Listening Homework 2

Book 3 Unit 2

Questions 1-5 Sentence completion

Write **ONE WORD, ONE NUMBER, OR ONE OF EACH** from the indicated SHORT audio. Do not add % where it is printed.

1. [2.2-S01] **The proposed solutions may reduce problems related to _____ change.**

2. [2.2-S01] **The first solution uses solar energy to grow food in the _____.**

3. [2.2-S02] **The lecturer compares _____ to food for plants.**

4. [2.2-S03] **The lecturer notes that fresh water is a limited _____.**

5. [2.2-S04] **Traditional farming uses between 60 and 80 _____ of the planet's fresh water.**

Listening Homework 2

Book 3 Unit 2

Questions 6-10 Sentence completion

Write **ONE WORD, ONE NUMBER, OR ONE OF EACH** from the indicated SHORT audio. Do not add % where it is printed.

6. [2.2-S10] **At 160 degrees Celsius, steam provides _____.**

7. [2.2-S10] **Desalination creates drinkable water by removing the _____.**

8. [2.2-S07] **The _____ adds plant food to fresh water before growing produce.**

9. [2.2-S08] **Australian farms have grown tomatoes, _____ and cucumbers.**

10. [2.2-S09] **The lecturer says the future of hydroponics is _____.**

Listening Homework 2

Book 3 Unit 2

Questions 11-15 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

11. [2.2-S02] **Which combination do scientists use in the first method?**

- ☐ A. Fossil energy with dry-soil farming
- ☐ B. Solar energy with water-based farming
- ☐ C. A city bus map with a concert programme

12. [2.2-S03] **Why has NASA been developing the method?**

- ☐ A. It could allow food production under widely different conditions
- ☐ B. It guarantees food production only in mild coastal areas
- ☐ C. It sets the programme for a school concert

13. [2.2-S04] **What source of water does the company use?**

- ☐ A. Fresh water from a river
- ☐ B. Water used to clean a cinema floor
- ☐ C. Water taken from the sea

14. [2.2-S10] **Where is the seawater kept?**

- ☐ A. Inside the mirror line
- ☐ B. Under the seats of a theatre
- ☐ C. In special containers

15. [2.2-S10] **What directs the sun’s heat onto a pipe?**

- ☐ A. A water tank
- ☐ B. A line of mirrors
- ☐ C. A concert programme

Listening Homework 2

Book 3 Unit 2

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question. Use the indicated SHORT audio.

16. [2.2-S10] **What heats the water?**

- ☐ A. Hot oil
- ☐ B. Cold air
- ☐ C. Concert tickets

17. [2.2-S07] **What maximum daily output does the lecturer report?**

- ☐ A. Up to 10,000 litres of fresh water
- ☐ B. Exactly 100 litres of fresh water
- ☐ C. Ten thousand concert programmes

18. [2.2-S04] **How far from the shore is the farm?**

- ☐ A. About 100 kilometres
- ☐ B. A concert programme
- ☐ C. About 100 metres

19. [2.2-S08] **Why are many supermarkets interested in the produce?**

- ☐ A. It is grown only in winter
- ☐ B. It is grown without pesticides or other chemicals
- ☐ C. It changes a concert schedule

20. [2.2-S09] **Why does the speaker claim the farms have little negative impact?**

- ☐ A. They use solar power instead of fossil fuels
- ☐ B. They have already replaced all traditional farms
- ☐ C. They provide free tickets for sporting events

Listening Homework 2

Book 3 Unit 2

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

21. [2.2-S10] **Which TWO destinations for heated water does the lecturer describe?**

- ☐ A. A freezer for long-term storage
- ☐ B. The glass growing building at night
- ☐ C. A desalination plant
- ☐ D. A tank used only for rainwater
- ☐ E. A theatre lighting desk

22. [2.2-S10] **Which TWO physical features of the growing building are stated?**

- ☐ A. A stone roof
- ☐ B. Seats for an orchestra
- ☐ C. Wooden walls
- ☐ D. Glass walls
- ☐ E. A glass ceiling

23. [2.2-S08] **Which TWO reactions does the lecturer report?**

- ☐ A. People expect it to solve every energy problem
- ☐ B. Many people are excited about the technology
- ☐ C. A concert changes its schedule
- ☐ D. Many people say it wastes every litre of water
- ☐ E. Some call it a perfect answer to the world food crisis

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question. Use the indicated SHORT audio.

24. [2.2-S01] **Which TWO stages does the lecturer announce?**

- ☐ A. Explain how the method works
- ☐ B. Teach a piano exercise
- ☐ C. Prove the method has no disadvantages
- ☐ D. Consider possible problems with the system
- ☐ E. Compare supermarket prices in several countries

25. [2.2-S03] **Which TWO distant locations are given as examples of possible food production?**

- ☐ A. Antarctica
- ☐ B. Only temperate farmland
- ☐ C. Mars
- ☐ D. The local swimming pool
- ☐ E. Only coastal Australia

Passage B - Why the Ocean Takes Up Heat

A The ocean is not separate from the Earth's **climate** system. Water can store heat, and the ocean has taken up much of the excess heat caused by a warming planet. This process can slow the immediate rise of air temperature, but it does not make the extra heat disappear. The ocean has **absorbed** it. Scientists therefore study the ocean as well as the air when they investigate **climate** change.

B Heat-trapping gases are a **cause** of the extra energy remaining in the Earth system. Carbon dioxide is released when people burn a **fossil fuel** such as coal, oil or natural gas. In the **atmosphere**, this gas helps hold heat. The ocean also takes in some carbon dioxide from the air. That does not mean the ocean can safely take in an unlimited amount. It means that changes in the air and changes in seawater are connected.

C Warming water has a physical result. Like many materials, seawater expands as it becomes warmer. This expansion contributes to rising global sea level, alongside water added by melting land ice. The ocean's heat uptake is therefore not simply a helpful service. It is also part of the evidence used to understand **global warming**. A measurement of one process can lead to questions about another process, but scientists still need several kinds of observations.

Passage B - Why the Ocean Takes Up Heat

D Carbon dioxide **absorbed** by seawater can also change the chemistry of the water. NOAA explains that these changes make seawater more acidic. Some organisms build shells or skeletons from materials in the water, so a chemical change can have an **effect** on them. The result may matter for a marine **ecosystem**, where organisms depend on one another for food and shelter. However, a single description of ocean chemistry cannot tell us exactly how every species or habitat will respond. These physical and chemical changes have **consequences** for sea level and marine animals.

E The ocean's role shows why simple statements can be misleading. It is true that the ocean stores heat and takes up some carbon dioxide. It is not true that this gives people a reason to ignore emissions. If the **atmosphere** continues to change, the ocean also changes. Coastal areas may face rising water, while marine life may face changing conditions. These linked processes can **threaten** some living systems, but their exact effects depend on place, species and time. Careful evidence is more useful than a promise that one natural process will solve the problem. NASA illustrates environmental stress with photographs of a reef in the National Marine Sanctuary of American Samoa. The sequence shows a healthy reef, a later white reef and then a brown, damaged reef. The photographs record change between 2014 and 2015. They show why researchers examine more than a single image when studying how marine life responds to environmental change.

Reading Homework 2

Book 3 Unit 2

Questions 1-5 True, False, Not Given

TRUE: agrees with the passage. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

1. The ocean has taken up much of the excess heat in a warming climate.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

2. Ocean heat uptake can slow the immediate rise in air temperature.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

3. The Pacific Ocean has taken up twice as much extra heat as the Atlantic.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

4. Carbon dioxide helps heat escape from the atmosphere more easily.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

5. The ocean’s absorption of some carbon dioxide proves it can safely absorb an unlimited amount.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 6-10 True, False, Not Given

TRUE: agrees with the passage. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

6. Coastal areas may face rising water.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

7. Physical and chemical changes may affect marine animals.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

8. Shell-building organisms recover within a week of a chemical change.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

9. An organism's shell weighs twice as much after a chemical change.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

10. The reef photographs were taken during a winter storm.

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 11-15 Matching information

Which paragraph contains each piece of information? Tick **ONE** box. You may use a letter more than once.

11. Describes carbon-dioxide release using coal, oil and gas as examples.

☐ A ☐ B ☐ C ☐ D ☐ E

12. Explains why scientists examine more than a single image.

☐ A ☐ B ☐ C ☐ D ☐ E

13. Distinguishes storing extra heat from making it disappear.

☐ A ☐ B ☐ C ☐ D ☐ E

14. Identifies a chemical change towards greater acidity.

☐ A ☐ B ☐ C ☐ D ☐ E

15. Notes that some organisms build shells or skeletons from materials in water.

☐ A ☐ B ☐ C ☐ D ☐ E

Questions 16-20 Matching information

Which paragraph contains each piece of information? Tick **ONE** box. You may use a letter more than once.

16. Names a protected marine area in American Samoa.

☐ A ☐ B ☐ C ☐ D ☐ E

17. Connects carbon dioxide in the air with its uptake by seawater.

☐ A ☐ B ☐ C ☐ D ☐ E

18. Introduces the ocean as part of Earth's climate system.

☐ A ☐ B ☐ C ☐ D ☐ E

19. Limits what one chemical description can say about every species.

☐ A ☐ B ☐ C ☐ D ☐ E

20. Says that several kinds of observations are needed to study connected processes.

☐ A ☐ B ☐ C ☐ D ☐ E

Questions 21-23 Multiple choice

Tick **TWO** answers, A-E, for each numbered question.

21. Which TWO parts of Earth do scientists study when investigating climate change?

- ☐ A. A school lunch menu
- ☐ B. The ocean
- ☐ C. A single beach only
- ☐ D. The air
- ☐ E. Only the soil on one farm

22. Which TWO ways do marine organisms depend on one another?

- ☐ A. To choose school uniforms
- ☐ B. For food
- ☐ C. To prevent every chemical change
- ☐ D. To guarantee identical responses in every species
- ☐ E. For shelter

23. Which TWO changes are described in paragraph C?

- ☐ A. Warmer seawater expands
- ☐ B. Every tide stops
- ☐ C. The process chooses a concert programme
- ☐ D. All coasts rise equally
- ☐ E. Melting land ice can add water

Questions 24-25 Multiple choice

Tick **TWO** answers, A-E, for each numbered question.

24. Which TWO reef conditions are shown in the photographs?

- ☐ A. A reef that never changes
- ☐ B. A school timetable
- ☐ C. A healthy reef
- ☐ D. A brown, damaged reef
- ☐ E. A reef that becomes land

25. Which TWO cautions appear in the passage?

- ☐ A. Ocean uptake does not make emissions unimportant
- ☐ B. All marine life responds identically
- ☐ C. Exact effects depend on place, species and time
- ☐ D. One natural process guarantees a complete solution
- ☐ E. The process chooses a school uniform

Speaking Homework 2

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "A wind farm".
both benefits and risks, has, A wind farm

2. Start with "Local people".
should consider, carefully, Local people, the advantages

3. Start with "The new turbines".
The new turbines, the view from the village, might, affect

4. Start with "Clean energy".
could create, new jobs in the area, Clean energy

5. Start with "The council".
will need, before its decision, The council, evidence

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Your friend supports a wind farm because it is clean. Choose disadvantage or advantage.

Friend: **What is one positive point?**

You: Clean energy is an _____ of wind power.

7. Situation: The project may need new staff, but the number of jobs is uncertain. Choose could or must.

Friend: **What might the project do for workers?**

You: It _____ create local jobs.

8. Situation: Several residents have already rejected the plan. A speaker predicts that everyone will agree tomorrow. Choose unlikely or certain.

Friend: **Is that prediction realistic?**

You: It is _____ that everyone will agree.

9. Situation: Some residents oppose the plan because they expect noise. Choose supporters or opponents.

Friend: **Who is worried about the noise?**

You: The _____ may mention the noise.

10. Situation: A notice gives May as the start date, but the confirmed date is June. Choose incorrect or unnecessary.

Friend: **Is the date on the notice right?**

You: No, the date is _____.

Speaking Homework 2

Book 3 Unit 2

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Explain the next steps in the turbine project.

Opening: The village has a plan for cleaner energy.

A	Once this preparation is complete, they may install the turbine.
B	The council has approved a turbine near the old factory.
C	After that approval, workers could prepare the site.

12. Explain a possible problem with an unsuitable site.

Opening: One proposed location may not be practical.

A	To avoid this disruption, the council could choose a quieter site.
B	Building work beside that school could disturb the pupils.
C	This location is next to a primary school.

13. Explain a possible benefit for a local training centre.

Opening: The town is considering skills as well as energy.

A	A local college could offer training for these jobs.
B	Those trainees could later help to maintain the turbines.
C	The project may create a few technical jobs.

14. Explain why the first plan may need to change.

Opening: The engineers are checking the proposed access road.

A	To prevent this damage to the ground, engineers may suggest a different route.
B	The first plan places the access road through a wet field.
C	Heavy vehicles could damage this wet ground in winter.

15. Explain how a small change could save a local resource.

Opening: We want to protect the trees near the site.

A	The designers are considering moving the turbine ten metres east.
B	Keeping clear of this woodland edge could protect its oldest trees.
C	That small move could avoid the edge of the woodland.

Speaking Homework 2

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

16. Describe a wind-turbine plan near an unused factory. Say one thing it could provide and one possible problem.

Model: An unused factory site could hold one wind turbine. It might provide clean electricity for nearby buildings. However, the construction road could cause noise for a short time. The council could share the timetable with local people.

17. Describe a solar-panel project on a school roof. Include one benefit and one practical condition.

Model: The school could place solar panels on its flat roof. They might provide electricity for classrooms during the day. The project needs a safe route for workers to reach the roof. Parents could receive information before work begins.

18. Explain why a project beside a river may need extra planning.

Model: A small energy project could be built beside the river. Heavy rain might make the ground unsafe for vehicles. Engineers could plan the work for the drier months. This may reduce the risk of damage.

Speaking Homework 2

Book 3 Unit 2

Questions 19-20 Follow the model

Use the model to help you express different content in 4 connected sentences. Write key words, then record your answer.

19. Describe a change to make a turbine plan less harmful to birds.

Model: The first plan puts a turbine near a line of trees. This location may be unsuitable for birds. The designers could move it to open ground. The new position might reduce the risk to wildlife.

20. Describe a community energy notice. Say what may happen next and why people need clear information.

Model: The council has posted a notice about a new energy project. Residents may visit the library to see the map. Some people could have questions about the construction dates. Clear information may prevent unnecessary worry.

Speaking Homework 2

Book 3 Unit 2

Questions 21-22 Describe the picture

Write key words, then record 3 connected sentences for each question. Use the words if helpful.

Words: benefit, risk, opponent

21. Describe the people and the wind turbine. Then say one possible use for the turbine.

Words: opponent, risk, environmental

22. Imagine the group is checking the site. Describe one visible detail, then give one question about a possible environmental risk.

Speaking Homework 2

Book 3 Unit 2

Questions 23-25 Describe the picture

Write key words, then record 3 connected sentences for each question. Use the words if helpful.

Words: environmental, benefit, risk

23. Describe the people and the map. Then say how the map could help an environmental project.

Words: provide, benefit, risk

24. Imagine the group is planning a local project. Describe one visible detail, then say one resource the project could provide.

Words: benefit, risk, solution

25. Imagine the group must choose between two sites on the map. Describe the map, then suggest one simple way to reduce risk.

Writing Homework 2

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "Because of drought,".

farmers, Because of drought,, have less water, for crops

2. Start with "As a result,".

some plants, cannot grow, well, As a result,

3. Start with "The city".

The city, by improving buses, air pollution, has reduced

4. Start with "Deforestation".

on hillsides, soil erosion, can lead to, Deforestation

5. Start with "Recycling more materials".

the amount of waste, could reduce, Recycling more materials

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose crisis or trend. The town has almost no water left.

The town is facing a water _____.

7. Choose resource or disaster. This word means a useful supply.

The village shares a limited water _____.

8. Choose consequence or construction. This word means building work.

Road _____ has begun near the forest.

9. Choose contribute to or consist of. This phrase means help cause.

Heavy traffic can _____ air pollution.

10. Choose annual or unlimited. The report is published once each year.

The council publishes an _____ environmental report.

Writing Homework 2

Book 3 Unit 2

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a drought chain.

A	Farmers have less water for their crops.
B	The region receives less rain than usual.
C	As a result, food production may fall.

☐ C-A-B ☐ C-B-A ☐ B-A-C

12. Order an air-pollution chain.

A	These additional vehicles release gases into the air.
B	Traffic increases near the city centre.
C	Consequently, air quality becomes worse.

☐ C-B-A ☐ B-A-C ☐ A-B-C

13. Order a deforestation chain.

A	With fewer roots holding it in place as just described, the soil is more exposed to erosion.
B	People remove trees from a hillside.
C	The soil has fewer roots to hold it in place.

☐ B-A-C ☐ C-A-B ☐ B-C-A

14. Order a recycling chain.

A	Recycling that paper can reduce the amount sent to landfill.
B	Students separate paper from other rubbish.
C	The paper is collected for recycling.

☐ A-C-B ☐ C-A-B ☐ B-C-A

15. Order an energy-saving chain.

A	The school replaces old bulbs with LED bulbs.
B	Therefore, the school reduces its energy use.
C	The new bulbs use less electricity.

☐ C-A-B ☐ A-C-B ☐ B-C-A

Writing Homework 2

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model to help you express different content in 4 connected sentences. Write your own answer with different details.

16. Imagine a village has little water after a dry season. Describe the problem and one response. Use crisis and resource.

Model: The village faces a water crisis after a long dry season. Its small reservoir is an important resource. Residents are collecting water carefully. The council could help them plan how much to use each day.

17. Imagine your town is checking air quality near a busy road. Describe what it could investigate. Use environmental and contribute to.

Model: Noise near a busy road is an environmental issue in this town. Heavy traffic may contribute to the problem. The council could record noise at different times. Residents could describe when it disturbs them most.

18. Imagine building work is proposed near a forest. Describe the plan and one concern. Use construction and ecosystem.

Model: A new road is planned beside a wetland in this area. Construction could disturb its ecosystem. The council should study the site carefully. A different route may cause less damage.

Writing Homework 2

Book 3 Unit 2

Questions 19-20 Follow the model

Use the model to help you express different content in 4 connected sentences. Write your own answer with different details.

19. Imagine a school tracks recycling each month. Describe what it records and how the record could help. Use trend and predict.

Model: The school records its electricity use each month. Teachers look for a trend in the figures. The record may help them predict future demand. They could then plan suitable energy-saving actions.

20. Imagine a town publishes a yearly report about its parks. Explain what to include. Use annual and challenge.

Model: A village publishes an annual report about water use. One challenge is keeping enough water for both homes and farms. The report describes the amount used by each group. Residents can discuss the findings at a meeting.

Writing Homework 2

Book 3 Unit 2

Questions 21-22 Describe the picture

Write 3 connected sentences for each question. Use the words if helpful.

Words: destruction, cause, consequences

21. Describe the hillside and the bare area. Suggest one possible environmental consequence.

Words: cause, destruction, effect

22. Imagine trees have been removed from the bare area. Explain a possible cause-and-effect chain.

Writing Homework 2

Book 3 Unit 2

Questions 23-25 Describe the picture

Write 3 connected sentences for each question. Use the words if helpful.

Words: contribute to, ecosystem, challenge

23. Describe the tree-planting activity and one challenge the volunteers may face.

Words: effect, contribute to, ecosystem

24. Explain one possible effect of planting trees. Add a practical condition for this benefit.

Words: predict, effect, annual

25. State one question a group could investigate after planting.
