Listening Homework 1

Book 2 Unit 8

Questions 1-5 Sentence completion

Write **ONE WORD, ONE NUMBER, OR ONE OF EACH** from the indicated SHORT audio. Do not add % where it is printed.

1. [8.3-S01] **The programme describes journeys beyond the moon and nearby** _____ **.**

2. [8.3-S01] **The host says near-space exploration began in** _____ **.**

3. [8.3-S01] **The first human-made object stopped working three** _____ **after launch.**

4. [8.3-S01] **The first object did not reach the ground because it** _____ **up.**

5. [8.3-S01] **The host says modern space junk has many** _____ **on space programmes.**

Questions 6-10 Sentence completion

Write **ONE WORD, ONE NUMBER, OR ONE OF EACH** from the indicated SHORT audio. Do not add % where it is printed.

6. [8.4-S02] **The host says the pieces travel at extremely fast _____ .**

7. [8.4-S02] **NASA _____ where the space junk is.**

8. [8.4-S02] **The ISS needs a warning at least _____ hours before a possible accident.**

9. [8.4-S02] **The host says there are over _____ pieces of space junk.**

10. [8.4-S02] **A small piece may be as tiny as a bit of _____ .**

Questions 11-15 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

11. [8.3-S01] **What subject does the programme normally discuss?**

- ☐ A. Only journeys between nearby cities
- ☐ B. Travel far into outer space
- ☐ C. Methods for preserving vegetables

12. [8.3-S01] **What did the Soviets send during the first stage of near-space exploration?**

- ☐ A. A crewed mission to another star
- ☐ B. A system for measuring forest growth
- ☐ C. The first human-made object to orbit Earth

13. [8.3-S01] **Where did part of Korabi-Sputnik I land in 1962?**

- ☐ A. On a road in the central United States
- ☐ B. In a research base on the moon
- ☐ C. Inside a coral reef laboratory

14. [8.3-S01] **What fortunate detail follows the 1962 incident?**

- ☐ A. The object returned to orbit
- ☐ B. No person was struck
- ☐ C. A new crop was discovered

15. [8.3-S01] **How does the host describe present-day movement of space junk?**

- ☐ A. It circles Earth and also falls towards Earth
- ☐ B. It remains fixed above one point forever
- ☐ C. It changes the colour of volcanic rock

Listening Homework 1

Book 2 Unit 8

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

16. [8.4-S02] **What does the host say about the size of most pieces?**

- ☐ A. They are all smaller than a grain of sand
- ☐ B. They determine animal migration routes
- ☐ C. They are wider than 10 cm

17. [8.4-S02] **What can the ISS do after receiving enough warning?**

- ☐ A. Remain fixed in the path of the junk
- ☐ B. Measure changes in ocean poetry
- ☐ C. Move out of the way of the junk

18. [8.4-S03] **Why do scientists worry about large pieces colliding?**

- ☐ A. A collision could produce more fragments
- ☐ B. A collision would clean the whole area immediately
- ☐ C. A collision would improve soil quality

19. [8.4-S03] **What could happen if the amount of junk becomes too high?**

- ☐ A. All equipment would automatically repair itself
- ☐ B. Near-Earth space could become unusable for satellites
- ☐ C. Fish populations would be counted more accurately

20. [8.4-S03] **According to the host, what does RemoveDEBRIS try to do?**

- ☐ A. Catch space junk and take it away
- ☐ B. Deliberately create more fragments
- ☐ C. Reduce the price of rail tickets

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

21. [8.3-S01] **Which TWO questions does the host use to frame this episode?**

- ☐ A. How the problem began
- ☐ B. How to build a hotel on Mars
- ☐ C. How to grow vegetables on the moon
- ☐ D. What happens to objects people put into space
- ☐ E. How to train orchestral musicians

22. [8.4-S02] **Which TWO sources of space junk does the host name?**

- ☐ A. Satellites carrying out active missions
- ☐ B. Parts of old spacecraft
- ☐ C. Broken pieces of satellites
- ☐ D. New rockets before they leave Earth
- ☐ E. A collection of soup recipes

23. [8.4-S04] **Which TWO points does the host make about debris falling to Earth?**

- ☐ A. Most debris never burns on its descent
- ☐ B. All large pieces land in crowded cities
- ☐ C. The host explains how to design a bicycle
- ☐ D. Most debris burns while falling
- ☐ E. Large pieces that reach the ground usually land in rural areas

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

24. [8.4-S04] **Which TWO points does the host make about danger to people?**

- ☐ A. The person hit in 1997 was not hurt
- ☐ B. The chance of being hit on a normal day is low
- ☐ C. The 1997 case caused a serious injury
- ☐ D. Everyone outdoors is hit each week
- ☐ E. The programme compares piano styles

25. [8.4-S04] **Which TWO later practices or events are described?**

- ☐ A. The Australian object landed in a capital-city museum
- ☐ B. Agencies aim old spacecraft at crowded towns
- ☐ C. A SpaceX piece landed on an Australian sheep farm
- ☐ D. Farmers changed the genetics of wheat
- ☐ E. Agencies try to direct old spacecraft into the sea

Passage A - A New Way to Carry Astronauts

A On 30 May 2020, two NASA astronauts left Florida inside a SpaceX Crew Dragon spacecraft. Their destination was the International Space Station, not the Moon or Mars. The flight, called Demo-2, was an important **advance** in a programme that joined a **public** agency with **private** companies. NASA wanted reliable journeys to and from the station. SpaceX built and operated its own equipment, while NASA worked with the company on the requirements for carrying people safely.

B The arrangement changed the way NASA obtained a transport service. In its earlier approach, NASA owned the equipment and closely directed its development. Under Commercial Crew, companies owned and operated their systems. NASA engineers still shared their experience and checked progress. **Private** ownership did not remove the agency's safety role. The partnership was intended to **support** scientific work at the station by providing reliable transport for its crews under NASA's safety requirements.

C Tests came before regular passenger missions. A flight without astronauts, Demo-1, reached the station and returned in March 2019. Another test in January 2020 showed how the crew capsule could move away from a rocket during an emergency. Such tests helped **prove** that different parts of the system could perform their required jobs. A successful launch alone would not cover all the **conditions** of a journey. Getting home safely mattered as well as reaching orbit.

Passage A - A New Way to Carry Astronauts

D Demo-2 brought astronauts into the test programme. They launched in May and returned to Earth on 2 August 2020. Engineers then examined the flight data to inform the approval review. In November, NASA approved the SpaceX system for regular journeys with crews. That approval covered the spacecraft, rocket and associated equipment on the ground. It followed years of development and testing. Teams had also tested parachutes and practised rescuing crews in an emergency. These preparations connected the work of designers with the needs of people who would actually use the system. The review considered a **particular** transport system, rather than giving automatic permission to every spacecraft that a company might build.

E These journeys made more time available for **research** at the station, where astronauts work in an environment different from Earth's. Missions **beyond** the station needed separate work. NASA had other projects to **explore** more distant places. Commercial Crew provided a real example of a government and a company sharing responsibilities. Its history shows why announcements, test flights and approval for regular service describe different stages of a space project.

Questions 1-10 Summary completion

Write **ONE WORD** from the indicated paragraphs. Questions 1-5: **A, B**. Questions 6-10: **C, D**.

Demo-2 left **(1)** _____ on 30 May 2020. The crew travelled to the space **(2)** _____. The programme joined a government **(3)** _____ with private firms. During the transport service, private firms **(4)** _____ the systems that they owned. NASA continued to have a safety **(5)** _____ despite private ownership.

Demo-1 **(6)** _____ its destination and returned to Earth. A safety test showed that the crew capsule could move away from a **(7)** _____. Tests checked whether system parts performed their required **(8)** _____. After the crewed flight, engineers examined flight **(9)** _____ to inform the approval review. Teams also tested **(10)** _____ and practised rescuing crews.

Questions 11-15 List of Headings

Match each specified paragraph with its best heading. Tick **ONE** box. Some headings are not used.

i. From crewed test to regular approval
ii. Testing more than a successful launch
iii. Ending government safety checks
iv. Retiring every spacecraft after its first mission
v. What the programme enabled and what it did not
vi. A different ownership model
vii. A shared goal for carrying people safely

11. Choose the best heading for Paragraph A.

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

12. Choose the best heading for Paragraph B.

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

13. Choose the best heading for Paragraph C.

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

14. Choose the best heading for Paragraph D.

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

15. Choose the best heading for Paragraph E.

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question.

16. Why was the programme described as an advance?

- ☐ A. It created a public-private way to provide crew transport
- ☐ B. It replaced orbital work with ocean research
- ☐ C. It removed NASA's responsibility for transport safety

17. How did the earlier NASA approach differ?

- ☐ A. NASA owned the equipment and directed development closely
- ☐ B. Outside firms made every safety decision alone
- ☐ C. Schools selected the launch dates

18. What continued under the newer arrangement?

- ☐ A. NASA stopped reviewing company work
- ☐ B. NASA chose meals for the crew
- ☐ C. NASA shared expertise and checked progress

19. Why was a successful launch insufficient?

- ☐ A. A launch automatically approved every vehicle
- ☐ B. Safe return and escape tests also mattered
- ☐ C. The launch had to win a photography prize

20. What situation did teams practise rescuing crews for?

- ☐ A. A routine landing as planned
- ☐ B. While planning a music concert
- ☐ C. A crew emergency

Questions 21-25 Single choice

Tick **ONE** answer, A-C, for each question.

21. Whose needs did the preparations connect with designers' work?

- ☐ A. People who would use the transport system
- ☐ B. Every company that might build a spacecraft
- ☐ C. People choosing a restaurant menu

22. What did the approval cover besides the spacecraft?

- ☐ A. Associated equipment on the ground
- ☐ B. Every spacecraft a company might later build
- ☐ C. Equipment for a music concert

23. What benefit did the service provide to orbital research?

- ☐ A. A new route for city buses
- ☐ B. More astronaut time for scientific work
- ☐ C. A guarantee that every future spacecraft was approved

24. What does the passage say about missions to more distant places?

- ☐ A. They depended on a local weather forecast
- ☐ B. The transport programme completed every distant-space plan
- ☐ C. They needed separate work beyond these journeys

25. What does the history show about project stages?

- ☐ A. One announcement proves regular service is ready
- ☐ B. Announcements, tests and regular approval are different stages
- ☐ C. Every project begins with a museum exhibition

Speaking Homework 1

Book 2 Unit 8

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "If I had".
a telescope,, I would, If I had, look at the stars

2. Start with "We need".
a solution, We need, to this problem

3. Start with "If the sky were clear,".
the moon, we could, observe, If the sky were clear,

4. Start with "An expert".
could help us, understand, the equipment, An expert

5. Start with "If we had more time,".
the exhibition, we would, If we had more time,, visit

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Imagine you owned a telescope. Choose would or did.

Friend: What would you do with it?

You: I _____ look at the moon.

7. Situation: You need a way to fix a problem. Choose effect or solution.

Friend: What are you looking for?

You: A _____ to the problem.

8. Situation: Your group does not have enough money now. Imagine a different situation at present. Choose had or have.

Friend: Would you visit the observatory?

You: Yes, if we _____ more money.

9. Situation: You want help from someone who knows the equipment. Choose expert or problem.

Friend: Who could explain this telescope?

You: We could ask an _____.

10. Situation: The first plan is impossible. Choose opinion or alternative.

Friend: What do we need now?

You: We need an _____ plan.

Speaking Homework 1

Book 2 Unit 8

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Explain a problem with observing the sky.

Opening: We had a difficulty at the viewing session.

A	Because of those clouds, we could not see the stars.
B	We decided to try again on another evening.
C	Clouds covered the sky.

12. Suggest help with equipment.

Opening: I would ask someone before using it.

A	Nobody in the group knows how to set it up.
B	To help with that setup problem, an expert could show us how.
C	Our group has a new telescope.

13. Explain a plan.

Opening: I would like to try a different kind of visit.

A	The town has a small planetarium.
B	If we had time, we could attend that show.
C	It offers a short show for beginners.

14. Describe a group problem.

Opening: We need everyone to have a turn.

A	Several students are waiting to use it.
B	We could give each of those students a short time slot.
C	Only one telescope is available.

15. Explain a choice of activity.

Opening: A model could help us understand the idea.

A	A simple model could show those parts clearly.
B	The class is studying a space station.
C	Its different parts are difficult to imagine from a description.

Speaking Homework 1

Book 2 Unit 8

Questions 16-18 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write key words, then record your answer.

16. Imagine you had a telescope. Explain how you would use it and where.

Model: If I had a telescope, I would observe the moon. I would set it up with an adult. We could use an open area near home.

17. Describe a problem at an astronomy club and one solution.

Model: The club has only one telescope. Students wait a long time for a turn. A timetable could help them share it.

18. Imagine your class could visit a space exhibition. Explain one choice.

Model: If our class visited the exhibition, I would choose the model room. I enjoy seeing how objects fit together. I would take notes about one model.

Speaking Homework 1

Book 2 Unit 8

Questions 19-20 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write key words, then record your answer.

19. Suggest an alternative when an outdoor space activity cannot happen.

Model: If clouds covered the sky, we could use star photographs indoors. We could identify shapes in the pictures. The activity would still help us learn.

20. Explain one question you would ask a space expert and why.

Model: If I met an expert, I would ask how a telescope works. I have never used one. A simple explanation would help me begin.

Speaking Homework 1

Book 2 Unit 8

Questions 21-22 Describe the picture

Write key words, then record 2-3 sentences for each question. Use the words if helpful.

Words: explore, planet, expert

21. Describe the learner and the equipment.

Words: expert, explore, option

22. Imagine you could join this activity. Say what you would ask an expert.

Speaking Homework 1

Book 2 Unit 8

Questions 23-25 Describe the picture

Write key words, then record 2-3 sentences for each question. Use the words if helpful.

Words: planet, surface, explore

23. Describe the students and their classroom model.

Words: problem, solution, expert

24. Imagine one part of this model is difficult to understand. Suggest a solution.

Words: alternative, planet, explore

25. Suggest another way to learn about the objects represented by this model.

Writing Homework 1

Book 2 Unit 8

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "The report".

space project, The report, describes, the school

2. Start with "The evidence".

this explanation, supports, The evidence

3. Start with "Some students".

the visit is useful, believe, Some students

4. Start with "The results".

The results, a possible answer, suggest

5. Start with "We need".

carefully, to study, We need, the question

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose evident or evidence.

We need more _____ before reaching a conclusion.

7. Choose suggestion or suggests.

The report _____ a possible explanation.

8. Choose believe or belief.

Some students _____ the exhibition is useful.

9. Choose supports or support.

This example _____ the main point.

10. Choose reporter or report. This word means the written account.

The class wrote a _____ about its project.

Writing Homework 1

Book 2 Unit 8

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order an account of a classroom investigation.

A One of those designs stood upright more easily.
B The class tested two model designs.
C That result supported the choice of a wider base.

☐ B-A-C ☐ A-C-B ☐ B-C-A

12. Order a report of an opinion.

A She believes the models will help beginners.
B Her reason explains why she prefers that visit.
C Mia supports the museum visit.

☐ C-A-B ☐ B-C-A ☐ C-B-A

13. Order an evidence check.

A That claim needed supporting evidence.
B The students therefore tested the model before presenting it.
C The group made a claim about its telescope model.

☐ A-B-C ☐ C-B-A ☐ C-A-B

14. Order a short project account.

A The report helped the class decide what to improve.
B Their answers were collected in a report.
C Students asked visitors about the display.

☐ B-C-A ☐ A-C-B ☐ C-B-A

15. Order a cautious conclusion.

A More feedback would be needed before judging the activity for a whole class.
B That small group liked the instructions.
C Only three students tested the activity.

☐ B-A-C ☐ C-B-A ☐ C-A-B

Questions 16-18 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write your own answer with different details.

16. Notes: four classmates preferred a model to a poster. Report the result without claiming everyone agrees.

Model: In our practice survey, six students preferred photographs. This result suggests that photographs may interest this group. It does not show what every student prefers.

17. Describe a class project and one kind of evidence the group could collect.

Model: Our group could test two model stands. We could record how long each one stays upright. The results could support our choice of design.

18. Report a student's opinion about a space activity and give the reason.

Model: Lena believes the telescope demonstration is useful. She wants to understand the equipment. That is why she supports the activity.

Writing Homework 1

Book 2 Unit 8

Questions 19-20 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write your own answer with different details.

19. Explain why one observation is not enough for a broad conclusion. Use evidence.

Model: One visitor liked our display. This is useful feedback. However, it is not enough evidence to show that all visitors will like it.

20. Describe one question your group could study at an exhibition.

Model: We could study which display visitors choose first. We could record their first stop. This information might help the museum plan its entrance area.

Writing Homework 1

Book 2 Unit 8

Questions 21-22 Describe the picture

Write 2-3 sentences for each question. Use the words if helpful.

Words: study, explore, particular

21. Describe the teacher, students and models.

Words: study, research, evidence

22. Write one question a student could investigate using these learning materials.

Writing Homework 1

Book 2 Unit 8

Questions 23-25 Describe the picture

Write 2-3 sentences for each question. Use the words if helpful.

Words: study, report, research

23. Describe the student's activity and materials.

Words: report, research, wonder

24. Suggest what the notebook could be used for.

Words: evidence, support, study

25. Explain why the photograph could support her study.
