Listening Homework 3

Book 3 Unit 2

Questions 1-6 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

1. [2.4-L01] **The host presents nuclear energy as a topic with both advantages and disadvantages.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

2. [2.4-L01] **Emma says nuclear-plant accidents are frequent but usually minor.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

3. [2.4-L01] **The residents who left the Fukushima area were offered temporary housing by the government.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

4. [2.4-L01] **Emma says radioactive material reached both water and food.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

5. [2.4-L01] **Farmers near Fukushima received financial help after the accident.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

6. [2.4-L01] **Emma calls building nuclear plants near cities responsible.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 7-11 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

7. [2.4-L01] **Jack reports three major nuclear accidents in 30 years.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

8. [2.4-L01] **Jack says coal, gas and hydropower kill fewer workers than nuclear power.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

9. [2.4-L02] **Emma says only a few machines work by day during construction.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

10. [2.4-L02] **Emma calls the alternative energy sources she discusses safer and greener.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

11. [2.4-L02] **Emma says the alternative energy sources she discusses can be used without loans.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 12-15 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

12. [2.4-L02] **Jack says new nuclear plants in low-income countries should be owned by their governments.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

13. [2.4-L02] **Jack says selling electricity to neighbouring countries could improve the economy.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

14. [2.4-L02] **Jack says the alternative energy sources he discusses last longer than a nuclear power plant.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

15. [2.4-L02] **The host says the audience questions will focus on energy prices.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 16-20 Matching information

Which LONG audio contains each piece of information? Tick **ONE** box. You may use a code more than once.

16. Emma asks permission to interrupt the discussion.

☐ 2.4-L01 ☐ 2.4-L02

17. There are hundreds of nuclear power plants around the world.

☐ 2.4-L01 ☐ 2.4-L02

18. A proposal would reduce dependence on oil and gas.

☐ 2.4-L01 ☐ 2.4-L02

19. The cost of producing energy is said to be low after a plant has been built.

☐ 2.4-L01 ☐ 2.4-L02

20. Jack asks the audience to consider the bigger picture.

☐ 2.4-L01 ☐ 2.4-L02

Questions 21-25 Matching information

Which LONG audio contains each piece of information? Tick **ONE** box. You may use a code more than once.

21. An energy source is said to produce less pollution than traditional power plants.

☐ 2.4-L01 ☐ 2.4-L02

22. Jack notes that cities are growing.

☐ 2.4-L01 ☐ 2.4-L02

23. A plant is described as able to provide a large amount of electricity to cities.

☐ 2.4-L01 ☐ 2.4-L02

24. Jack calls nuclear power the most sustainable energy source.

☐ 2.4-L01 ☐ 2.4-L02

25. One energy source is described as potentially harmful to birds.

☐ 2.4-L01 ☐ 2.4-L02

Passage C - Looking Beyond a Forest Boundary

A A map can show where trees have disappeared, but it cannot explain every reason for the change. The Food and Agriculture Organization describes deforestation as a process with long and complex chains of **cause** and **effect**. A forest may be converted to another land use, while damage that leaves the forest area in place can be called degradation. The distinction matters because the **destruction** of forest cover and a decline in forest quality are related, but they are not identical.

B Some causes act directly on a forest. FAO lists commercial and local **farming**, infrastructure expansion, mining and urban expansion among important direct drivers. A new road or other **construction** can change access to land. Agriculture may then become easier or more profitable in the same area. This does not mean that every road has the same result, or that one activity always explains a change. It means that researchers need to examine the uses of land around a forest instead of guessing from one image.

C Forests provide more than timber. They can store carbon, support biodiversity and help regulate water. A **rainforest** is one kind of forest where many plants and animals depend on connected living spaces. When **logging** removes trees but forest cover is expected to return, FAO treats this differently from permanent conversion to another use. Yet **logging** roads can sometimes give people easier access to land. For this reason, a forest **ecosystem** and its habitat may be affected by several connected activities, not just by the final act of clearing. Forest loss has **consequences** for these functions.

Passage C - Looking Beyond a Forest Boundary

D There are also underlying drivers. Markets, laws, land rights, poverty, technology and government decisions can influence direct actions. These factors may work at global, national and local levels. Their importance is not the same everywhere. FAO therefore advises location-specific assessment using recent monitoring, historical information, local knowledge and relevant reports. A general statement about agriculture may point to a possible **cause**, but it cannot prove why one particular area of forest was lost. Evidence is needed before people say which factors **threaten** a place.

E This wider view does not make action impossible. It helps people ask better questions. If **farming** is a direct driver, a useful response may also need to consider markets, land rules or access to information. Forest management can balance environmental, social and economic values, but FAO notes that progress is uneven. No single plan can guarantee that all forest loss will stop. The important **effect** of careful analysis is that decisions can match the actual drivers in a particular place, rather than treating every forest problem as if it had one simple **cause**. It also helps avoid blaming one group or one activity without enough information. A careful explanation can identify what is known, what still needs checking and which decisions may be connected.

Questions 1-10 Summary completion

Write **ONE WORD** from the indicated paragraphs. Questions 1-5: **A, B**. Questions 6-10: **C, D**.

Damage that leaves the forest area in place may be called **(1)** _____ . A decline in forest **(2)** _____ differs from loss of forest cover. Alongside farming, **(3)** _____ , which extracts minerals, is a direct driver. A new **(4)** _____ or other construction can change access. Agriculture may then become easier or more **(5)** _____ .

Forests can store **(6)** _____ . FAO treats returning forest cover differently from permanent **(7)** _____ to another use. Legal claims about who may use land are land **(8)** _____ , while **(9)** _____ is the state of having too little money. These factors can work at global, national and local **(10)** _____ .

Reading Homework 3

Book 3 Unit 2

Questions 11-15 List of Headings

Match each specified paragraph with its best heading. Tick **ONE** box. Some headings are not used.

i. Distinguishing two kinds of forest change

ii. Direct activities near a forest

iii. A promise that every forest will recover

iv. Evidence before local conclusions

v. A report on one famous rainforest

vi. Why forests are more than timber

vii. Using analysis to guide action

11. Paragraph A

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

12. Paragraph B

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

13. Paragraph C

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

14. Paragraph D

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

15. Paragraph E

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question.

16. Why can a map leave the reason for forest change uncertain?

- ☐ A. It gives directions to a concert
- ☐ B. It shows where trees disappeared without explaining every cause
- ☐ C. It identifies every cause automatically

17. Which direct driver is named?

- ☐ A. Infrastructure expansion
- ☐ B. Piano lessons
- ☐ C. Restoring trees after cutting

18. Why examine land around a forest?

- ☐ A. To understand connected land uses
- ☐ B. To treat only the trees inside the boundary as relevant
- ☐ C. To buy tickets for a football match

19. Besides providing timber, which forest function is described?

- ☐ A. Preventing every storm
- ☐ B. Helping to regulate water
- ☐ C. Organising a film festival

20. What supports many plants and animals in a rainforest?

- ☐ A. Connected living spaces
- ☐ B. A theatre ticket
- ☐ C. A guarantee that logging will cease

Questions 21-25 Single choice

Tick **ONE** answer, A-C, for each question.

21. What information can support a location-specific assessment?

- ☐ A. Only one general statement about farming
- ☐ B. The width of a music stand
- ☐ C. Recent monitoring and local knowledge

22. Why use location-specific assessment?

- ☐ A. It picks a cinema’s seats
- ☐ B. Local evidence is needed to explain a particular loss
- ☐ C. General claims identify every local cause

23. What does the passage say about one forest-management plan?

- ☐ A. It organises a school dinner
- ☐ B. It can guarantee the same result everywhere
- ☐ C. It cannot guarantee an end to all forest loss

24. What may a response to farming also consider?

- ☐ A. Only the final act of cutting trees
- ☐ B. Markets or land rules
- ☐ C. The cover of a school exercise book

25. What is the main message?

- ☐ A. Evidence helps explain connected drivers
- ☐ B. The analysis produces a shop receipt
- ☐ C. Clearing every forest is unavoidable

Speaking Homework 3

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "In my view,".
the wind farm, could be, In my view,, a useful solution

2. Start with "However,".
However,, might cause, the project, some local problems

3. Start with "The council".
should listen to, both sides, of the debate, The council

4. Start with "One benefit".
the turbines, One benefit, produce clean energy, is that

5. Start with "A possible risk".
A possible risk, may be affected, wildlife, is that

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: You support the idea but want to check the cost. Choose agree or refuse.

Friend: Could solar panels help our school?

You: I _____, but we need to check the cost first.

7. Situation: Your friend wants to build turbines near homes. You fear the noise may disturb residents. Choose worried or delighted.

Friend: What do you think of putting the turbines here?

You: I am _____ about the noise near these homes.

8. Situation: Your group is comparing sites before deciding. Choose before or after.

Friend: Shall we choose this site now?

You: Let us check the wildlife _____ we decide.

9. Situation: Your partner gives a reason for a cycle lane. Choose price or point.

Friend: A protected lane could make the journey safer.

You: That is a good _____. Safety matters.

10. Situation: You want to hear the quieter group member’s view. Choose pay or think.

Friend: We have heard two views about the park plan.

You: Maya, what do you _____ about it?

Speaking Homework 3

Book 3 Unit 2

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Order a short position on a wind farm.

Opening: I would support the idea after a few checks.

A	Despite that energy benefit, the council should check its effect on wildlife.
B	The wind farm I have just proposed could provide clean energy for local homes.
C	In my view, the town should consider the wind farm.

12. Order a short response about cycling.

Opening: Cycling to school should feel safer.

A	The school should ask families whether this change would help them cycle.
B	Some pupils avoid cycling because their route feels unsafe.
C	A protected lane could address that safety concern.

13. Order a short response about plastic bottles.

Opening: We could make it easier to refill our bottles.

A	A water-refill station could reduce this waste.
B	Many students throw away plastic drink bottles each day.
C	The school should consider installing one.

14. Order a short response about tree planting.

Opening: A few trees could improve the playground.

A	Trees could provide the missing shade and improve the area.
B	For this shade benefit, the school should choose species that suit the site.
C	The playground has little shade in summer.

15. Order a short response about food waste.

Opening: The canteen could learn something from what students leave.

A	This information might help the canteen waste less food.
B	The canteen throws away unused food each day.
C	To understand that daily waste, students could record which meals are often left.

Speaking Homework 3

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model's structure to make one focused paragraph of 4-5 sentences on the stated topic. Write key words, then record your answer.

16. Speak about a wind farm. State a position, one benefit, one risk, and a recommendation.

Model using a different example: Solar panels on the school roof could provide clean electricity. However, the roof must be safe enough for the equipment. The school should ask an engineer to check it. I would support the project if the report is positive.

17. Give a recorded cause-and-effect response about a school recycling scheme.

Model using a different example: The town uses many plastic bags in local shops. If shoppers bring reusable bags, less plastic may enter rubbish bins. This could reduce waste in the area. Shops should offer a clear reminder at the entrance.

18. Speak about a way to save water. Give a reason, a possible result, and advice.

Model using a different example: The school could encourage students to reuse unwanted clothes. This may reduce the amount of material sent away as waste. However, the school needs a clean place to collect items. A monthly swap event could be a useful start.

Speaking Homework 3

Book 3 Unit 2

Questions 19-20 Follow the model

Use the model's structure to make one focused paragraph of 4-5 sentences on the stated topic. Write key words, then record your answer.

19. Give a recorded response to a proposal to plant trees. Include a counter-point.

Model using a different example: The beach has rubbish after busy weekends. Volunteers could collect it before it reaches the sea. However, a clean-up alone may not stop future litter. The town should also provide more bins and signs.

20. Speak about your view on a car-free day. Support the view with a practical condition.

Model using a different example: The canteen could prepare fewer meals that students rarely choose. This may reduce food waste at lunchtime. However, it must still provide enough choices. Students could give feedback before the menu changes.

Speaking Homework 3

Book 3 Unit 2

Questions 21-22 Describe the picture

Write key words, then record one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: alternative, benefit, risk

21. Imagine the presenter is proposing solar panels for the school. Give your opinion, a reason and one point to check.

Words: solution, risk, provide

22. Imagine the presenter says solar energy would help the school. Respond and ask one useful follow-up question.

Speaking Homework 3

Book 3 Unit 2

Questions 23-25 Describe the picture

Write key words, then record one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: solution, environmental, risk

23. Imagine the students are planning a park clean-up. Give one suggestion and explain how it could help.

Words: environmental, risk, solution

24. Imagine the students must choose an area of the park to clean. Suggest what they should discuss first.

Words: provide, benefit, solution

25. Imagine you propose a regular clean-up at this park. Explain your idea and invite a partner to comment.

Writing Homework 3

Book 3 Unit 2

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "Climate change".

has, and effects, Climate change, many human causes

2. Start with "Because people burn fossil fuels,".

warmer, becomes, Because people burn fossil fuels,, the atmosphere

3. Start with "As a result,".

in some places, As a result,, sea levels, may rise

4. Start with "One solution".

is to use, One solution, more renewable energy

5. Start with "Public transport".

on roads, Public transport, the number of cars, can reduce

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose because of or because. A full clause follows.

The air is polluted _____ many cars release gases.

7. Choose effect or affect. The noun is needed after One.

One _____ of drought is lower food production.

8. Choose cause of or cause. The phrase names why climate change happens.

Burning fossil fuels is a _____ climate change.

9. Choose however or therefore. This linker introduces a result.

LED bulbs use less energy. _____, they can reduce electricity use.

10. Choose must or may. The writer is uncertain about the future.

Sea levels _____ rise as temperatures increase.

Writing Homework 3

Book 3 Unit 2

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a short climate-change paragraph.

A Therefore, global temperatures may rise.
B These activities increase gases in the atmosphere.
C People burn fossil fuels for transport and electricity.

☐ C-B-A ☐ B-C-A ☐ B-A-C

12. Order a short paragraph about public transport.

A More public transport could carry these people together.
B As a result, fewer cars may pollute the air.
C Many people use private cars for short journeys.

☐ A-B-C ☐ B-C-A ☐ C-A-B

13. Order a short paragraph about food waste.

A This daily waste shows that the canteen should record demand before cooking.
B The canteen prepares more meals than students buy.
C These extra meals are thrown away at the end of lunch.

☐ B-C-A ☐ C-A-B ☐ A-B-C

14. Order a short paragraph about water use.

A This water loss suggests that watering in the evening could save water.
B In that heat, more water disappears before plants can use it.
C Some homes water gardens in the hottest part of the day.

☐ C-B-A ☐ C-A-B ☐ B-C-A

15. Order a short paragraph about renewable energy.

A Solar panels could supply some of this electricity without burning fossil fuels.
B The town needs electricity for homes and services.
C Therefore, the town should study suitable roofs for panels.

☐ C-A-B ☐ A-B-C ☐ B-A-C

Writing Homework 3

Book 3 Unit 2

Questions 16-18 Follow the model

Use the model's structure to make one focused paragraph of 4-5 sentences on the stated topic. Write your own answer with different details.

16. Write a short cause-and-effect paragraph about a climate-change issue. Include one solution.

Model: In this forest, people cut down many trees for building. Consequently, the ground may lose protection from heavy rain. The council should protect remaining trees on steep land. This could reduce soil erosion.

17. Write a short paragraph about a water-saving proposal. Include a cause, effect, and recommendation.

Model: The school cafeteria wastes food because it prepares too many unpopular meals. As a result, leftovers are thrown away each day. It should record which meals students choose. This could reduce waste next week.

18. Write a short paragraph about a recycling problem. Include a cause-and-effect signal.

Model: A leaking tap in the sports centre runs all night. Consequently, a large amount of water is wasted. The centre should repair the tap quickly. Regular checks could prevent the same problem.

Writing Homework 3

Book 3 Unit 2

Questions 19-20 Follow the model

Use the model's structure to make one focused paragraph of 4-5 sentences on the stated topic. Write your own answer with different details.

19. Write a short paragraph about a plan to reduce traffic pollution. Include a counter-point.

Model: The library uses old bulbs that need a lot of electricity. Therefore, it could replace them with LED bulbs. However, the new bulbs cost money at first. The library should compare the long-term savings.

20. Write a short paragraph recommending a renewable-energy project. Include a condition.

Model: The town could improve bus services because many people drive short journeys. As a result, fewer cars may pollute the air. However, the new routes must reach local homes. The council should test them with residents.

Writing Homework 3

Book 3 Unit 2

Questions 21-22 Describe the picture

Write one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: greenhouse gas, contribute to, fossil fuel

21. Imagine the vehicles on this street burn petrol or diesel. Explain one possible environmental effect and suggest a response.

Words: fossil fuel, cause, effect

22. Suggest a transport change for this street. Explain how it could lead to an environmental benefit.

Writing Homework 3

Book 3 Unit 2

Questions 23-25 Describe the picture

Write one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: ecosystem, construction, threaten

23. Describe the wetland and the construction visible in the distance. Explain one possible concern.

Words: construction, ecosystem, consequences

24. Write a short response giving a cautious recommendation.

Words: predict, threaten, effect

25. Imagine construction is proposed beside the wetland. Predict one possible effect and explain what should be checked.
