Listening Homework 2

Book 2 Unit 8

Questions 1-5 Sentence completion

Write **ONE WORD, ONE NUMBER, OR ONE OF EACH** from the indicated SHORT audio. Do not add % where it is printed.

1. [8.3-S01] **Going into space is the usual topic of the _____, rather than this episode about junk.**

2. [8.3-S01] **The host says Sputnik 1 produced the first _____, before adding 'or junk'.**

3. [8.3-S01] **Part of Korabi-Sputnik I fell in the middle of a _____.**

4. [8.3-S01] **Fortunately, the piece did not hit _____.**

5. [8.3-S01] **Modern space junk comes from many _____.**

Listening Homework 2

Book 2 Unit 8

Questions 6-10 Sentence completion

Write **ONE WORD, ONE NUMBER, OR ONE OF EACH** from the indicated SHORT audio. Do not add % where it is printed.

6. [8.4-S02] **The host gives a total of 'over _____ pieces of space junk'.**

7. [8.4-S02] **Most pieces are more than 10 _____ across.**

8. [8.4-S03] **Scientists worry that large pieces could hit each other and _____ .**

9. [8.4-S03] **Too much junk could stop people using near-Earth space for _____ .**

10. [8.4-S04] **Agencies try to make old spacecraft fall in the _____ .**

Listening Homework 2

Book 2 Unit 8

Questions 11-15 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

11. [8.3-S01] **What happened to Sputnik 1 three months after launch?**

- ☐ A. It continued working without interruption
- ☐ B. It became a map of desert flowers
- ☐ C. It stopped working

12. [8.3-S01] **What did the Soviets send into space in 1957?**

- ☐ A. A first human-made satellite
- ☐ B. A spacecraft carrying astronauts
- ☐ C. A submarine full of seaweed

13. [8.3-S01] **Why did the first satellite fail to reach the ground?**

- ☐ A. It was collected by a British mission
- ☐ B. It was destroyed during its descent
- ☐ C. It dissolved in a freshwater lake

14. [8.3-S01] **What effect can modern space junk have on space programmes?**

- ☐ A. It has permanently ended all space travel
- ☐ B. It improves the flavour of food
- ☐ C. It can affect space programmes and cause accidents

15. [8.4-S02] **What movement feature makes space junk dangerous?**

- ☐ A. A perfectly fixed position
- ☐ B. Movement above 25,000 km per hour
- ☐ C. A method for teaching handwriting

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

16. [8.4-S02] **What role does NASA have in the account?**

- ☐ A. It monitors where the junk is
- ☐ B. It manufactures every old spacecraft
- ☐ C. It records whale songs

17. [8.4-S02] **What allows the ISS to move away from danger?**

- ☐ A. Receiving enough advance warning
- ☐ B. Changing its colour
- ☐ C. Measuring mountain rainfall

18. [8.4-S02] **What comparison is used for one of the smallest pieces?**

- ☐ A. A complete passenger aircraft
- ☐ B. A newly planted forest
- ☐ C. A tiny bit of coating

19. [8.4-S02] **What can happen if fast-moving space junk hits something?**

- ☐ A. The object will always repair itself
- ☐ B. It can cause serious damage
- ☐ C. A map of desert flowers is produced

20. [8.4-S04] **Why is the chance of a person being hit usually low?**

- ☐ A. Most junk is consumed while descending
- ☐ B. All falling objects turn into water
- ☐ C. City traffic blocks every fragment

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

21. [8.4-S02] **Which TWO sources of space junk are named?**

- ☐ A. Parts of old spacecraft
- ☐ B. Only brand-new launch fuel
- ☐ C. Damaged equipment already sent around Earth
- ☐ D. Natural clouds made of water
- ☐ E. Pieces of traditional musical instruments

22. [8.3-S01] **Which TWO questions does the host use to introduce this episode?**

- ☐ A. How to build a new weather satellite
- ☐ B. How the space junk problem first started
- ☐ C. Whether junk can power the ISS
- ☐ D. How to improve soil fertility
- ☐ E. What happens to objects people put into space

23. [8.4-S03] **According to the host, which TWO actions are proposed for RemoveDEBRIS?**

- ☐ A. Catch pieces of space junk
- ☐ B. Turn the junk into new satellites
- ☐ C. Leave all the junk in place
- ☐ D. Take space junk away
- ☐ E. Breed fish for rivers

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

24. [8.4-S04] **Which TWO facts are stated about objects reaching Earth?**

- ☐ A. The 1997 event caused a serious injury
- ☐ B. A person struck in 1997 was unharmed
- ☐ C. Other large pieces usually land in rural areas
- ☐ D. Every large piece lands in a city centre
- ☐ E. The events changed classical dance

25. [8.4-S04] **Which TWO details describe the 2022 event?**

- ☐ A. It came from an ancient wooden boat
- ☐ B. It landed inside a crowded stadium
- ☐ C. It demonstrated a new medical treatment
- ☐ D. The object came from a SpaceX spacecraft
- ☐ E. It landed on an Australian sheep farm

Passage B - When a Space Delivery Comes Back

A On 15 April 2023, a spacecraft splashed down off Florida with experiments and other cargo from the International Space Station. Researchers planned to examine samples before Earth's gravity fully affected them. There were no people inside this cargo Dragon. Its return gave scientists on Earth materials they could **study** after work in orbit. A space delivery was therefore a journey in two directions. Taking supplies up was important, but bringing results down also served a **particular** purpose.

B One returning experiment concerned tomatoes grown in the station's small greenhouse. Astronauts had collected three harvests and frozen tomatoes, water samples and samples taken from the growing equipment. Researchers wanted to examine how light and fertilizer affected the crops. The **conditions** of growing plants in space mattered for future long journeys. This work went **beyond** the simple question of whether a seed could grow. It also concerned the quality and safety of food for people.

C Other materials addressed different problems. Blood samples returned from an investigation of changes in astronauts' blood vessels. Samples from a fire experiment were also on board. That experiment examined how flames grow and go out in very weak gravity. NASA's **report** described possible uses for this work, including safer materials inside spacecraft. The aim was to **support** better decisions about safety, rather than to assume that every material behaved in space exactly as it did on Earth. NASA also described possible benefits for people on Earth. Investigating changes in blood vessels, for example, could help researchers understand health problems connected with growing older, as well as space travel.

Passage B - When a Space Delivery Comes Back

D Not every cargo vehicle makes the same return journey. In its September 2026 review of commercial transport, NASA's independent inspector described Dragon and Cygnus. Both had carried supplies to the station. Dragon could return cargo to Earth, while Cygnus was designed to burn up when it entered the atmosphere again. Their different designs meant that they could not exchange every job. The word delivery described a shared activity, but it did not describe the whole service.

E NASA bought these transport services from **private** companies, and the returning materials became part of scientific **research**. People may **wonder** why a physical sample is valuable when a spacecraft can already send measurements. Different methods provide different kinds of **evidence**. The April 2023 mission brought samples that researchers could examine on Earth. Its story connects the work in an orbiting laboratory with further investigation on the ground, rather than ending at the moment a rocket takes off.

Questions 1-5 True, False, Not Given

TRUE: agrees with the passage. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

1. The April 2023 spacecraft carried people back to Earth.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

2. The mission returned experiments and other cargo from orbit.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

3. The returned cargo weighed exactly 400 kilograms.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

4. Researchers wanted to examine how light and fertilizer affected tomatoes.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

5. The tomatoes were the first plants ever grown in orbit.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 6-10 True, False, Not Given

TRUE: agrees with the passage. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

6. The article says research should assume every material behaves the same in space and on Earth.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

7. Exactly six astronauts supplied the returned blood samples.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

8. Dragon and Cygnus could perform every return task in the same way.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

9. Cygnus was designed to burn up during re-entry.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

10. Scientists can obtain different evidence from physical samples and transmitted measurements.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 11-15 Matching information

Which paragraph contains each piece of information? Tick **ONE** box. You may use a letter more than once.

11. says a shared activity name does not describe the whole service

☐ A ☐ B ☐ C ☐ D ☐ E

12. explains a possible benefit for ageing-related health research

☐ A ☐ B ☐ C ☐ D ☐ E

13. considers the quality and safety of food for long journeys

☐ A ☐ B ☐ C ☐ D ☐ E

14. mentions an independent review of commercial transport

☐ A ☐ B ☐ C ☐ D ☐ E

15. reports where the returning spacecraft landed

☐ A ☐ B ☐ C ☐ D ☐ E

Questions 16-20 Matching information

Which paragraph contains each piece of information? Tick **ONE** box. You may use a letter more than once.

16. links orbital laboratory work with later investigation on the ground

☐ A ☐ B ☐ C ☐ D ☐ E

17. asks why physical material is useful when measurements can be sent

☐ A ☐ B ☐ C ☐ D ☐ E

18. mentions three harvests from a station greenhouse

☐ A ☐ B ☐ C ☐ D ☐ E

19. mentions samples taken from plant-growing equipment

☐ A ☐ B ☐ C ☐ D ☐ E

20. mentions plans to examine samples before gravity fully affects them

☐ A ☐ B ☐ C ☐ D ☐ E

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question.

21. Which TWO materials returned from the greenhouse experiment?

- ☐ A. Frozen tomatoes
- ☐ B. A football league table
- ☐ C. Water samples
- ☐ D. A navigation map
- ☐ E. A crew uniform

22. Which TWO investigations are described in paragraph C?

- ☐ A. The colour of distant galaxies
- ☐ B. Changes in blood vessels
- ☐ C. Passenger meal preferences
- ☐ D. Fire behaviour in weak gravity
- ☐ E. Street traffic near NASA

23. Which TWO statements describe the compared cargo vehicles?

- ☐ A. The vehicles improved a city bus timetable
- ☐ B. Both had carried supplies to the station
- ☐ C. Both returned all cargo intact
- ☐ D. Both carried passengers on this mission
- ☐ E. Dragon could bring material back to Earth

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question.

24. Which TWO details about the transport service appear in paragraph E?

- ☐ A. It operated a city bus route
- ☐ B. The mission ended before materials reached the ground
- ☐ C. NASA bought the service from private companies
- ☐ D. Returned materials became part of scientific research
- ☐ E. Companies chose every scientific conclusion alone

25. Which TWO broader ideas does paragraph A emphasize about space delivery?

- ☐ A. A delivery journey can work in two directions
- ☐ B. Taking supplies upward is unimportant
- ☐ C. Every delivery vehicle performs the same return job
- ☐ D. The mission improved a city road network
- ☐ E. Bringing results down serves a particular purpose

Speaking Homework 2

Book 2 Unit 8

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "If our club had".
get a turn, If our club had, everyone could, more equipment,

2. Start with "We could".
solutions, We could, evaluate, two possible

3. Start with "If the visit cost less,".
join us, If the visit cost less,, more students would

4. Start with "The new plan".
an alternative, offers, The new plan, to the trip

5. Start with "If I were".
I would, the group leader,, If I were, ask for suggestions

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Imagine the club had two telescopes. Choose can or could.

Friend: How would a second telescope help?

You: If the club had two telescopes, more students _____ observe at once.

7. Situation: You want to compare two plans carefully. Choose evaluate or interrupt.

Friend: What should we do before deciding?

You: We should _____ both plans.

8. Situation: The ticket is too expensive now. Imagine that its present price were lower. Choose were or is.

Friend: Would more students visit?

You: They might if the ticket _____ cheaper.

9. Situation: You need another option if it rains. Choose expert or alternative.

Friend: What is the indoor activity for?

You: It is an _____ to outdoor viewing.

10. Situation: Imagine you led the group. Choose would or was.

Friend: How would you choose the activity?

You: I _____ ask everyone for a suggestion.

Speaking Homework 2

Book 2 Unit 8

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Explain an equipment solution.

Opening: Sharing the equipment needs a little planning.

A	To avoid that slow queue, short booking slots could give each student a turn.
B	That number would make an open queue slow.
C	Eight students want to use one telescope.

12. Compare travel options.

Opening: The nearest exhibition is still some distance away.

A	The group could travel there by train.
B	An online tour would be a cheaper alternative.
C	However, the train tickets would use most of the budget.

13. Explain a way to simplify instructions.

Opening: New members should be able to begin confidently.

A	To clarify those confusing words, a picture guide could explain the first steps more clearly.
B	Those words confuse students who are just starting.
C	The equipment guide contains many technical words.

14. Describe a choice for younger visitors.

Opening: We should think about the age of our audience.

A	A short demonstration could be a better choice for them.
B	Young visitors may struggle to follow that lecture.
C	The museum’s long lecture is designed for adults.

15. Explain a backup plan.

Opening: We cannot control the weather on the day.

A	A room with sky photographs would provide an indoor alternative.
B	The planned viewing session is outdoors.
C	Rain could prevent that session from taking place.

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

16. An astronomy club has one telescope and a long queue. Suggest two solutions using conditionals.

Model: If the club borrowed another telescope, more people could observe. If it used booking slots, each person would know their turn. Borrowing equipment might take time to arrange. I would try the timetable first.

17. Explain what you would change about an exhibition for younger visitors. Include a reason and limitation.

Model: If I designed the exhibition, I would add simple models. Children could examine the different parts. The models would need clear labels. Some ideas would still require an explanation from a guide.

18. Compare a trip with an indoor alternative. Explain which you would choose.

Model: A trip would let us see the real telescope. However, travel would take most of the day. An online tour could fit into one lesson. I would choose the tour for our short session.

Speaking Homework 2

Book 2 Unit 8

Questions 19-20 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

19. Suggest how to help beginners use unfamiliar astronomy vocabulary. Use a second conditional.

Model: If the guide used pictures, beginners could connect words with objects. Short definitions would also help. Students could make their own picture cards. The teacher could check the cards afterwards.

20. Describe a role at a space event and how you would solve one problem.

Model: If I led the welcome desk, I would give visitors a simple map. Some visitors might not know where to start. I would mark a short route for beginners. They could explore other rooms later.

Speaking Homework 2

Book 2 Unit 8

Questions 21-22 Describe the picture

Write key words, then record 3 connected sentences for each question. Use the words if helpful.

Words: expert, explore, option

21. Describe the person and suggest what he may be preparing.

Words: alternative, expert, solution

22. Imagine clouds stop the planned viewing. Propose an alternative and explain it.

Speaking Homework 2

Book 2 Unit 8

Questions 23-25 Describe the picture

Write key words, then record 3 connected sentences for each question. Use the words if helpful.

Words: explore, planet, issue

23. Describe how the group is using the chart.

Words: problem, expert, solution

24. Imagine the group cannot understand part of the chart. Suggest how to solve the problem.

Words: issue, explore, option

25. Imagine you led this group. Explain how you would include everyone.

Writing Homework 2

Book 2 Unit 8

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "The survey".

about visitor preferences, evidence, The survey, provides

2. Start with "These results".

support, These results, the group’s, suggestion

3. Start with "Some visitors".

believe, Some visitors, the labels need changes

4. Start with "The report".

demonstration, suggests, a shorter, The report

5. Start with "A single example".

A single example, does not prove, claim, a general

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose prove or evidence.

The survey provides _____ about these visitors.

7. Choose suggest or suggestion.

The practice results _____ a possible improvement.

8. Choose support or supports.

These observations _____ our recommendation.

9. Choose researcher or research. This is the activity of studying a question.

The students planned a small _____ project.

10. Choose proof or proves.

One successful attempt _____ very little about every future attempt.

Writing Homework 2

Book 2 Unit 8

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a survey account.

A	The group asked ten visitors to choose a display.
B	That result suggests the model was popular within this small group.
C	Seven of those visitors chose the model.

☐ B-C-A ☐ A-C-B ☐ B-A-C

12. Order a test of instructions.

A	Students made fewer mistakes with the second card.
B	The class compared two instruction cards.
C	This result supports using that clearer version.

☐ C-B-A ☐ B-C-A ☐ B-A-C

13. Order a discussion of limited evidence.

A	Their experience may have made the activity easier for them.
B	The club asked only its experienced members for feedback.
C	To address that possible advantage, the club should also ask beginners before judging the instructions.

☐ C-B-A ☐ A-C-B ☐ B-A-C

14. Order a project improvement.

A	Several visitors asked what a label meant.
B	The group rewrote it in simpler language.
C	Those repeated questions suggested that the label was unclear.

☐ A-C-B ☐ C-B-A ☐ C-A-B

15. Order a claim and a test.

A	The group believed a wider base would support the model better.
B	The wider base stayed upright in more of the practice tests.
C	It tested that idea with two different bases.

☐ B-A-C ☐ C-B-A ☐ A-C-B

Writing Homework 2

Book 2 Unit 8

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write your own answer with different details.

16. Survey: ten visitors. Seven chose models, three chose posters. Report and interpret cautiously.

Model: Eight students tested two guides. Six preferred the guide with pictures. The results suggest that most of this small group preferred the guide with pictures. A larger group might give different results.

17. Suggest a small investigation of a space-learning activity. Explain the evidence you would collect.

Model: The group could compare two telescope instruction cards. Students could follow each card in turn. The group could record where they ask for help. Those questions would provide evidence about unclear steps.

18. Respond to this claim: “One student enjoyed the talk, so everyone will enjoy it.” Explain the limitation.

Model: One student completed the model quickly. That does not prove that the task is easy for everyone. Other students may need different support. The class should collect more evidence before deciding.

Questions 19-20 Follow the model

Use the model to help you express different content in 4 connected sentences. Write your own answer with different details.

19. Feedback: visitors repeatedly asked how to start a model activity. Suggest a change supported by the feedback.

Model: Several beginners asked what the telescope labels meant. Their questions suggest that the vocabulary was unclear. The club could add simple definitions. It could then ask new visitors whether the changes help.

20. Report two student opinions about an astronomy activity without presenting either as a fact.

Model: Anna believes a live demonstration would be best. She likes asking questions during an explanation. Ben prefers a video because he can watch it again. Their views show two different learning preferences.

Writing Homework 2

Book 2 Unit 8

Questions 21-22 Describe the picture

Write 3 connected sentences for each question. Use the words if helpful.

Words: research, report, study

21. Describe how the student is working with information.

Words: evidence, report, research

22. Suggest a way to check information before including it in a report.

Writing Homework 2

Book 2 Unit 8

Questions 23-25 Describe the picture

Write 3 connected sentences for each question. Use the words if helpful.

Words: study, explore, particular

23. Describe the discussion and the materials the group is using.

Words: evidence, report, support

24. Imagine the group is choosing a photograph for a report. Explain how evidence could guide its choice.

Words: particular, research, support

25. Explain why these pictures alone cannot answer every question about space research.
