More than One Way to Support Learning Passage B

A At Northfield College, students discussed a small scholarship pilot for learners who faced different practical costs. Some wanted cash, saying it let a student decide whether travel, food or course materials were most urgent. Others preferred travel vouchers because they could be used directly on buses and trains. A third group proposed a device-loan scheme for students whose home computer was unreliable. The committee did not treat one option as automatically fair. It began by asking which needs each form could meet and which needs it could leave uncovered.

B The application was deliberately brief. Students described the learning activity or cost they needed help with, but they were not asked to explain private family circumstances in a group meeting. A trained adviser could discuss sensitive information separately. Applications were read without names at the first stage, and the committee used the same questions for each request. This did not remove every difficult judgement, but it reduced the chance that a familiar name or confident speaker would shape an early decision.

C For one term, the pilot offered small cash awards, bus vouchers and loan laptops. A student receiving a voucher could not use it to buy a textbook, while a cash recipient might still struggle if local transport fares rose. Loan devices had to be returned by the end of term and could not solve every problem with internet access at home. The committee kept these limits visible in its information sheet instead of promising that each form of support would work equally well for everyone.

More than One Way to Support Learning Passage B

D The college also discussed how to judge the pilot. Some members suggested attendance figures, but others noted that arriving at class did not show whether a student could take part fully. They added voluntary comments about joining group work, completing an online task and being able to stay after class for a project. These observations were not used to rank students or to decide who deserved help. They were used to ask whether a particular support form removed one practical barrier.

E At the end of the term, demand for vouchers was higher than expected, while several loan laptops were returned late because students were unsure about the deadline. The committee proposed clearer return reminders and another information session before changing the size of any award. It reported that the pilot had helped some students reach learning activities, but could not show how they would have managed without it or whether the effects would last. The next discussion would include students who had applied, students who had not applied and staff who managed the scheme. The committee also noted that a short pilot could be affected by timetable changes, seasonal travel conditions and the number of people who heard about it. These reasons supported another term of observation rather than a confident claim based on one set of applications.

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question.

16. Why did some students support cash awards?

- ☐ A. They let recipients decide which urgent cost to meet
- ☐ B. They removed every internet problem
- ☐ C. They could only be used for bus travel

17. Why did others favour travel vouchers?

- ☐ A. They paid for every textbook
- ☐ B. They could be used directly on buses and trains
- ☐ C. They never had a limit

18. What did the application avoid requiring in a group meeting?

- ☐ A. Private family circumstances
- ☐ B. A transport cost
- ☐ C. A course activity

19. How were applications first read?

- ☐ A. Only by familiar staff
- ☐ B. In public meetings
- ☐ C. Without names

20. What could a voucher not buy?

- ☐ A. A train journey
- ☐ B. A textbook
- ☐ C. A bus journey

Questions 21-25 Single choice

Tick **ONE** answer, A-C, for each question.

21. What limit applied to loan laptops?

- ☐ A. They could not run online tasks
- ☐ B. They had to be returned at term end
- ☐ C. They were never available at home

22. Why were attendance figures questioned?

- ☐ A. Attendance alone did not show full participation
- ☐ B. They measured internet prices
- ☐ C. Students never attended class

23. What were voluntary comments used for?

- ☐ A. To publish private information
- ☐ B. To rank students
- ☐ C. To ask whether support removed a barrier

24. What happened to several loan laptops?

- ☐ A. They were sold for cash
- ☐ B. They stopped working immediately
- ☐ C. They were returned late

25. What could the pilot not show?

- ☐ A. Whether laptops had deadlines
- ☐ B. Whether effects would last
- ☐ C. Whether vouchers were requested

Speaking Homework 3

Book 3 Unit 8

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "Recording payments".
check its total / Recording payments / the group / helps

2. Start with "Saving a little each week".
can make / a target / Saving a little each week / easier to plan

3. Start with "One result".
greater clarity / is / of sharing the record / One result

4. Start with "In other words,".
In other words, / to explain / we need / each cost

5. Start with "Comparing prices".
Comparing prices / gives us / before a decision / more information

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Your group wants everyone to check the money collected at a sale. Choose Record or Recording.

Friend: **What helps the group check its total?**

You: _____ payments helps us check it.

7. Situation: A classmate is unsure what you mean by a clear budget. Choose word or words.

Friend: **What do you mean by a clear budget?**

You: In other _____, it is a list of the planned costs.

8. Situation: A classmate wants to throw away the receipts from the sale. Choose result or because.

Friend: **Why keep every receipt?**

You: One _____ is that we can check each payment.

9. Situation: Your group has two price offers for the same materials. Choose helps or help.

Friend: **Why compare the two prices?**

You: Comparing them _____ us make a choice.

10. Situation: Printing more posters would cost more than the group can afford. Choose of or that.

Friend: **Why did the group choose fewer posters?**

You: Because _____ the printing cost.

Book 3 Unit 8

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Support keeping a shared record.

Opening: A small class fund still needs a clear record.

A	In other words, the record makes questions easier to resolve.
B	Recording each payment lets everyone check the total.
C	For example, a missing receipt may explain a difference.

12. Explain a benefit of comparing options.

Opening: We should know what each option includes.

A	One offer may include delivery while the other does not.
B	That difference could change which option suits the budget.
C	Comparing two prices can reveal an extra cost.

13. Explain a way to plan a class target.

Opening: The target looks easier to discuss in smaller steps.

A	Those amounts can be compared with the money actually saved.
B	As a result, the group can see when it needs to adjust the timing.
C	Dividing it into weekly amounts gives the class a plan.

14. Explain why one result should be interpreted carefully.

Opening: One successful sale does not tell us everything.

A	The group should consider this before predicting the next event’s result.
B	The last event happened on a very busy school day.
C	That busy day may have brought more visitors than usual.

15. Respond to a concern about recording costs.

Opening: I understand that writing everything down takes time.

A	However, a short record can prevent confusion later.
B	The group can then focus on the costs that remain.
C	It shows which items have already been paid for.

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

16. Support keeping a class spending record. Use a gerund subject, an example and a paraphrase.

Model: Comparing options helps a group understand a purchase. For example, one price may include delivery. A second price may leave that cost out. In other words, the lowest label is not always the lowest total.

17. A classmate says a small fund needs no records. Respond with a reason and a practical example.

Model: I understand that the event is small. However, checking costs still helps us plan. Last time, we nearly forgot the cost of envelopes. A brief list would make that item easier to remember.

18. Explain a possible benefit and limitation of a class fundraising event. End with a balanced view.

Model: Holding a book sale could add money to the library fund. It could also give used books new readers. However, the event needs space and organization. I would support it if the class could manage those tasks.

Questions 19-20 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

19. Event: payments £50; materials £18. Explain the remaining amount and why both figures matter.

Model: The class received forty pounds. Materials cost fifteen pounds. The remaining amount was therefore twenty-five pounds. This shows why recording costs matters as well as payments.

20. Explain a planning recommendation using a gerund subject and a consequence.

Model: Sharing the plan before buying materials can reveal missing items. A classmate may notice a cost others forgot. As a result, the group can adjust the list early. This makes the next step easier to organize.

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "Sales".

from twenty units to forty units / rose / Sales

2. Start with "There was".

of ten units / There was / during the period / an increase

3. Start with "The final figure".

The final figure / was / fifty / approximately

4. Start with "Product A grew,".

declined / Product B / Product A grew, / whereas

5. Start with "Overall,".

show / the figures / Overall, / a clear upward trend

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose to or by. Totals: 20 to 30.

Sales rose _____ thirty units.

7. Choose of or by. Totals: 20 to 30.

Sales increased _____ ten units.

8. Choose of or to after increase. Totals: 20 to 30.

There was an increase _____ ten units.

9. Choose approximate or approximately before a number.

The final figure was _____ fifty.

10. Choose whereas or because to contrast two trends.

A rose, _____ B fell.

Writing Homework 3

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a data paragraph.

A	Overall, the final figure was twice the starting total.
B	Sales rose from twenty to thirty and then to forty units.
C	The series shows monthly sales over three months.

☐ C-B-A ☐ B-A-C ☐ A-B-C

12. Order a comparison of two products.

A	These opposite changes left A ten units ahead of B.
B	In that comparison, A rose from ten to thirty units while B fell from forty to twenty.
C	The figures compare sales of Product A and Product B.

☐ B-A-C ☐ B-C-A ☐ C-B-A

13. Order a description using an approximation.

A	It was therefore approximately fifty.
B	Using that rounded value makes the overall scale easier to describe.
C	The first figure was forty-nine units.

☐ A-C-B ☐ C-A-B ☐ B-A-C

14. Order an overview with a limitation.

A	However, those figures alone do not explain why it increased.
B	The total rose by ten units in each of three stages.
C	The figures show a steady increase across the period.

☐ A-C-B ☐ C-A-B ☐ C-B-A

15. Order a summary of recovery.

A	This recovery brought the final figure back to thirty units.
B	After this fall, it recovered to its starting level.
C	The total started at thirty units before falling to fifteen.

☐ C-B-A ☐ B-A-C ☐ A-B-C

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write your own answer with different details.

16. Monthly sales: 21, 35, 49 units. Introduce the series, describe the change and use one approximation.

Model: The series shows sales over three months. Sales rose from twelve to eighteen and then to twenty-eight units. The final total was approximately thirty. Overall, the series shows an upward trend.

17. Sales: A 10 to 30; B 40 to 20. Write a comparison using whereas and a concluding sentence.

Model: The figures compare two products. X rose from twenty to fifty units, whereas Y fell from sixty to forty. X finished ten units ahead of Y. Overall, the products followed opposite trends.

18. Quarterly totals: 30, 15, 30. Describe the key changes using by and to. End with an overview.

Model: The total first stood at forty units. It fell by twenty to twenty units. It then rose to forty again. Overall, the total returned to its starting level.

Use the model to help you make one focused paragraph of 4-5 sentences. Write your own answer with different details.

19. Figures: 20, 30, 40 units. Summarize the trend and state one thing the data cannot explain.

Model: The figures rise from ten to twenty and then thirty. Each increase is ten units. The series therefore shows steady growth. However, it does not explain the cause of that growth.

20. Sales: A 98 to 102; B 45 to 75. Summarize A approximately and describe B’s change accurately.

Model: X moves from forty-nine to fifty-one units. It remains at approximately fifty. Y rises from twenty to forty units. Overall, Y changes more, although X still finishes higher.
