Because people burn fossil fuels,".

warmer / becomes / Because people burn fossil fuels, / the atmosphere

3. Start with "As a result,".

in some places / As a result, / sea levels / may rise

4. Start with "One solution".

is to use / One solution / more renewable energy

5. Start with "Public transport".

on roads / Public transport / the number of cars / can reduce

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose because of or because. A full clause follows.

The air is polluted _____ many cars release gases.

7. Choose effect or affect. The noun is needed after an.

One _____ of drought is lower food production.

8. Choose cause of or cause. The phrase names why climate change happens.

Burning fossil fuels is a _____ climate change.

9. Choose however or therefore. This linker introduces a result.

LED bulbs use less energy; _____, they can reduce electricity use.

10. Choose must or may. The writer is uncertain about the future.

Sea levels _____ rise as temperatures increase.

Writing Homework 3

Book 3 Unit 2

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a short climate-change paragraph.

A	Therefore, global temperatures may rise.
B	These activities increase gases in the atmosphere.
C	People burn fossil fuels for transport and electricity.

☐ C-B-A ☐ B-C-A ☐ B-A-C

12. Order a short paragraph about public transport.

A	More public transport could carry these people together.
B	As a result, fewer cars may pollute the air.
C	Many people use private cars for short journeys.

☐ A-B-C ☐ B-C-A ☐ C-A-B

13. Order a short paragraph about food waste.

A	Therefore, the canteen should record demand before cooking.
B	The canteen prepares more meals than students buy.
C	Unused food is thrown away at the end of lunch.

☐ B-C-A ☐ C-A-B ☐ A-B-C

14. Order a short paragraph about water use.

A	As a result, watering in the evening could save water.
B	More water disappears before plants can use it.
C	Some homes water gardens in the hottest part of the day.

☐ C-B-A ☐ C-A-B ☐ B-C-A

15. Order a short paragraph about renewable energy.

A	Solar panels can produce power without burning fossil fuels.
B	The town needs electricity for homes and services.
C	Therefore, the town should study suitable roofs for panels.

☐ C-A-B ☐ A-B-C ☐ B-A-C

Writing Homework 3

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write your own answer with different details.

16. Write a short cause-and-effect paragraph about a climate-change issue. Include one solution.

Model: In this forest, people cut down many trees for building. Consequently, the ground may lose protection from heavy rain. The council should protect remaining trees on steep land. This could reduce soil erosion.

17. Write a short paragraph about a water-saving proposal. Include a cause, effect, and recommendation.

Model: The school cafeteria wastes food because it prepares too many unpopular meals. As a result, leftovers are thrown away each day. It should record which meals students choose. This could reduce waste next week.

18. Write a short paragraph about a recycling problem. Include a cause-and-effect signal.

Model: A leaking tap in the sports centre runs all night. Consequently, a large amount of water is wasted. The centre should repair the tap quickly. Regular checks could prevent the same problem.

Questions 19-20 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write your own answer with different details.

19. Write a short paragraph about a plan to reduce traffic pollution. Include a counter-point.

Model: The library uses old bulbs that need a lot of electricity. Therefore, it could replace them with LED bulbs. However, the new bulbs cost money at first. The library should compare the long-term savings.

20. Write a short paragraph recommending a renewable-energy project. Include a condition.

Model: The town could improve bus services because many people drive short journeys. As a result, fewer cars may pollute the air. However, the new routes must reach local homes. The council should test them with residents.

Writing Homework 3

Book 3 Unit 2

Questions 21-22 Describe the picture

Write one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: greenhouse gas / contribute to / fossil fuel

21. Imagine the vehicles on this street burn petrol or diesel. Explain one possible environmental effect and suggest a response.

Words: fossil fuel / cause / effect

22. Suggest a transport change for this street. Explain how it could lead to an environmental benefit.

Writing Homework 3

Book 3 Unit 2

Questions 23-25 Describe the picture

Write one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: ecosystem / construction / threaten

23. Describe the wetland and the construction visible in the distance. Explain one possible concern.

Words: construction / ecosystem / consequences

24. Write a short response giving a cautious recommendation.

Words: predict / threaten / effect

25. Imagine construction is proposed beside the wetland. Predict one possible effect and explain what should be checked.
