Passage A - A Weekly Event with Room for Walkers

A At parkrun, people do not need to buy an entry ticket or run at a competitive speed. Its five-kilometre Saturday events welcome walkers, joggers and runners. Local volunteers organize them, and registration is free. A participant registers once and brings a barcode to record a result. This simple arrangement gives people a recurring opportunity for **physical activity**. A time records progress around a course, rather than the number of **calories** used.

B The organization makes walking part of the event. There is no time limit, and a volunteer called the Tail Walker stays behind the other participants and finishes last. The role helps account for everyone on the course. This changes what finishing slowly means: the event has planned for it, rather than treating it as failure. It is useful to **recognize** that participation includes several speeds. Someone can be **active** without needing to beat other people or match the pace of an experienced runner.

C Other volunteers support the event. Course checks, directing participants, keeping time and scanning barcodes are different jobs. Course safety is a **serious** responsibility, but helping is also a form of participation. The organization's volunteering strategy gives helping the same respect as walking or running. It describes social connections, skills and a sense of belonging among the benefits of volunteering. Those aims help explain why the event is more than a list of finishing times.

D Junior parkrun has a different format. Its Sunday events cover two kilometres and are for children aged four to fourteen. Volunteers are placed so that children remain within sight of a marshal. Children under eleven usually need an adult to bring them, remain at the event and collect them at the finish. Adults can accompany children on the course, but the children's results list has its own age rules. The shorter distance therefore comes with a separate organization, rather than simply copying every rule of the longer event.

Passage A - A Weekly Event with Room for Walkers

E A weekly event can support **regular exercise**, but it is only one part of a **healthy lifestyle**. The CDC describes benefits from repeated activity and explains that adults need suitable weekly routines. **Moderate** activity is generally safe for most people, while people who **suffer** from conditions such as **heart disease** should discuss suitable types and amounts with a doctor. Being welcome at an event and knowing what activity suits an individual are different matters. A recorded time does not answer both questions.

F Free entry removes a participation fee, and the walking option removes the need to run the whole course. Neither fact means every practical barrier disappears. People still need to reach an event and consider its course. The parkrun model shows how regular local opportunities, different ways to take part and volunteer support can work together.

Questions 1-10 Summary completion

Write **ONE WORD** from the indicated paragraphs. Questions 1-5: **A, B**. Questions 6-10: **C, D**.

The five-kilometre events take place on **(1)** _____. People do not need to run at a **(2)** _____ speed. After registering, a participant brings a **(3)** _____ to record a result. A time does not record the number of **(4)** _____ used. People walking the course have no time **(5)** _____.

Course **(6)** _____ is described as a serious responsibility. The volunteering strategy includes a sense of **(7)** _____ among its benefits. Junior events take place on **(8)** _____ and are for children aged four to **(9)** _____. A child under eleven usually needs an **(10)** _____ to bring them, remain at the event and collect them at the finish.

Questions 11-15 List of Headings

22. What place does one weekly event have in a health routine?

- ☐ A. It can be part of a broader routine
- ☐ B. It determines the time of the next train
- ☐ C. It replaces all other activity for every person

23. Why does a welcoming event not settle everyone's activity needs?

- ☐ A. A recorded finishing time answers every health question
- ☐ B. Personal circumstances still need consideration
- ☐ C. The event must choose a cinema timetable

24. Which practical consideration remains despite free entry?

- ☐ A. Reaching the event and considering its course
- ☐ B. Buying a required entry ticket
- ☐ C. Selecting a colour for a television remote

25. Which idea best represents the parkrun model in the passage?

- ☐ A. Requiring everyone to race faster than other people
- ☐ B. Replacing community events with private cooking lessons
- ☐ C. Recurring local opportunities and different ways to participate together
