Listening Homework 2

Book 3 Unit 6

Questions 1-5 Sentence completion

Write **ONE WORD AND/OR A NUMBER** from the indicated SHORT audio. Do not add % where it is printed.

1. [6.1-S01] **During the Middle Ages, inventions from several regions were brought into _____ .**
2. [6.1-S02] **The guide can name the country where glasses began, but not the person who invented them: no one _____ .**
3. [6.1-S03] **Visitors see representations of the devices: the exhibition uses _____ to show some of al-Jazari's designs.**
4. [6.1-S03] **The guide calls the crankshaft al-Jazari's most _____ invention before explaining its uses on farms and in cars.**
5. [6.1-S04] **Gunpowder influenced history by changing the _____ of medieval battles.**

Listening Homework 2

Book 3 Unit 6

Questions 6-10 Sentence completion

Write **ONE WORD AND/OR A NUMBER** from the indicated SHORT audio. Do not add % where it is printed.

6. [6.5-S01] **The market's rapid growth surprised people because it exceeded their _____ .**

7. [6.5-S02] **The item packed for a possible car breakdown is a _____ , separate from the camera.**

8. [6.5-S02] **The traveller doing the driving relies on another person to read the route: the _____ .**

9. [6.5-S03] **The _____ replaces maps, written directions and a helpful front-seat companion.**

10. [6.5-S04] **People who rely on phone directions may struggle to ask for help when the _____ is unavailable.**

Listening Homework 2

Book 3 Unit 6

Questions 11-15 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

11. [6.1-S01] **What point does the guide illustrate when first introducing the fountain pen?**

- ☐ A. The pen made writing much faster for the people who used it.
- ☐ B. The exhibition displays original medieval objects rather than models.
- ☐ C. Some medieval inventions remain familiar in everyday life.

12. [6.1-S01] **Why was the fountain pen an improvement on bird feathers?**

- ☐ A. It kept ink from staining the writer's fingers and clothes
- ☐ B. It allowed writers to use no ink at all
- ☐ C. It was designed to make glasses easier to hold

13. [6.1-S03] **What earlier job did the crankshaft perform?**

- ☐ A. Balancing the first glasses on a nose
- ☐ B. Watering gardens and farm fields
- ☐ C. Creating gunpowder for weapons

14. [6.1-S04] **Which sequence does the guide describe?**

- ☐ A. Gunpowder was invented before the first written instructions mentioned.
- ☐ B. Its use in fireworks was the original aim of the scientists.
- ☐ C. Written instructions appeared before scientists began their experiments.

15. [6.1-S04] **What did Chinese scientists originally hope their powder would do?**

- ☐ A. Make people live forever
- ☐ B. Make clocks run without water
- ☐ C. Improve poor vision

Listening Homework 2

Book 3 Unit 6

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

16. [6.5-S01] **Why does the speaker give download totals from different years?**

- ☐ A. To show that work apps remain the only popular category.
- ☐ B. To demonstrate the scale and speed of app growth.
- ☐ C. To compare the cost of different phone models.

17. [6.5-S01] **What made the second generation of apps different?**

- ☐ A. They replaced every internet browser
- ☐ B. Users could download and install them
- ☐ C. They worked only on office computers

18. [6.5-S02] **What happens if the travellers lose their way?**

- ☐ A. They seek help and record the instructions themselves.
- ☐ B. They return home to print an entirely new route.
- ☐ C. They wait until the guidebook offers a clearer route.

19. [6.5-S04] **Why is the web-page study included?**

- ☐ A. To illustrate users' limited patience with loading delays.
- ☐ B. To measure how often people lose their phone signal.
- ☐ C. To show that most users prefer paper information.

20. [6.5-S04] **What difficulty can app dependence create?**

- ☐ A. Web pages always load more slowly
- ☐ B. People stop taking road trips completely
- ☐ C. People may struggle to find directions without a signal

Listening Homework 2

Book 3 Unit 6

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

21. [6.1-S01] **Which TWO facts concern the first fountain pen?**

- ☐ A. It was made in 953
- ☐ B. It was invented in thirteenth-century Italy
- ☐ C. It had ink in a small container
- ☐ D. It was held in front of the eyes
- ☐ E. It was powered by weights

22. [6.1-S03] **Which TWO statements describe the crankshaft?**

- ☐ A. It was a Chinese powder
- ☐ B. It stopped clothes being stained
- ☐ C. It was used only for reading
- ☐ D. It is used in modern car engines
- ☐ E. It lets machines move in a straight line

23. [6.1-S04] **Which TWO details concern early gunpowder instructions?**

- ☐ A. They came from twelfth-century Turkey
- ☐ B. Three named writers produced them
- ☐ C. They were intended for a museum clock
- ☐ D. They were written in the eleventh century
- ☐ E. They described car engines

Listening Homework 2

Book 3 Unit 6

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

24. [6.5-S01] **Which TWO figures illustrate app growth?**

- ☐ A. More than 10 billion downloads were reported by 2011
- ☐ B. The first app store opened in 2008
- ☐ C. People used browsers more than apps on phones
- ☐ D. Apps were unavailable before 2017
- ☐ E. Only 180 million apps had been downloaded by 2017

25. [6.5-S04] **Which TWO negative effects of app dependence does the speaker describe?**

- ☐ A. Users stop taking trips away from home
- ☐ B. It ends the need for specialist software workers
- ☐ C. People can become less capable of finding directions without a signal
- ☐ D. People expect information to arrive immediately
- ☐ E. Phones can no longer take photographs

Passage A

A A design class looked for ideas in the natural world. Students examined seeds, leaves and shells, paying attention to shape rather than colour alone. One group became interested in seeds that caught on a piece of cloth. Under a magnifying glass, they could see small hooks. They wondered whether a similar shape could help them create a fastening for a reusable bag. The observation suggested a starting point, not a finished product.

B The students first drew a much larger version of a hook so that they could discuss its shape. They made models from several materials and tried attaching them to different fabrics. A stiff model held firmly but was difficult to release. A softer one was easier to open but sometimes came loose when the bag moved. These early tests showed that copying an interesting natural shape did not automatically produce an object suitable for everyday use.

C To compare the versions, the group agreed on a simple test. Each fastening held the same weight while a student lifted the bag ten times. They recorded whether it stayed closed and how easily another person could open it afterwards. The order of the versions was changed between tests, so the same model was not always tried first. The group also repeated the test with a second person instead of trusting one user's experience.

Passage A

D The best result came from a version with shorter hooks. However, it caught on a loose thread in one fabric. The team noted the problem rather than hiding it because the other results were good. It changed the edge of the fastening and tried it again. The new test used the same weight and fabrics, allowing the students to see whether this particular change helped. A different test would have made the comparison harder to interpret.

E The teacher then asked about the people who might use the bag. Someone carrying shopping could need to open it with one hand, and a small child might find a tight fastening difficult. The students invited several volunteers to try the model with ordinary objects inside. Their comments added information that the repeated lifting test had not provided. A product could remain closed under a weight but still be awkward to use in a normal situation.

F The final display included the seed, the early models and a record of the changes. The students described the fastening as inspired by nature, not identical to it. They had changed both the size and the material to suit a human task. They also explained that the class had tested only a few samples, so it could not promise how the fastening would behave after years of use. Nature had provided a useful question; observation, comparison and revision had developed the answer.

Reading Homework 2

Book 3 Unit 6

Questions 1-5 True, False, Not Given

TRUE: agrees with the passage. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

1. The students' first observation concerned colour alone.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

2. The seeds came from the teacher's garden.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

3. The stiff model was easier to release than the softer one.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

4. The early models showed practical weaknesses despite copying a natural shape.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

5. Each fastening was tested with a different weight.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 6-10 True, False, Not Given

TRUE: agrees with the passage. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

6. The same version was always tested first.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

7. The team kept the weight and fabrics unchanged when testing the revised edge.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

8. The volunteers all had experience designing reusable bags.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

9. Ordinary use revealed information not supplied by repeated lifting.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

10. The class could guarantee the fastening's performance after years of use.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 11-15 Matching information

Which paragraph contains each piece of information? Tick **ONE** box. You may use a letter more than once.

11. The finished fastening differs from the natural seed in both size and material.

☐ A ☐ B ☐ C ☐ D ☐ E ☐ F

12. The designers clearly state a limit on their final claim.

☐ A ☐ B ☐ C ☐ D ☐ E ☐ F

13. The initial idea comes from looking closely at a natural object.

☐ A ☐ B ☐ C ☐ D ☐ E ☐ F

14. One fault is recorded alongside a good result.

☐ A ☐ B ☐ C ☐ D ☐ E ☐ F

15. Two models expose a practical trade-off.

☐ A ☐ B ☐ C ☐ D ☐ E ☐ F

Questions 16-20 Matching information

Which paragraph contains each piece of information? Tick **ONE** box. You may use a letter more than once.

16. An enlarged drawing allows the group to discuss the shape of a tiny hook.

☐ A ☐ B ☐ C ☐ D ☐ E ☐ F

17. A successful load test does not answer every question about use.

☐ A ☐ B ☐ C ☐ D ☐ E ☐ F

18. A second user repeats a test.

☐ A ☐ B ☐ C ☐ D ☐ E ☐ F

19. The order of testing is varied deliberately.

☐ A ☐ B ☐ C ☐ D ☐ E ☐ F

20. The conditions are kept the same when testing a small revision.

☐ A ☐ B ☐ C ☐ D ☐ E ☐ F

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question.

21. Which TWO conclusions follow from the first models?

- ☐ A. The stiff model was the easiest to release.
- ☐ B. All materials performed identically.
- ☐ C. An interesting natural shape guaranteed an everyday-use product.
- ☐ D. Firm holding and easy release did not automatically occur together.
- ☐ E. A natural shape still needed adaptation for a human purpose.

22. Which TWO features strengthened the comparison between versions?

- ☐ A. Relying on one user's first attempt.
- ☐ B. Changing all test conditions whenever a result was disappointing.
- ☐ C. Using the same weight and number of lifts for each version.
- ☐ D. Changing the order and including a second user's experience.
- ☐ E. Giving the preferred version a lighter load.

23. Which TWO ideas explain why the revised edge was retested under the same conditions?

- ☐ A. A favourable earlier result made further testing unnecessary.
- ☐ B. The team wanted to see whether that particular change helped.
- ☐ C. Changing the test as well would make the comparison harder to interpret.
- ☐ D. The original version had no remaining weakness.
- ☐ E. A different weight was needed to ensure the new version looked better.

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question.

24. Which TWO observations explain why the teacher asked about ordinary users?

- ☐ A. A shopper might need to open the bag with one hand.
- ☐ B. A child might find a tight fastening difficult.
- ☐ C. A successful weight test proved every user would find the bag convenient.
- ☐ D. Volunteers' comments added nothing beyond the lifting test.
- ☐ E. The design was intended only for students performing laboratory tests.

25. Which TWO claims fit the evidence shown in the final display?

- ☐ A. The tested samples did not establish performance after years of use.
- ☐ B. The final fastening was identical to the seed.
- ☐ C. The class proved the fastening would last indefinitely.
- ☐ D. Nature alone supplied a finished product needing no testing.
- ☐ E. The design drew on nature while changing size and material for its task.

Speaking Homework 2

Book 3 Unit 6

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "The improved version".
a different room / The improved version / was tested / in

2. Start with "These small parts".
recycled plastic / from / These small parts / are made

3. Start with "The new label".
the instructions / clearer / The new label / makes

4. Start with "Several changes".
after / were made / Several changes / the first test

5. Start with "The device".
by / The device / is used / students with different needs

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Two classmates tested the new version. Choose was or were.

Friend: Did anyone try the new design?

You: Yes, it _____ tested by two classmates.

7. Situation: The new stand is easier to fold. Choose easily or easier.

Friend: What does the new joint do?

You: It makes the stand _____ to fold.

8. Situation: The designers changed three parts in response to the feedback. Choose made or taken.

Friend: Was the feedback useful?

You: Yes, three changes were _____ in response to it.

9. Situation: The cards contain short written instructions. Choose use or used.

Friend: What are these cards for?

You: They are _____ to explain each step.

10. Situation: Plastic is the material. Choose from or by.

Friend: What are the small parts made from?

You: They are made _____ recycled plastic.

Speaking Homework 2

Book 3 Unit 6

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Explain a redesign after testing.

Opening: The first test gave us a useful surprise.

A	It was replaced with a larger handle.
B	The larger version made the object easier to lift.
C	The original handle was difficult to hold.

12. Explain how a prototype is shared.

Opening: Other students need to understand our idea.

A	Those photographs were added to a short guide.
B	The prototype was photographed from three sides.
C	The guide was shared with the next test group.

13. Describe a choice between materials.

Opening: We tried two materials before deciding.

A	A stronger card cover was used for the next version.
B	That paper tore during repeated use.
C	The first cover was made from thin paper.

14. Explain an accessibility improvement.

Opening: We wanted more people to read the controls.

A	The change made the controls easier to read.
B	The old buttons had very small labels.
C	Those labels were replaced with larger ones.

15. Explain how feedback changed a project.

Opening: We did not notice the problem until someone else tried it.

A	That hinge was adjusted before the second test.
B	She found that one hinge was too stiff.
C	A classmate tested the folding stand.

Speaking Homework 2

Book 3 Unit 6

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

16. Describe a first design, feedback and a change. Use two passive forms.

Model: Our first model was made from thin card. It was tested by another group. They found that the sides bent too easily. Stronger card was used for the next model.

17. Explain how a change makes an invention easier for a new user.

Model: The instructions were originally printed in small text. Larger words were added after a test. The change makes each step easier to read. New users can follow the guide more confidently.

18. Describe how a device would be introduced to a test group.

Model: The device would first be placed on a table. Each student would be shown its main button. A short task would then be explained. Their comments could guide the next design.

Speaking Homework 2

Book 3 Unit 6

Questions 19-20 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

19. Compare two versions of a familiar object using passive forms and make.

Model: The first bag was made without a side pocket. A pocket was added to the new version. It makes small items easier to reach. The main section can still hold larger objects.

20. Describe a classroom invention from materials to use. Include a specific benefit.

Model: The model organizer was made from old boxes. The boxes were fixed inside a larger tray. It is used to separate small parts. This makes preparing for a project quicker.

Speaking Homework 2

Book 3 Unit 6

Questions 21-22 Describe the picture

Write key words, then record 3 connected sentences for each question. Use the words if helpful.

Words: device / install / outcome

21. Describe the bicycle light and the work being done on it. Use a passive form.

Words: make improvements / user / create

22. Imagine you designed this light. Describe one improvement and a test of it.

Speaking Homework 2

Book 3 Unit 6

Questions 23-25 Describe the picture

Write key words, then record 3 connected sentences for each question. Use the words if helpful.

Words: create / product / make a contribution

23. Describe the wooden object and how the two people are making it.

Words: access / allow / product

24. Suggest a use for the organizer in a shared workshop. Explain how it could help.

Words: make improvements / user / make a decision

25. Imagine the makers want to improve their organizer. Suggest a change and explain how to choose it.

Writing Homework 2

Book 3 Unit 6

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "The redesigned handle".

be / will probably / The redesigned handle / easier to hold

2. Start with "The new feature".

may not / work / on every device / The new feature

3. Start with "We should".

rethink / of the instructions / the order / We should

4. Start with "A clearer display".

A clearer display / to follow the steps / could enable / more users

5. Start with "The unfinished model".

is unlikely / to be ready / The unfinished model / tomorrow

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose probable or probably.

The redesigned stand will _____ be lighter.

7. Add re- to think to mean think again.

We may need to _____ the plan.

8. Choose may or must. The result is possible but uncertain.

The new version _____ reduce the waiting time.

9. Choose enabled or enable after could.

Larger controls could _____ more people to use it.

10. Add dis- to agree to mean hold a different opinion.

Two designers may _____ about the best shape.

Writing Homework 2

Book 3 Unit 6

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a prediction after a design change.

A	A winter test could check this prediction.
B	The team added a larger handle to the bag.
C	That handle may be easier to hold with gloves.

☐ A-C-B ☐ C-A-B ☐ B-C-A

12. Order a feature proposal.

A	The team should ask those users to try a sample.
B	The app could include spoken instructions.
C	Those instructions might help users who find small text difficult.

☐ B-C-A ☐ C-A-B ☐ B-A-C

13. Order an account of rethinking a design.

A	A lighter material may solve the weight problem.
B	The designer decided to rethink its materials.
C	The first case was too heavy to carry comfortably.

☐ B-C-A ☐ C-B-A ☐ B-A-C

14. Order a limitation and alternative.

A	Some visitors may arrive without one.
B	The digital guide needs a charged device.
C	A printed version could provide an alternative for them.

☐ B-C-A ☐ A-C-B ☐ B-A-C

15. Order a prediction based on limited testing.

A	Longer use might reveal different problems.
B	The new frame worked in one short test.
C	The group should therefore test it again before making a firm prediction.

☐ A-C-B ☐ C-B-A ☐ B-A-C

Writing Homework 2

Book 3 Unit 6

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write your own answer with different details.

16. Predict how a redesigned object may help a different user. Include a limitation and a test.

Model: A bag with a larger handle may help someone wearing gloves. The handle would be easier to grip. However, it might catch on nearby objects. A short test could compare both problems.

17. Describe a feature you would add to an app and predict its effect cautiously.

Model: The app could add a spoken reminder. Users might notice it without looking at the screen. However, some people may prefer a quiet alert. A choice of settings could meet different preferences.

18. Explain why a model needs rebuilding and what may improve.

Model: The first model bent when a small weight was added. The team should rebuild its centre section. A stronger joint may support the weight better. Another test would show whether the change works.

Writing Homework 2

Book 3 Unit 6

Questions 19-20 Follow the model

Use the model to help you express different content in 4 connected sentences. Write your own answer with different details.

19. Make two predictions about a classroom invention and include uncertainty.

Model: A shared display could make instructions easier to see. It may also reduce the need for printed sheets. However, users at the back might struggle with small text. The teacher could test it from several seats.

20. Describe a disagreement between designers and a way to compare their ideas.

Model: One designer believes the tool should be very small. Another thinks larger buttons would enable easier use. Both ideas may have benefits. Testing two versions could help them compare the results.

Writing Homework 2

Book 3 Unit 6

Questions 21-22 Describe the picture

Write 3 connected sentences for each question. Use the words if helpful.

Words: personal / image / movement

21. Describe the traveller and the phone. Make a cautious prediction about the next few minutes.

Words: translate / rethink / essential

22. Imagine the traveller cannot understand a route message. Predict how an app could help and mention a limitation.

Writing Homework 2

Book 3 Unit 6

Questions 23-25 Describe the picture

Write 3 connected sentences for each question. Use the words if helpful.

Words: movement / illustrate / conditions

23. Describe the model and the fan. Predict what may happen when the fan is switched off.

Words: conditions / movement / illustrate

24. Imagine the students move the fan farther away. Predict an outcome and suggest what they should observe.

Words: preview / unsafe / essential

25. Imagine the students will show the model to younger pupils. Suggest how to prepare the demonstration.
