Passage B - Open-Water Swimming and Navigation

A Open-water **swimming** is different from a pool race. In a pool, swimmers follow floor lines and turn at walls. In open water, the race uses a marked **course** in a lake, river or sea. Singapore 2025 included men's and women's 10km races. A new viewer may find the setting **strange**, but athletes race under clear rules.

B World Aquatics says open-water events are freestyle. Swimmers must complete the whole **course** and respect turning buoys and boundaries. A buoy, a floating marker, tells athletes where to turn, so they must look ahead. Good navigation can save distance. Missing a turn can make a fast swimmer lose time.

C The **course** changes how athletes think during a **competition**. They cannot use a pool wall at a fixed point. Instead, they watch for the next buoy and choose a line towards it. Water, light and other swimmers can make this **challenging**. The marked route is the same for everyone, but each swimmer must decide how to follow it.

D Before a race, organisers check the water and **course**. In Singapore in 2025, World Aquatics postponed the 10km events when water tests did not meet the required standards. Later tests improved, and the races went ahead that afternoon. This shows why plans may change before an event can **take place** in natural water.

E Open-water **swimming** has races at different distances. Singapore 2025 included 5km races, a 3km knockout sprint with several rounds and a mixed 4x1500m relay. In the knockout event, speed matters, but athletes also judge route and position. A **participant** must be physically **fit**, and planning can matter as much as a strong finish.

Passage B - Open-Water Swimming and Navigation

F World Aquatics updated its open-water **competition** regulations for 2025. The update included rules for the 3km Individual Knockout Sprint and a Video Review Judge, an official who uses video to help check results. Officials use more than a finish line to manage a race. Clear decisions help athletes **compete** fairly when many swimmers reach a turn together.

G A World Aquatics manual published in 2020 describes support around the race route. Safety boats and qualified staff need clear roles and communication. Rescue boats should carry a driver and a lifeguard. They provide help if an **accident** occurs or a swimmer is in difficulty. Planning includes knowing how to bring someone back to shore.

H Open-water **swimming** is not only about **swimming** fast in a straight line. Athletes follow a marked route, watch buoys and respond to an outdoor setting. Officials also check water quality and apply rules. A pool swimmer may need extra practice before an open-water race. The sport has its own demands.

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

16. Explain a sports plan with two conditions. Give a practical reason for one choice.

Model: We want to enter the school tournament. If six players join, we will make a team. If the hall is free, we will practise there. It is close to our classrooms.

17. Describe a team problem and a possible improvement. Use a conditional.

Model: Our passes were too slow in the last game. The other team took the ball easily. If we practise short passes, we may improve. We will try this at our next session.

18. Explain a choice between two sports activities. Include cost and one other detail.

Model: The swimming class costs more than the running club. It also requires a bus journey. If I choose running, I can walk to practice. I think that plan is easier for me.
