Listening Homework 3

Book 3 Unit 1

Questions 1-7 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

1. [1.2-L01] **The lecture says that African forest elephants are larger than savanna elephants.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

2. [1.2-L01] **The speaker says both species of African elephants are endangered.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

3. [1.2-L01] **Poachers hunt forest elephants for their tusks.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

4. [1.2-L01] **The lecture says ivory is legal when it is sold for profit.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

5. [1.2-L01] **The international ivory trade was banned in 1989.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

6. [1.2-L01] **All countries have stopped cross-border ivory sales.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

7. [1.2-L01] **Farming has destroyed exactly half of the elephants' rainforest habitat.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 8-11 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

8. [1.2-L02] **Elephants always remain in rainforests despite habitat loss.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

9. [1.2-L02] **The proposed fences would protect communities' land.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

10. [1.2-L02] **The speaker says the illegal ivory trade is not a threat to forest elephants.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

11. [1.2-L02] **The speaker argues that cross-border ivory sales should continue.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 12-15 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

12. [1.2-L02] **Every government will introduce the proposed ban within six months.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

13. [1.2-L02] **The proposed protective fences will be made from metal.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

14. [1.2-L02] **The speaker says communities should build fences without any help.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

15. [1.2-L02] **The speaker says environmental organizations should delay action for several years.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 16-20 Matching information

Which LONG audio contains each piece of information? Tick **ONE** box. You may use a code more than once.

16. The speaker thanks the students for coming.

☐ 1.2-L01 ☐ 1.2-L02

17. Rhinos, orangutans, and sea turtles are examples of disappearing animals.

☐ 1.2-L01 ☐ 1.2-L02

18. Some local people kill elephants to protect their homes.

☐ 1.2-L01 ☐ 1.2-L02

19. Intelligent, majestic, and powerful are qualities linked with African elephants.

☐ 1.2-L01 ☐ 1.2-L02

20. Without a ban, the speaker warns that the African forest elephant may soon become extinct.

☐ 1.2-L01 ☐ 1.2-L02

Questions 21-25 Matching information

Which LONG audio contains each piece of information? Tick **ONE** box. You may use a code more than once.

21. More specially trained guards are needed to catch poachers.

☐ 1.2-L01 ☐ 1.2-L02

22. Around five million elephants lived across Africa a century ago.

☐ 1.2-L01 ☐ 1.2-L02

23. The speaker estimates fewer than 500,000 African elephants remain today.

☐ 1.2-L01 ☐ 1.2-L02

24. The speaker says it may not be too late to save the forest elephant.

☐ 1.2-L01 ☐ 1.2-L02

25. The elephants' survival food must be shared among the same number of elephants.

☐ 1.2-L01 ☐ 1.2-L02

Passage C - Protecting Red Squirrels in Working Woodlands

A Red squirrels are a native **species** in England, but their distribution is now limited. Most are found in the north, although some island populations also remain. Woodland areas known as red-squirrel strongholds have received special conservation attention. Protecting this **endangered** animal involves more than keeping individual squirrels safe. A forest plan must consider the places they use for food and shelter, as well as the work that people carry out there. The Forestry Commission provides advice to help woodland managers **protect** these animals during forestry operations.

B Trees **provide** several important resources. Their seeds are food, their branches offer routes through a wood, and older trees may have holes used as nesting places. Squirrels also make nests among branches. They spend much of their time above the ground, moving through the tree canopy. They come down to the ground to find or bury food and to cross open areas. **Natural** connections between neighbouring areas therefore matter. A small wood connected to other suitable areas can offer more useful habitat than an isolated patch. Forest managers need to consider both the trees inside a wood and the routes linking it to nearby woodland.

C Grey squirrels create a different set of problems. They compete with red squirrels for food and can carry squirrelpox. This **disease** can be fatal to red squirrels without having the same effect on greys. Grey squirrels also **damage** trees by removing bark. The resulting wounds can weaken trees or allow rot to develop. These problems **affect** both conservation and the production of healthy timber. Managers therefore need to consider animal populations and tree health together when deciding how to care for a working forest.

Passage C - Protecting Red Squirrels in Working Woodlands

D Reliable information is needed before trees are cut. Managers can check existing local records, then survey the areas where work is planned. Searching only for nests is insufficient because nests can be difficult to see. Feeding signs and sightings **provide** additional evidence of squirrels. Woodland owners can **cooperate** with local squirrel groups, which offer advice and support. Survey equipment also needs careful cleaning when its use might bring red and grey squirrels into contact. This helps reduce the risk of passing infection between the animals during monitoring.

E The guidance connects these observations with practical action. Managers should check the site shortly before work starts and mark trees containing red-squirrel nests. They should leave those trees standing and consider keeping nearby trees and connections between branches. Avoiding large-scale tree cutting during the breeding season helps **protect** young squirrels, which are usually present from February to September. If workers discover an active nest, they should stop, leave its tree standing and consider moving or delaying the operation. Recording what happened helps managers review their decisions and improve conditions in which red squirrels can **survive**.

Reading Homework 3

Book 3 Unit 1

Questions 1-10 Summary completion

Write **ONE WORD** from the indicated paragraphs. Questions 1-5: **A, B**. Questions 6-10: **C, D**.

Most red squirrels in England are found in the **(1)** _____ . Some island populations also **(2)** _____ . Certain woodland areas called red-squirrel **(3)** _____ have received conservation attention. Forestry Commission advice helps managers **(4)** _____ the animals during forestry operations. The tree parts eaten as food are **(5)** _____ .

Grey squirrels can spread the squirrelpox **(6)** _____ and damage trees by removing **(7)** _____ . Before surveying woodland, managers can check local **(8)** _____ that already exist. Local squirrel **(9)** _____ can offer woodland owners advice and support. They should also clean survey **(10)** _____ when it could bring the two kinds of squirrel into contact.

Questions 11-15 List of Headings

Match each specified paragraph with its best heading. Tick **ONE** box. Some headings are not used.

i. Current locations and the role of forest plans

ii. How timber is sold to overseas buyers

iii. Problems caused by grey squirrels

iv. Collecting information before forestry work

v. Food, shelter and links between woods

vi. Practical steps while planning and cutting trees

vii. Replacing woodland with island farms

11. Paragraph A

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

12. Paragraph B

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

13. Paragraph C

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

14. Paragraph D

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

15. Paragraph E

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question.

16. What should a forest plan also consider?

- ☐ A. Passenger seats on a flight
- ☐ B. Places squirrels use and work people do there
- ☐ C. Only the safety of individual squirrels

17. Why can a connected small wood be useful?

- ☐ A. It always produces more timber than a large forest
- ☐ B. It gives visitors a cheaper train ticket
- ☐ C. It can link squirrels to other suitable habitat

18. What do red squirrels use tree branches for?

- ☐ A. Making the branches grow longer
- ☐ B. Routes through the woodland
- ☐ C. Measuring rainfall in a weather station

19. How does squirrelpox affect the two types of squirrel?

- ☐ A. It can be fatal to reds without affecting greys in the same way
- ☐ B. It affects both in exactly the same way
- ☐ C. It changes the colour of a computer screen

20. What can happen after grey squirrels strip material from a tree?

- ☐ A. The forest receives free bus services
- ☐ B. The tree immediately grows new leaves
- ☐ C. Wounds can allow rot to develop

Questions 21-25 Single choice

Tick **ONE** answer, A-C, for each question.

21. Why is searching only for nests insufficient?

- ☐ A. Nests can be difficult to see
- ☐ B. Feeding signs cannot reveal anything
- ☐ C. A ticket office closes before the survey

22. When should managers check a site again?

- ☐ A. When the football season finishes
- ☐ B. Shortly before forestry work begins
- ☐ C. Only after every tree has been removed

23. Why avoid large-scale cutting during the breeding season?

- ☐ A. To help reduce risks to young squirrels
- ☐ B. To improve the sound of a music recording
- ☐ C. To prevent every future illness in the population

24. What should workers do if they discover an active red-squirrel nest?

- ☐ A. Submit a school lunch order
- ☐ B. Move the nest into a different tree without checking
- ☐ C. Stop and leave its tree standing

25. Why should managers record an incident involving squirrels?

- ☐ A. To help review decisions and improve conditions
- ☐ B. To avoid doing any further site checks
- ☐ C. To calculate a shop discount

Speaking Homework 3

Book 3 Unit 1

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "First,".
I, First,, will explain, the main threat to sea turtles

2. Start with "Second,".
a possible solution for the community, Second,, I will, describe

3. Start with "To summarize,".
To summarize,, people need to cooperate, this species, to protect

4. Start with "Although".
an important role, it plays, the animal is dangerous,, Although

5. Start with "The audience".
The audience, and practical advice, needs clear examples

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: You are helping a friend begin a talk for children. Choose explain or hide.

Friend: What should I say about the turtles first?

You: You could _____ why they need a safe beach.

7. Situation: Your friend has finished the main points of a wildlife talk. Choose interrupt or summarize.

Friend: How can I finish my talk clearly?

You: You could _____ the main ways people can help.

8. Situation: Your friend is preparing a talk for researchers. Choose guesses or evidence.

Friend: What should I include to support my claims?

You: Use clear facts and reliable _____.

9. Situation: A classmate wants listeners to take action. Choose advice or weather.

Friend: What could I add at the end?

You: You could give some practical _____.

10. Situation: Your friend thinks sharks have no value because some are dangerous. Choose role or price.

Friend: Why should we care about sharks?

You: They play an important _____ in ocean life.

Speaking Homework 3

Book 3 Unit 1

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Arrange the ideas for a short wildlife talk.

Opening: A quiet beach matters to these animals.

A	Sea turtles lay their eggs on beaches.
B	We can reduce this danger by taking our litter home.
C	Rubbish on those beaches can harm the turtles.

12. Arrange the ideas for a short wildlife talk.

Opening: Rangers can help with one serious threat.

A	In response to the poaching just described, trained guards patrol protected areas.
B	Poaching is a serious threat to rhinos.
C	Their patrols may help them notice illegal hunting.

13. Arrange the ideas for a short wildlife talk.

Opening: We could start by looking after our own river.

A	Pollution is making the water unsafe for those fish.
B	Our river is home to several fish species.
C	We could help reduce this pollution by organizing a clean-up.

14. Arrange the ideas for a short wildlife talk.

Opening: There is more to sharks than their dangerous reputation.

A	Protecting these food chains is one reason to care about sharks.
B	This feeding behaviour helps shape ocean food chains.
C	Many sharks feed on other sea animals.

15. Arrange the ideas for a short wildlife talk.

Opening: Small actions are easier when we work together.

A	Working together may make those actions more effective.
B	Animals need safe habitats and clean water.
C	To protect these things, local people can reduce pollution and report illegal hunting.

Speaking Homework 3

Book 3 Unit 1

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

16. Prepare a 4-5 sentence talk for children about protecting sea turtles. Include first and to summarize.

Model: First, sea turtles need clean beaches for their eggs. Plastic can harm young turtles. We should put rubbish in bins near the beach. To summarize, clean beaches can help turtles survive.

17. Give a 4-5 sentence community presentation about one threat to a local animal. Include a solution.

Model: First, the frogs in our pond are threatened by dirty water. Rubbish and chemicals damage their habitat. We could organize a monthly clean-up. To summarize, cleaner water may help the frogs survive.

18. Explain how you would change a wildlife talk for children and scientists.

Model: Children need simple examples, such as a turtle caught in plastic. Scientists need evidence about the number of turtles affected. Both audiences need a clear main message. I would ask each group to help in an appropriate way.

Speaking Homework 3

Book 3 Unit 1

Questions 19-20 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

19. Deliver a 4-5 sentence balanced statement about sharks. Use although.

Model: Although sharks can be dangerous, they play an important role in the ocean. They eat weak or dead animals. This helps keep food chains healthy. People should protect shark species that are threatened.

20. Make a 4-5 sentence closing appeal about stopping poaching.

Model: To summarize, poaching threatens many endangered animals. Guards need support to protect them. Governments should ban illegal wildlife trade. Communities can report suspicious activity. Together, these actions may save species.

Speaking Homework 3

Book 3 Unit 1

Questions 21-22 Describe the picture

Write key words, then record one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: species, suffer, habitat

21. Imagine the teacher is speaking to children. Give a simple opening for her talk.

Words: depend on, support, endangered

22. Suggest a short ending for the children's wildlife talk.

Speaking Homework 3

Book 3 Unit 1

Questions 23-25 Describe the picture

Write key words, then record one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: habitat, species, threat

23. Imagine the scientist and ranger are preparing a talk. Say what evidence they could use.

Words: habitat, protect, support

24. Explain how the ranger could adapt the same message for local families.

Words: depend on, damage, support

25. Give a 3-4 sentence closing appeal based on this research scene.

Writing Homework 3

Book 3 Unit 1

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "Whale sharks and tiger sharks".

in several ways, are similar, Whale sharks and tiger sharks

2. Start with "In contrast,".

are very different, In contrast,, their diets and behaviour

3. Start with "One important difference".

is, their conservation status, One important difference

4. Start with "For example,".

is endangered, the whale shark, For example,

5. Start with "Overall,".

both species, play an important role, Overall,, in the ocean

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose topic or supporting.

The first sentence of a paragraph is often the _____ sentence.

7. Choose habitat or contrast.

Use whereas to show a _____ between two facts.

8. End a comparison by summarizing both sharks together. Choose first or overall.

_____ , both sharks play an important role in the ocean.

9. Choose status or species.

Endangered is a conservation _____.

10. Choose supporting or dangerous.

Examples give _____ details for a topic sentence.

Writing Homework 3

Book 3 Unit 1

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a comparison paragraph with a topic sentence.

A	Unlike the whale sharks just described, tiger sharks are smaller and eat larger sea creatures.
B	Whale sharks are larger but eat tiny animals.
C	The two shark species are different in size and diet.

☐ C-B-A ☐ A-C-B ☐ A-B-C

12. Order this comparison of two reserve groups.

A	The first group has too little nesting space.
B	Two animal groups in this reserve face different problems.
C	In contrast, the second group has enough space but too little food.

☐ B-A-C ☐ B-C-A ☐ A-C-B

13. Order a paragraph about shared features.

A	They both have fins and a divided tail.
B	However, their behaviour towards humans is different.
C	Both shark species live in major oceans.

☐ B-A-C ☐ A-C-B ☐ C-A-B

14. Order an introduction-to-conclusion sequence.

A	Whale sharks and tiger sharks have several similarities and differences.
B	Overall, both species are important parts of ocean life.
C	Their diets, size and behaviour show clear contrasts.

☐ A-C-B ☐ A-B-C ☐ C-A-B

15. Order a paragraph with an example.

A	The whale shark needs stronger protection.
B	For example, people should reduce threats to its ocean habitat.
C	Its endangered status makes that protection urgent.

☐ B-C-A ☐ A-C-B ☐ C-A-B

Writing Homework 3

Book 3 Unit 1

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write your own answer with different details.

16. Write a 4-5 sentence comparison paragraph about the sharks' size and diet. Begin with a topic sentence.

Model: The two shark species are different in both size and diet. Whale sharks are much larger than tiger sharks. However, whale sharks eat tiny animals such as plankton. Tiger sharks are smaller and eat tuna, dolphins and turtles.

17. Reserve notes: Group A has few nesting sites and enough food. Group B has many sites but little food. Compare their needs in one paragraph.

Model: Two groups in this reserve need different kinds of support. Group A has enough shelter but little food. In contrast, Group B has plenty of food but few safe shelters. The reserve should match its help to each group’s needs.

18. Write one self-contained paragraph comparing whale sharks and tiger sharks. Use the supplied facts: both have fins and live in oceans. Whale sharks filter small food from water. Tiger sharks hunt larger animals.

Model: Whale sharks and tiger sharks have both shared and different features. Both animals have fins and live in oceans. Whale sharks take small food from water by filtering it. Tiger sharks, however, hunt larger animals.

Writing Homework 3

Book 3 Unit 1

Questions 19-20 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write your own answer with different details.

19. Write a 4-5 sentence conclusion that explains why both sharks matter.

Model: Overall, whale sharks and tiger sharks are very different animals. However, both play an important role in ocean ecosystems. People need to protect endangered whale sharks. They should also avoid unnecessary harm to tiger sharks.

20. Reserve notes: red squirrel group uses woodland food. Grey squirrel group also finds food near buildings. Both need nesting places. Compare the groups in one paragraph.

Model: The two groups in this reserve share a need for safe nesting places. The red squirrel group uses woodland food. The grey squirrel group also finds food near buildings. Their different food sources may affect where they can live.

Writing Homework 3

Book 3 Unit 1

Questions 21-22 Describe the picture

Write one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: species, major, endangered

21. Compare the printed photograph and small model as ways to study an animal. Use a clear topic sentence.

Words: provide, endangered, protect

22. Write a 3-4 sentence paragraph explaining why conservation research matters.

Writing Homework 3

Book 3 Unit 1

Questions 23-25 Describe the picture

Write one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: natural, affect, native

23. Compare watching wildlife with binoculars and using a camera trap. Describe a possible advantage of each.

Words: affect, provide, damage

24. Write a 3-4 sentence paragraph linking this research scene to squirrel protection.

Words: protect, natural, survive

25. Write a 3-4 sentence conclusion about protecting woodland species.
