Passage C - Reading a Game Rating

A Choosing a video game can involve more than asking whether it looks fun. A game may be a creative challenge, a story, a sport simulation or an **educational** activity, but families may also want to know what appears in it and how players use it online. In the United States, the Entertainment Software Rating Board, or ESRB, gives rating information for games and apps. Its aim is to help parents and other consumers make informed choices about which games suit their family.

B An ESRB rating has three parts. Rating categories suggest age appropriateness, such as Everyone or Teen. Content descriptors name types of content that may have led to a rating or may concern a family, for example violence or strong language. Interactive elements point to online features that may be important, including in-game purchases, contact with other users, location sharing or unrestricted internet access. These elements do not decide the age rating, but they can still **affect** a family's choice.

C The information can be found in several places. ESRB says ratings may appear on a game package, a digital store page, an **advert**, social media and game-review **websites**. A person can also search for a title using the organisation's site or its **free** mobile app. This gives a family a chance to check before they buy or **download** a game. Reading the full label is more useful than looking only at a colourful picture or a short video.

Passage C - Reading a Game Rating

D Ratings are a starting point, not a complete answer for every player. The ESRB suggests that families can also read reviews, watch gameplay videos or try a game themselves. A child's age, **interests** and experience can matter. One family might be comfortable with an online racing game, while another may wish to limit online communication. A family can use this information to choose games that suit the needs of a particular player, whether they play on a **smartphone**, console or computer.

E Device controls can support this decision after a game has been chosen. ESRB explains that many devices allow adults to block games by rating, manage spending, set time limits and restrict communication. These settings cannot replace conversations, but they can help families put an agreed plan into practice. Ratings give useful information about the content of a **computer program**, but they cannot **record** every player's experience. Still, a label, a discussion and suitable controls can work together to make game choices clearer.

Book 2 Unit 3

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Explain a useful feature and its limit.

Opening: This device helps me, although it is not perfect.

A	My tablet makes reading easy.
B	On the other hand, that large screen makes the tablet harder to carry.
C	Its large screen shows a full page clearly.

12. Add a related advantage.

Opening: There is more than one reason I use this app.

A	It also records my pronunciation of those words.
B	I can listen to the recordings and try again.
C	The app helps me practise new words.

13. Contrast two ways to store work.

Opening: I have tried both ways of keeping my notes.

A	Digital notes, however, are easier to share.
B	Paper notes do not need a battery.
C	That easy sharing is useful for group projects.

14. Explain a problem with notifications.

Opening: My phone sometimes makes studying harder.

A	Each notification takes my attention away from the page.
B	Turning them off helps me stay focused.
C	It shows a notification whenever a message arrives.

15. Explain a balanced choice.

Opening: For this task, I would choose the laptop.

A	Its keyboard helps me write a long report.
B	I accept that extra weight because typing is more important for this task.
C	However, the laptop is heavier than my phone.

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

16. Give one advantage and one limitation of a device. End with your choice for a task.

Model: A laptop helps me write long reports. Its keyboard is comfortable to use. However, it is heavy to carry. I would still choose it for my class project.

17. Explain two related benefits of an app. Add a specific example.

Model: My language app gives me short listening tasks. It also records my voice. For example, I can compare two recordings of the same sentence. These features help me practise by myself.

18. Explain a technology habit you want to change. Connect the problem and your plan.

Model: I often check messages while studying. Each message breaks my concentration. I want to turn off notifications during homework. I can read the messages after I finish.
