Listening Homework 3

Book 3 Unit 6

Questions 1-5 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

1. [6.5-L01] **By 2011 the app store had recorded more than ten billion downloads.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

2. [6.5-L02] **Weeks before the imagined trip, guidebooks are obtained from a bookstore or library.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

3. [6.5-L01] **By 2011 people were using internet browsers more than apps on their phones.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

4. [6.5-L02] **The maps bought for the trip are digital rather than paper.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

5. [6.5-L01] **By 2017 the estimated number of app downloads had reached 180 billion.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 6-10 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

6. [6.5-L02] **Audio books are obtained a few days before the imagined trip.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

7. [6.5-L01] **The lecturer mentions entertainment, travel and communication as uses for apps.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

8. [6.5-L02] **Directions are printed on the day before the imagined trip.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

9. [6.5-L01] **The lecturer bought her first smartphone in 2008.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

10. [6.5-L02] **The lecturer says that all guidebooks were obtained without paying.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 11-15 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

11. [6.5-L01] **The usage figures are said to show how quickly apps have developed.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

12. [6.5-L02] **The maps show the locations of petrol stations.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

13. [6.5-L01] **The lecturer says the first app store opened in 2010.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

14. [6.5-L02] **The lecturer says the imagined trip lasts exactly two weeks.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

15. [6.5-L01] **The lecturer says she personally worked in the first app store.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 16-20 Matching information

Which LONG audio contains each piece of information? Tick **ONE** box. You may use a code more than once.

16. A growing industry is said to need skilled software engineers.

☐ 6.5-L01 ☐ 6.5-L02 ☐ 6.5-L03

17. Some software was already included on smartphones.

☐ 6.5-L01 ☐ 6.5-L02 ☐ 6.5-L03

18. Phone numbers and addresses for friends and hotels are written down.

☐ 6.5-L01 ☐ 6.5-L02 ☐ 6.5-L03

19. A music app can provide podcasts as well as audio books.

☐ 6.5-L01 ☐ 6.5-L02 ☐ 6.5-L03

20. A torch is packed in case a car breaks down.

☐ 6.5-L01 ☐ 6.5-L02 ☐ 6.5-L03

Questions 21-25 Matching information

Which LONG audio contains each piece of information? Tick **ONE** box. You may use a code more than once.

21. Some early software was designed to improve efficiency at work.

☐ 6.5-L01 ☐ 6.5-L02 ☐ 6.5-L03

22. A later generation of software could be downloaded and installed.

☐ 6.5-L01 ☐ 6.5-L02 ☐ 6.5-L03

23. Dependence on phone information is linked with feeling more helpless.

☐ 6.5-L01 ☐ 6.5-L02 ☐ 6.5-L03

24. A passenger reads the directions and looks for street signs.

☐ 6.5-L01 ☐ 6.5-L02 ☐ 6.5-L03

25. A reported study gives a percentage of users leaving slow-loading pages.

☐ 6.5-L01 ☐ 6.5-L02 ☐ 6.5-L03

Passage C - Content Credentials and the History of a File

A A deepfake can copy a person's **appearance** or voice so convincingly that an ordinary viewer may accept it as real. Once a false **image** begins to **spread**, detection often starts after people have already seen it. One response is to examine pixels or sound for signs of manipulation. Another approach asks a different question: can a file carry reliable information about where it came from and how it changed? The two methods answer different questions, so one does not replace the other. This second approach is called digital provenance.

B In February 2021, Adobe, Arm, the BBC, Intel, Microsoft and Truepic formed the Coalition for Content Provenance and Authenticity, or C2PA. They began developing an open standard for recording the origin and history of a **range** of digital media, including pictures, video, audio and documents. Under this standard, a Content Credential is a signed record connected to an asset. It can include statements about creation, editing tools, later changes and the use of artificial intelligence. A record may travel inside the file or be linked from another location.

C The system uses cryptographic hashes and digital signatures. A hash acts like a mathematical fingerprint of data. If protected content or its credential changes, validation can show that the new fingerprint no longer matches. A signature also identifies the organization or system that signed the record, which supports **security** checks based on known trust lists. A compatible viewer can then present the recorded history to a user instead of hiding it inside technical metadata. When an editor makes a declared change, a new signed record can preserve the earlier one and add the action.

Passage C - Content Credentials and the History of a File

D This technology has important limits. A valid credential does not prove that a claim inside a video is true. Even **harmful** or **unsafe** material can still have an accurate record of who published it. Provenance may also be incomplete, and metadata can be removed. The absence of a credential is not proof that a file is false, because adoption is voluntary. C2PA therefore describes optional soft bindings, ways to link a file to its history, such as invisible watermarks or fingerprint lookup, that may help recover a remotely stored credential. Their presence gives evidence about history, not a final judgment about meaning.

E The standard also separates content history from **personal** identity. Its core does not require a creator's real-world name, although extensions can add identity information when appropriate. That choice matters for **privacy** as well as trust. People still decide what evidence matters in the situation. Content Credentials are therefore one tool alongside media literacy, fact-checking and forensic detection. They invite users to **rethink** a simple real-or-fake decision. A trustworthy conclusion depends on the file's recorded history, the signer, the completeness of the record and the content itself.

Questions 1-10 Summary completion

Write **ONE WORD** from the indicated paragraphs. Questions 1-5: **A, B**. Questions 6-10: **C, D**.

A deepfake may imitate a person's appearance or **(1)** _____ . One detection method examines **(2)** _____ or sound for manipulation. Six founding members formed the **(3)** _____ that became known as C2PA. C2PA began developing an open **(4)** _____ for digital media history. This framework covers pictures, video, audio and **(5)** _____ .

A hash works like a mathematical **(6)** _____ of data. A digital signature identifies the signing **(7)** _____ or system. A compatible **(8)** _____ can display the recorded history. Technical metadata can be **(9)** _____ from a file. Soft bindings provide evidence about history, not a final judgment about **(10)** _____ .

Questions 11-15 List of Headings

Match each specified paragraph with its best heading. Tick **ONE** box. Some headings are not used.

i. Checking and displaying an authenticated history

ii. A guarantee that every recorded claim is true

iii. The design of a city transport network

iv. Combining provenance with human judgment

v. Creating a shared record of media changes

vi. Two different ways to question suspicious media

vii. Limits of provenance evidence

11. Paragraph A

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

12. Paragraph B

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

13. Paragraph C

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

14. Paragraph D

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

15. Paragraph E

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question.

16. What can validation reveal after protected data has been altered?

- ☐ A. The weather forecast for next week
- ☐ B. The file's claim has become factually true
- ☐ C. The new mathematical result no longer matches

17. What does a known trust list help a system check?

- ☐ A. The fastest route through a city
- ☐ B. The signer associated with the record
- ☐ C. Whether every claim in the media is correct

18. What may happen when an editor declares a new action?

- ☐ A. A new record can preserve the earlier one and add the action
- ☐ B. All earlier history must be erased
- ☐ C. A concert ticket is issued automatically

19. What does an accurate publication history fail to establish by itself?

- ☐ A. That the message inside the media is correct
- ☐ B. That someone published the material
- ☐ C. That a river has reached flood level

20. Why is a missing credential not proof of deception?

- ☐ A. Every missing record has been secretly deleted
- ☐ B. Participation in the system is optional
- ☐ C. A missing record changes the colour of the screen

Questions 21-25 Single choice

Tick **ONE** answer, A-C, for each question.

21. What are soft bindings intended to help recover?

- ☐ A. A lost key to a bicycle lock
- ☐ B. The factual correctness of every statement
- ☐ C. A remotely stored credential

22. What does the core specification avoid requiring from a creator?

- ☐ A. A real-world name
- ☐ B. Any information about media history
- ☐ C. A passport for international travel

23. Why can separating history from identity matter?

- ☐ A. It protects privacy while still supporting trust decisions
- ☐ B. It guarantees that anonymous content is accurate
- ☐ C. It improves the fuel economy of an aircraft

24. Which tools does the article place alongside Content Credentials?

- ☐ A. Maps of public walking routes
- ☐ B. Media literacy, fact-checking and forensic detection
- ☐ C. Only automatic deletion of unsigned files

25. Which conclusion best represents the article?

- ☐ A. A credential guarantees truth and makes other checks unnecessary
- ☐ B. Digital provenance predicts the result of elections
- ☐ C. Recorded history is useful evidence that still requires judgment

Speaking Homework 3

Book 3 Unit 6

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "First,".
introduce, First,, I will, the invention

2. Start with "This device".
This device, allows, to work together, users

3. Start with "The stand".
is useful for, holding, The stand, a tablet

4. Start with "The label".
to identify, each part, helps people, The label

5. Start with "The new design".
makes it possible, to fold, The new design, the frame

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Preview the first part of a short talk. Choose began or begin.

Friend: **How will you start?**

You: I will _____ by describing the device.

7. Situation: Explain the purpose with useful for. Choose holding or hold.

Friend: **What does this stand do?**

You: It is useful for _____ a tablet.

8. Situation: Explain a benefit with allows. Choose for or to.

Friend: **How does the app help a group?**

You: It allows users _____ share notes.

9. Situation: Introduce the next part of the explanation. Choose then or because.

Friend: **What comes after the description?**

You: _____, I will explain how it is used.

10. Situation: Explain a practical benefit. Choose easy or easily.

Friend: **Why is the new label useful?**

You: It makes it _____ to identify the part.

Speaking Homework 3

Book 3 Unit 6

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Introduce an object and explain its use.

Opening: Let me show you a small invention from our classroom.

A	That angle allows the user to read without holding the tablet.
B	It holds the screen at an angle on a desk.
C	This is a folding tablet stand.

12. Explain a reminder tool.

Opening: I chose this object because I use it while studying.

A	It helps me return to that line quickly.
B	The marker sticks beside an important line.
C	It is a small removable page marker.

13. Explain a change to a container.

Opening: One small part makes a difference to this design.

A	Through that window, users can see the contents.
B	They can therefore check what is inside without opening it.
C	The container has a transparent window.

14. Explain an app function.

Opening: This idea began with a problem in our group work.

A	Each task on the list has a name beside it.
B	The app keeps a shared list of tasks.
C	Those names help group members see who is responsible.

15. Explain a portable design.

Opening: Here is how we made the object easier to carry.

A	Once those two sides are folded together, the frame fits inside a school bag.
B	That hinge allows the two sides to fold together.
C	The frame has a hinge in the middle.

Speaking Homework 3

Book 3 Unit 6

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

16. Give a short introduction to a familiar invention. Preview one point, describe it and explain a use.

Model: I would like to introduce a folding stand. First, I will explain its useful shape. The stand holds a tablet above the desk. It allows users to read while keeping their hands free.

17. Explain how one part of an invented device works and why it matters.

Model: Our box has a small window in its lid. The window is made from clear plastic. It allows users to see the contents without opening the box. This is useful when several similar boxes are stored together.

18. Describe a simple classroom invention in a logical order. Include materials, use and benefit.

Model: Our parts tray is made from small reused boxes. Each box is fixed into a larger base. The tray is used to sort pieces during a project. It helps a group find the right part without searching through a pile.

Speaking Homework 3

Book 3 Unit 6

Questions 19-20 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

19. Introduce an app and explain two related uses. Use allows and useful for.

Model: Our reading app keeps a list of borrowed books. It allows users to record return dates. It is also useful for writing brief reading notes. These two functions help readers organize their library visits.

20. Explain what would be harder without a familiar invention. Give a concrete example.

Model: Without a zip, this bag would be harder to close quickly. The zip joins its two sides in one movement. For example, I can close it before getting on a bus. This helps keep the contents together during the journey.

Speaking Homework 3

Book 3 Unit 6

Questions 21-22 Describe the picture

Write key words, then record one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: device, allow, discovery

21. Introduce the magnifying glass to a class. Preview two things you will explain: its use and its benefit.

Words: diagram, make a comparison, discovery

22. Explain how the student could use the leaf and the diagram to make a comparison.

Speaking Homework 3

Book 3 Unit 6

Questions 23-25 Describe the picture

Write key words, then record one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: device, allow, technology

23. Introduce the museum display to a new visitor. Say what you will show and why it is useful.

Words: make a comparison, user, device

24. Imagine you are guiding the child. Explain how to explore the display in a clear order.

Words: diagram, make improvements, make a difference

25. Suggest one addition that could help visitors understand the gears. Introduce your idea and explain its benefit.

Writing Homework 3

Book 3 Unit 6

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "A device".

is, easy to store, that folds flat, A device

2. Start with "The designer".

The designer, at our school, who made this model, works

3. Start with "The main advantage".

is, of the stand, its simple shape, The main advantage

4. Start with "The problem".

its small text, The problem, is, with this app

5. Start with "This prototype,".

the basic idea, which is made from card,, shows, This prototype,

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose who or which.

The student _____ designed the handle tested it yesterday.

7. Choose where or that.

A tool _____ is easy to hold may suit more users.

8. Choose at or of.

One advantage _____ the design is its low weight.

9. Choose with or at.

The main problem _____ the first version is its narrow base.

10. Choose that or which for the extra information between commas.

Our prototype, _____ is made from card, folds flat.

Writing Homework 3

Book 3 Unit 6

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order an introduction to a folding stand.

A	Imagine carrying a large stand in a small bag.
B	This design offers useful portability, although its joints need careful testing.
C	To solve that carrying problem, a folding stand has joints that let its parts move together.

☐ A-C-B ☐ C-B-A ☐ B-C-A

12. Order a description and advantage.

A	One advantage of this arrangement is that users can find items quickly.
B	Its separate sections keep similar tools together.
C	The group designed a box that separates small tools.

☐ B-A-C ☐ C-B-A ☐ A-B-C

13. Order an introduction to an app.

A	To address that difficulty, a shared app can display tasks that belong to different group members.
B	Keeping track of many classroom tasks can be difficult.
C	It may improve organization, but the information must be kept up to date.

☐ A-C-B ☐ B-C-A ☐ B-A-C

14. Order a limitation and implication.

A	The designer should therefore consider users who need a more obvious switch.
B	The new lamp uses a touch control.
C	That control may be difficult to find without looking closely.

☐ A-B-C ☐ C-B-A ☐ B-C-A

15. Order an introduction to a prototype.

A	Small changes can make familiar objects easier to use.
B	The pocket offers quick access, although it must also keep the card secure.
C	For example, this bag has a pocket that holds a travel card near the handle.

☐ C-A-B ☐ A-C-B ☐ B-A-C

Writing Homework 3

Book 3 Unit 6

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write your own answer with different details.

16. Introduce an invented desk organizer. Start with a situation, describe it using a relative clause, and state your view.

Model: Imagine finding a cable in a crowded drawer. A cable holder is a device that keeps cables in separate slots. It can sit beside a desk. This simple design may save searching time, although it needs space near the user.

17. Introduce an app with an advantage and a limitation. Use a relative clause.

Model: A reading app can bring several tasks together. It is a tool that records borrowed books and return dates. One advantage of the app is that information stays in one place. However, users must remember to update their records.

18. Introduce a redesigned object. Include extra information with which and a clear view.

Model: Everyday bags are not equally easy to organize. This bag, which has small inner pockets, separates different items. Users can keep keys away from larger objects. I think the design is useful, although extra pockets may add weight.

Questions 19-20 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write your own answer with different details.

19. Introduce an invention through a problem and benefit. Use advantage of or problem with.

Model: A page can be difficult to hold open while taking notes. A simple clip that grips the page may solve this problem. The main advantage of the clip is that it leaves both hands free. However, it should not damage the paper.

20. Write a balanced opening paragraph about a classroom prototype. Define it and identify a point to test.

Model: A portable model can make explanations more concrete. Our prototype is a frame that folds for storage. Its low weight is useful for moving between rooms. The main problem with the design is whether the hinges will last.

Writing Homework 3

Book 3 Unit 6

Questions 21-22 Describe the picture

Write one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: appearance, personal, movement

21. Introduce the computer mouse in a short paragraph. Use a relative clause to connect its shape with its use.

Words: disorganized, appearance, essential

22. Introduce the cable holder as a solution to a desk problem. Include a relative clause and its possible benefit.

Writing Homework 3

Book 3 Unit 6

Questions 23-25 Describe the picture

Write one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: personal, conditions, essential

23. Imagine the small box is a medicine reminder. Introduce it and its purpose using a relative clause.

Words: personal, essential, rethink

24. Imagine you are introducing this reminder to a new user. Explain the role of the person who shows how it works.

Words: appearance, personal, rethink

25. Introduce an improvement to the reminder. Use a relative clause and explain why the change could help.
