Passage A - Olympic Climbing at Paris 2024

A Olympic sport **climbing** asks athletes to solve short physical problems on high walls. At Paris 2024, the sport had four events for men and women. Two were Boulder and Lead events, and two were Speed events. The sport can look **challenging**, but its rules give each athlete a clear task.

B In a Boulder and Lead event, athletes **climb** in two phases, a semifinal and a final. Each phase includes one boulder stage and one lead stage. Points from both stages produce a single ranking. The athlete with the best final ranking wins the **competition**. Semifinal points do not move into the final, so every finalist starts that phase again.

C Boulder **climbing** happens on a lower wall with safety mats. The mats help protect athletes from an **accident** when they fall. A boulder **course** has four problems. An athlete tries to solve each one in a limited time, with several attempts if needed. The aim is to control the highest scoring hold, a place to grip the wall. Athletes stay **fit** through training and practise moves that suit the wall, the holds and the available time.

D Lead **climbing** uses a taller wall and a longer route. Athletes try to **climb** as high as possible before they fall or stop. In the semifinal, they start in reverse order of Olympic seeding, a ranking made before the event. In the final, the order follows the semifinal ranking. Each **participant** attempts the route alone and cannot watch another athlete try it first.

E The eight athletes with the highest combined Boulder and Lead scores after the semifinal progress to the final. The final begins with an observation period. Athletes can look at the boulders, but they cannot try them. Then the final stages **take place**. The rules keep the task new for everyone, so **climbers** need to plan their own moves.

Passage A - Olympic Climbing at Paris 2024

F Speed was a separate Olympic event at Paris 2024. In elimination heats and the finals, two athletes raced on the same standard wall, each on a different lane. Their aim was simple: reach the top first.

G The three kinds of **climbing** need different skills. Boulder **climbers** make careful choices on short problems. Lead **climbers** keep going on a long route. Speed **climbers** move quickly on a fixed wall. Sport **climbing** can seem **strange** to a new viewer at first. Every event has a goal, a set place and rules.

H Olympic **climbing** shows that a sport can be both physical and thoughtful. Athletes train their bodies, but they also study holds, time and possible moves. They **compete** under the same rules. The Paris 2024 format gave medals in separate speed races and in combined Boulder and Lead events.

Questions 1-10 Summary completion

Write **ONE WORD** from the indicated paragraphs. Questions 1-5: **A, B**. Questions 6-10: **C, D**.

The sport can look **(1)** _____, but its rules give each athlete a clear task. Boulder and Lead athletes **(2)** _____ the walls in two phases. Points from both stages made a **(3)** _____ for each phase. The phase that decided the winner was the **(4)** _____. Points from the earlier phase did not **(5)** _____ into that phase.

A Boulder course has four **(6)** _____. Athletes have limited **(7)** _____ for attempts on each one. An athlete tries to control the highest scoring **(8)** _____. The medal-round order follows the **(9)** _____ results. Each participant attempts the Lead route **(10)** _____.
