Listening Homework 1

Book 3 Unit 2

Questions 1-5 Sentence completion

Write **ONE WORD, ONE NUMBER, OR ONE OF EACH** from the indicated SHORT audio. Do not add % where it is printed.

1. [2.2-S01] **The lecturer refers to 'some of the _____ problems we are now facing'.**

2. [2.2-S02] **The speaker calls hydroponics a farming _____ .**

3. [2.2-S02] **Plants can grow without being planted in the _____ .**

4. [2.2-S03] **NASA developed the method because food might be grown in any _____ .**

5. [2.2-S03] **Fresh water is a limited _____ .**

Listening Homework 1

Book 3 Unit 2

Questions 6-10 Sentence completion

Write **ONE WORD, ONE NUMBER, OR ONE OF EACH** from the indicated SHORT audio. Do not add % where it is printed.

6. [2.2-S05] **Sunlight is directed towards a pipe containing _____ .**

7. [2.2-S06] **Desalination removes _____ from seawater.**

8. [2.2-S07] **The plant can make up to _____ litres of fresh water each day.**

9. [2.2-S08] **Supermarkets are interested because the vegetables are grown without _____ or other chemicals.**

10. [2.2-S09] **The speaker says the farms use solar energy instead of _____ fuels.**

Listening Homework 1

Book 3 Unit 2

Questions 11-15 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

11. [2.2-S01] **What route will the explanation follow?**

- ☐ A. Only the history of water-based farming and a list of crops
- ☐ B. How a school orchestra chooses concert music
- ☐ C. How the method works, its possible benefits, then its problems

12. [2.2-S02] **What are nutrients compared to?**

- ☐ A. Food for plants
- ☐ B. Water containers
- ☐ C. A school orchestra

13. [2.2-S02] **What does hydroponics mean in the lecture?**

- ☐ A. Growing plants only in dry soil
- ☐ B. Growing plants in water
- ☐ C. Planning a city's bus routes

14. [2.2-S04] **What water source does Sundrop Farms use?**

- ☐ A. Fresh water from a river
- ☐ B. Water from the sea
- ☐ C. A city bus timetable

15. [2.2-S04] **What does the lecturer say about traditional farming?**

- ☐ A. It uses between 6 and 8 percent of the planet's fresh water
- ☐ B. It determines the departure time of trains
- ☐ C. It uses between 60 and 80 percent of the planet's fresh water

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

16. [2.2-S05] **What does the steam provide?**

- ☐ A. Electrical power
- ☐ B. Cold water for the shore
- ☐ C. Concert tickets

17. [2.2-S06] **What are the growing building walls and ceiling made of?**

- ☐ A. Glass
- ☐ B. Wood
- ☐ C. Concert programmes

18. [2.2-S06] **What is the result of desalination in this explanation?**

- ☐ A. Water with additional salt
- ☐ B. A higher score in a football match
- ☐ C. Clean water that is safe to drink

19. [2.2-S08] **Which crops does the lecturer say Australian farms have grown?**

- ☐ A. Wheat, coffee and rice
- ☐ B. Tomatoes, peppers and cucumbers
- ☐ C. Blue, green and yellow paints

20. [2.2-S09] **How certain is the speaker about the future of this farming method?**

- ☐ A. He sees potential but says its future is uncertain
- ☐ B. He says it has already replaced traditional farming
- ☐ C. He predicts next week's weather in detail

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

21. [2.2-S03] **Which TWO places are mentioned as possible locations for growing food?**

- ☐ A. Concert tickets
- ☐ B. Antarctica
- ☐ C. Only temperate farmland
- ☐ D. Only coastal Australia
- ☐ E. Mars

22. [2.2-S05] **Which TWO details about the heated seawater are stated?**

- ☐ A. It is kept in special containers
- ☐ B. It performs a piano exercise
- ☐ C. It never becomes warm
- ☐ D. It reaches 160 degrees Celsius
- ☐ E. It heats the sun

23. [2.2-S04] **Which TWO details belong to the company example?**

- ☐ A. It combines hydroponics with solar energy
- ☐ B. The site is 100 metres from the shore
- ☐ C. The office repaints its walls every month
- ☐ D. It uses only wind power
- ☐ E. The site is far inland

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

24. [2.2-S07] **Which TWO steps follow the production of fresh water?**

- ☐ A. Crops are grown before plant food is added
- ☐ B. The fresh water is immediately discarded
- ☐ C. Plant food is added before crops are grown
- ☐ D. The library increases its late-return fines
- ☐ E. The water is used inside the growing building

25. [2.2-S08] **Which TWO reactions to the method does the lecturer report?**

- ☐ A. Everyone rejects it
- ☐ B. A bicycle club changes its weekend route
- ☐ C. Many people are excited about it
- ☐ D. Some people call it a perfect answer to the world food crisis
- ☐ E. Supermarkets refuse to buy any produce

Passage A - Reading the Ocean from Space

A A tide gauge measures the height of water at one coast. That information is useful, but it cannot describe the whole ocean. Since 1993, satellites have measured global sea level by following the height of the ocean surface in many places. Scientists combine these observations to make a global average. The average does not say that every beach has the same water height. Instead, it gives researchers one way to compare the ocean over many years. Satellites pass over broad areas again and again, so the information is not based on one ship or one person's observation. Scientists check the record over time because individual measurements can vary. Repeated observations make it possible to see a wider pattern without claiming that all coasts change in exactly the same way.

B The satellite record helps explain why a warming **climate** matters to the sea. Seawater expands when it becomes warmer. In addition, ice sheets and glaciers on land can melt and add water to the ocean. NASA identifies these two processes as the main **causes** of recent global sea-level rise. They are different processes, yet both connect a warmer planet with a higher global average. The record is evidence of physical change, not a measurement of a single storm or tide.

C The graph made from satellite observations also contains a seasonal pattern. During the water cycle, water moves between the oceans and land through rain and snow. This movement can make the measured global level rise and fall during a year. Researchers study many years of observations before they describe a long-term **trend**. A storm may have a powerful local **effect**, but a short event does not by itself show what is happening to the global ocean. The distinction between local events and a global record is important.

Passage A - Reading the Ocean from Space

D Sea-level data are one part of wider evidence about **global warming**. The Earth's **atmosphere** contains heat-trapping gases, including carbon dioxide and methane. Burning a **fossil fuel** such as coal, oil or natural gas releases carbon dioxide into the air. NASA explains that human activities have increased the amount of carbon dioxide in the **atmosphere** since industrial times. A sea-level satellite does not measure every gas, but its observations can be considered alongside other **climate** evidence.

E A global average cannot **predict** the precise result for one street or harbour. Tides, storms and land movement can change the water level experienced at a particular coast. Even so, long-term information can help people ask useful questions about places where rising water may **threaten** a coastal habitat. Plants and animals in a narrow zone between land and sea may be sensitive to change. Satellite records do not offer a guarantee about each local **ecosystem**, but they provide a carefully collected picture of a changing planet.

Reading Homework 1

Book 3 Unit 2

Questions 1-10 Summary completion

Write **ONE WORD** from the indicated paragraphs. Questions 1-5: **A, B**. Questions 6-10: **C, D**.

At a coast, a **(1)** _____ gauge measures sea level. Scientists combine observations into an **(2)** _____. Seawater **(3)** _____ as it becomes warmer, while melting land ice adds **(4)** _____. The land-ice sources include ice sheets and **(5)** _____.

In the natural cycle, moisture **(6)** _____ between oceans and land through rain and **(7)** _____. A storm may have a local **(8)** _____ without demonstrating a global trend. Coal, oil and natural gas each count as a fossil **(9)** _____. Carbon dioxide has increased in the atmosphere since **(10)** _____ times.

Questions 11-15 List of Headings

Match each specified paragraph with its best heading. Tick **ONE** box. Some headings are not used.

i. Global observations beyond one coastal point
ii. A history of ship travel
iii. Two processes that make the ocean higher
iv. Seasonal movement and long-term trends
v. Limits of broad measurements at one coast
vi. Sea level within wider climate evidence
vii. A guarantee for every harbour

11. Paragraph A

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

12. Paragraph B

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

13. Paragraph C

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

14. Paragraph D

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

15. Paragraph E

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question.

16. How often do satellites observe broad areas?

- ☐ A. Repeatedly over time
- ☐ B. When a theatre sells tickets
- ☐ C. Only once for the whole record

17. Why do scientists check observations over time?

- ☐ A. Every measurement must be identical
- ☐ B. To select a school uniform
- ☐ C. Individual measurements can vary

18. What are both physical processes linked to?

- ☐ A. A warmer planet
- ☐ B. Only one storm at one coast
- ☐ C. The price of theatre tickets

19. Why does a global record differ from one local reading?

- ☐ A. All beaches have identical readings
- ☐ B. It chooses pupils' desks
- ☐ C. It combines observations from many places

20. Why study many years of observations?

- ☐ A. To choose the costumes for a play
- ☐ B. To identify a long-term trend
- ☐ C. To create storms at the coast

Questions 21-25 Single choice

Tick **ONE** answer, A-C, for each question.

21. Which environment may rising water threaten?

- ☐ A. Every inland desert equally
- ☐ B. A theatre ticket office
- ☐ C. A coastal habitat

22. Which heat-trapping gas is named?

- ☐ A. Methane
- ☐ B. A violin
- ☐ C. Helium alone

23. How should satellite observations be used when studying warming?

- ☐ A. As instructions for baking a cake
- ☐ B. Alongside other climate evidence
- ☐ C. As measurements of every gas

24. Why can one coast differ from the worldwide result?

- ☐ A. Every coast experiences identical conditions
- ☐ B. A football team sets coastal conditions
- ☐ C. Local storms and land movement matter

25. What is the value of satellite records?

- ☐ A. They set the opening hours of a shop
- ☐ B. They give a carefully collected global picture
- ☐ C. They replace every local study

Speaking Homework 1

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "Wind power".
for homes, Wind power, can provide, clean energy

2. Start with "Solar panels".
Solar panels, our use of fossil fuels, might reduce

3. Start with "The future of nuclear power".
is, The future of nuclear power, uncertain

4. Start with "Hydroponic farms".
Hydroponic farms, food, in dry places, could grow

5. Start with "Using less electricity".
will help, Using less electricity, the environment

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Your friend says wind power has no disadvantages. Choose disagree or agree.

Friend: What do you think about that claim?

You: I _____ because turbines can harm birds.

7. Situation: Engineers do not yet know whether a proposed solar project would cut costs. Choose will or might.

Friend: What could happen if the project is approved?

You: I am not sure. It _____ provide cheaper energy.

8. Situation: A student calls fossil fuels unlimited. Choose incorrect or correct.

Friend: Is that statement right?

You: That is _____. Fossil fuels can run out.

9. Situation: Your friend asks about a wind turbine near homes. Choose possible or impossible.

Friend: Could the turbine cause noise?

You: It is _____ that some neighbours will hear it.

10. Situation: Forecasts disagree about a future drought, so the effect on farms is still uncertain. Choose will not or may not.

Friend: Will every farm have enough water?

You: I am not sure. Some farms _____ have enough water.

Speaking Homework 1

Book 3 Unit 2

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Explain a possible benefit of solar panels.

Opening: Our school could produce some of its own power.

A	The school might therefore buy less power from the grid.
B	The school uses a lot of electricity.
C	Solar panels could produce some of that electricity.

12. Explain a concern about a wind farm.

Opening: There is something we should check about the proposed site.

A	To prevent this blade-related harm, planners should study that route before building.
B	The proposed turbines would stand near a bird route.
C	Some birds on that route could be affected by the turbines' moving blades.

13. Explain why water may become scarce.

Opening: People in that area are worried about water.

A	This dry weather has reduced the water stored in its reservoir.
B	The reduced supply may not meet the needs of homes and farms.
C	The area has had very little rain this year.

14. Explain a future food solution.

Opening: Growing food there will need a different approach.

A	This system is known as hydroponics.
B	To address that problem, it is considering growing plants in nutrient-rich water.
C	The farm needs a way to grow food with less land.

15. Explain why a family may use less energy.

Opening: We have found a small way to cut our electricity use.

A	The comparison showed that LEDs used less for the same amount of light.
B	We compared the electricity used by old bulbs and LED bulbs.
C	Because of this difference, we will replace the old bulbs.

Speaking Homework 1

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write key words, then record your answer.

16. State whether you support a solar-panel project at school. Give two reasons.

Model: I support the solar-panel project. It could provide clean electricity for classrooms. It might also reduce the school's energy costs.

17. Describe one possible risk of a wind farm and one way to investigate it.

Model: A wind farm might affect birds that fly through the area. Experts could watch the birds in different seasons. Their findings could guide the plan.

18. Explain how a home could use less energy. Include a future result.

Model: My family could turn off lights in empty rooms. We could also use shorter showers. These changes might lower our electricity use.

Speaking Homework 1

Book 3 Unit 2

Questions 19-20 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write key words, then record your answer.

19. Describe a water problem and one possible response.

Model: The town may have less water after a long dry season. Residents could collect rainwater for gardens. This might save clean water for drinking.

20. Give an opinion about a hydroponic farm. Include a benefit and an uncertainty.

Model: A hydroponic farm could grow vegetables with less land. It might provide local food in dry areas. However, the equipment may be expensive.

Speaking Homework 1

Book 3 Unit 2

Questions 21-22 Describe the picture

Write key words, then record 2-3 sentences for each question. Use the words if helpful.

Words: alternative, provide, resource

21. Describe the two visible energy sources.

Words: alternative, provide, resource

22. Explain why this place may use alternative energy.

Speaking Homework 1

Book 3 Unit 2

Questions 23-25 Describe the picture

Write key words, then record 2-3 sentences for each question. Use the words if helpful.

Words: resource, system, solution

23. Describe the garden and the water containers.

Words: resource, provide, crisis

24. Suggest one possible use for the collected water.

Words: system, solution, crisis

25. Describe one environmental problem that collecting rainwater could help address.

Writing Homework 1

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "Climate change".

serious effects, Climate change, on the planet, can have

2. Start with "Fossil fuels".

are, Fossil fuels, a limited resource

3. Start with "Public transport".

to pollution, one solution, Public transport, may be

4. Start with "Hydroponics".

is, Hydroponics, a system, for growing plants

5. Start with "The factory".

The factory near the river, air pollution, causes, serious

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose cause or effect. Rising temperatures are a result of climate change.

Rising temperatures are an _____ of climate change.

7. Choose resource or disaster. Water is something people need and use.

Clean water is an important _____.

8. Choose geographical or environmental. This issue concerns pollution and climate.

Air pollution is an _____ issue.

9. Choose unlimited or limited. Fossil fuels can run out.

Fossil fuels are a _____ resource.

10. Choose solution or pollution. Using buses can help reduce dirty air.

Public transport can be part of the _____.

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a climate-change cause-and-effect chain.

A This releases gases into the atmosphere.
B People burn fossil fuels for energy.
C These gases contribute to climate change.

☐ C-A-B ☐ B-A-C ☐ B-C-A

12. Order an explanation of a water crisis.

A The region has received little rain for months.
B These low reservoir levels have caused a water crisis in the area.
C Reservoir levels have fallen during the dry period.

☐ A-B-C ☐ A-C-B ☐ B-C-A

13. Order an explanation of hydroponics.

A They add nutrients to water for the plants.
B Some farms grow plants without using soil.
C This soil-free method using the nutrient mixture just described is called hydroponics.

☐ B-A-C ☐ B-C-A ☐ A-C-B

14. Order an explanation of air pollution.

A The cars release pollution into the air.
B As a result, the city has poor air quality.
C Many people drive private cars into the city.

☐ A-B-C ☐ C-A-B ☐ B-C-A

15. Order an explanation of a renewable-energy choice.

A It has a sunny area near the edge of town.
B It is considering solar panels for that area.
C The town needs more electricity for new homes.

☐ B-A-C ☐ C-B-A ☐ C-A-B

Questions 16-18 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write your own answer with different details.

16. Explain one cause and effect of air pollution. Use because or as a result.

Model: Many people drive short distances because buses are infrequent. As a result, more cars release pollution near the school. Better bus services could reduce this problem.

17. Describe a water crisis and one possible solution.

Model: The area has had very little rain, so its reservoirs are low. This water crisis affects homes and farms. The town could ask people to use less water.

18. Explain a benefit of hydroponics and one limitation.

Model: Hydroponics can grow plants in water without soil. This could help dry areas produce food. However, the system needs equipment and careful control.

Questions 19-20 Follow the model

Use the model to make your own answer in 3-4 connected sentences. Write your own answer with different details.

19. Describe an action to reduce fossil-fuel use.

Model: The school could install bicycle parking because more students may cycle. As a result, fewer families might drive short journeys. This could reduce fossil-fuel use.

20. Explain an environmental issue and a response.

Model: Plastic waste is an environmental issue near the river. It can enter the water after heavy rain. The town could add bins and organise regular clean-ups.

Writing Homework 1

Book 3 Unit 2

Questions 21-22 Describe the picture

Write 2-3 sentences for each question. Use the words if helpful.

Words: construction, ecosystem, consequences

21. Describe the forest and the road.

Words: construction, issue, consequences

22. Explain one possible issue shown by the scene.

Writing Homework 1

Book 3 Unit 2

Questions 23-25 Describe the picture

Write 2-3 sentences for each question. Use the words if helpful.

Words: effect, challenge, trend

23. Describe the recycling activity and the materials people are sorting.

Words: effect, trend, challenge

24. Explain one possible effect of the recycling activity.

Words: trend, predict, effect

25. Describe a trend the community could track.
