Listening Homework 3

Book 3 Unit 8

Questions 1-6 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

1. [8.5-L01] **Dr Hassan suggests spending the money on student services.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

2. [8.5-L01] **Dr Hassan recommends hiring fewer professors and advisors.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

3. [8.5-L01] **Dr Hassan identifies stress as one reason students drop out.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

4. [8.5-L01] **Dr Hassan says poor time management has no connection with dropping out.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

5. [8.5-L01] **Dr Hassan says advisors cannot help students improve their time management.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

6. [8.5-L02] **Dr Burns wants the programme to pay students a large amount.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 7-11 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

7. [8.5-L02] **Dr Burns presents a minimum wage job as an alternative to paid study.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

8. [8.5-L02] **The parent worries that the programme sends students the wrong message.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

9. [8.5-L02] **The parent says learning should include studying new things.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

10. [8.5-L02] **The parent says learning should have nothing to do with responsibility.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

11. [8.5-L03] **The parent says students need encouragement to remain at university.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 12-15 True, False, Not Given

TRUE: agrees with the assigned LONG clip. FALSE: contradicts it. NOT GIVEN: insufficient information. Tick **ONE** box.

12. [8.5-L03] **The parent thinks uninterested students may choose easy courses to keep their grades high.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

13. [8.5-L03] **The parent recommends rewarding excellent universities and teachers.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

14. [8.5-L03] **Programme planners require difficult courses before students receive payment.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

15. [8.5-L03] **The parent says her own children already receive programme payments.**

☐ TRUE ☐ FALSE ☐ NOT GIVEN

Questions 16-20 Matching information

Which LONG audio contains each piece of information? Tick **ONE** box. You may use a code more than once.

16. The Danish payments are available for a maximum of six years.

☐ 8.5-L01 ☐ 8.5-L02 ☐ 8.5-L03

17. Better performance is expected to make students more likely to graduate.

☐ 8.5-L01 ☐ 8.5-L02 ☐ 8.5-L03

18. A speaker says a critical view does not apply to every student.

☐ 8.5-L01 ☐ 8.5-L02 ☐ 8.5-L03

19. The Danish payments begin when recipients are 18.

☐ 8.5-L01 ☐ 8.5-L02 ☐ 8.5-L03

20. Some parents are said not to be interested in studying.

☐ 8.5-L01 ☐ 8.5-L02 ☐ 8.5-L03

Questions 21-25 Matching information

Which LONG audio contains each piece of information? Tick **ONE** box. You may use a code more than once.

21. The discussion notes that substantial money has already been spent on services.

☐ 8.5-L01 ☐ 8.5-L02 ☐ 8.5-L03

22. Children may acquire a negative attitude to learning from their parents.

☐ 8.5-L01 ☐ 8.5-L02 ☐ 8.5-L03

23. Students want money so they can buy things for themselves.

☐ 8.5-L01 ☐ 8.5-L02 ☐ 8.5-L03

24. A stated goal is for students to finish education and get a good job.

☐ 8.5-L01 ☐ 8.5-L02 ☐ 8.5-L03

25. Some children do not see the benefits of learning.

☐ 8.5-L01 ☐ 8.5-L02 ☐ 8.5-L03

Passage C - Reading the Figures behind Household Income

A In September 2025, the United States Census Bureau published its report on **income** in 2024. It estimated real **median** household **income** at 83,730 dollars. **Median** identifies the middle of the distribution, rather than the total divided by the number of households. Real figures adjust for price changes, so amounts from different years can be compared on a more consistent basis. The report said the 2024 figure was not statistically different from its 2023 estimate. These were estimates based on survey data. The two printed amounts were not identical, but their difference did not establish a clear change beyond the uncertainty in the estimates.

B The unit being measured mattered. Household **income** was different from the earnings of one worker, and the report's main **income** measure was before taxes. It did not measure the amount already held in **savings**. The report separately discussed earnings among people in full-time, year-round work. That group did not include every person with any **employment** during the year. Mixing those groups would change the question being answered. A national middle figure was useful information, but it was not a statement that every individual received the same amount.

C The report also examined **inequality**, meaning differences across the **income** distribution. **Income** at the point above ninety per cent of households increased, while the middle and the lower point reported did not change significantly. At the same time, the overall **inequality** measure used in the report did not change significantly. These findings could exist together because they described different aspects of the distribution. One statistic did not contain every detail about how groups had changed. The **value** of a national **income** figure therefore depended partly on understanding what it summarized.

Passage C - Reading the Figures behind Household Income

D Living costs required other information. The Bureau of Labor Statistics reported 2024 consumer **expenditure** on categories including housing, food, transport and healthcare. Housing accounted for the largest share of the total in its published table. Those spending figures came from a different survey and used a different statistical unit from the Census **income** report. They could add context to a discussion of the **standard of living**, but the two surveys could not simply be treated as a single household's budget. Their statistics described groups, not one identical American experience.

E The Census Bureau's release also reported an official **poverty** rate, with a measure based on money **income** and thresholds that varied with family size and composition. It discussed survey response and the uncertainty that remains when information is collected from a sample. These limits did not make the reports useless. They explained why a careful **financial** comparison needs dates, definitions and the group being measured. The publications offered evidence about real people, while leaving room for different household situations behind a national figure.

Questions 1-10 Summary completion

Write **ONE WORD** from the indicated paragraphs. Questions 1-5: **A, B**. Questions 6-10: **C, D**.

The Census report estimated household **(1)** _____ . A median identifies the **(2)** _____ of a distribution. Figures adjusted for price changes are called **(3)** _____ figures. The report's main measure was before **(4)** _____ . It did not measure funds already held in **(5)** _____ .

The upper point was above **(6)** _____ per cent of households. The central and lower points did not change **(7)** _____ . The listed expenditure category for medical needs was **(8)** _____ . The largest spending share belonged to **(9)** _____ . The spending figures came from a separate **(10)** _____ .

Questions 11-15 List of Headings

Match each specified paragraph with its best heading. Tick **ONE** box. Some headings are not used.

i. How different distribution measures can coexist

ii. Preparing equipment for an ocean expedition

iii. Limits that guide careful comparison

iv. How to interpret a national central estimate

v. A guarantee that every individual receives the same amount

vi. Costs as context from another study

vii. Why the measured group matters

11. Paragraph A

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

12. Paragraph B

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

13. Paragraph C

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

14. Paragraph D

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

15. Paragraph E

☐ i ☐ ii ☐ iii ☐ iv ☐ v ☐ vi ☐ vii

Questions 16-20 Single choice

Tick **ONE** answer, A-C, for each question.

16. Why did the two printed amounts fail to establish a clear change?

- ☐ A. The agency had combined every person's bank account
- ☐ B. The report measured the depth of a lake
- ☐ C. The difference could fall within the uncertainty of the estimates

17. What distinction does Paragraph B make at the start?

- ☐ A. Every worker and household form the same unit
- ☐ B. A household measure differs from one worker's earnings
- ☐ C. A household is a kind of weather station

18. Who is excluded from the separately discussed earnings group?

- ☐ A. People who did not work full-time for the whole year
- ☐ B. Passengers waiting at an airport
- ☐ C. Every person who worked full-time for the whole year

19. What does a national central figure fail to say?

- ☐ A. That a bridge needs regular painting
- ☐ B. That the figure summarizes national information
- ☐ C. That every individual received the same amount

20. Why can an upper-point increase coexist with little change in an overall inequality measure?

- ☐ A. The statistics describe different aspects of the distribution
- ☐ B. All parts of the distribution must have moved identically
- ☐ C. The figures record the age of museum paintings

Questions 21-25 Single choice

Tick **ONE** answer, A-C, for each question.

21. Why is one national statistic insufficient on its own?

- ☐ A. It cannot predict the colour of a bird's feathers
- ☐ B. It cannot contain every detail about changes among groups
- ☐ C. It automatically describes every person's exact experience

22. Which category is listed among consumer spending besides the largest category?

- ☐ A. Food
- ☐ B. Company profits
- ☐ C. Volcanic rock

23. Why can the two reports not describe one family's exact finances?

- ☐ A. They are two copies of the same family diary
- ☐ B. They report group statistics rather than one family's exact finances
- ☐ C. They measure the speed of a train

24. What changes the threshold used in the official poverty measure?

- ☐ A. The distance from Earth to the Moon
- ☐ B. The colour of a report cover
- ☐ C. Family size and composition

25. What does the article require for a careful comparison?

- ☐ A. Dates, definitions and the group being measured
- ☐ B. A map of ocean currents
- ☐ C. Only the largest number on a page

Speaking Homework 3

Book 3 Unit 8

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Record each full sentence.

1. Start with "Recording payments".
check its total, Recording payments, the group, helps

2. Start with "Saving a little each week".
can make, a target, Saving a little each week, easier to plan

3. Start with "One result".
greater clarity, is, of sharing the record, One result

4. Start with "In other words,".
In other words,, to explain, we need, each cost

5. Start with "Comparing prices".
Comparing prices, gives us, before a decision, more information

Questions 6-10 Complete the replies

Read each situation and follow its clue to complete the reply. Record the whole reply.

6. Situation: Your group wants everyone to check the money collected at a sale. Choose Record or Recording.

Friend: **What helps the group check its total?**

You: _____ payments helps us check it.

7. Situation: A classmate is unsure what you mean by a clear budget. Choose word or words.

Friend: **What do you mean by a clear budget?**

You: In other _____, it is a list of the planned costs.

8. Situation: A classmate wants to throw away the receipts from the sale. Choose result or because.

Friend: **Why keep every receipt?**

You: One _____ is that we can check each payment.

9. Situation: Your group has two price offers for the same materials. Choose helps or help.

Friend: **Why compare the two prices?**

You: Comparing them _____ us make a choice.

10. Situation: Printing more posters would cost more than the group can afford. Choose of or that.

Friend: **Why did the group choose fewer posters?**

You: Because _____ the printing cost.

Speaking Homework 3

Book 3 Unit 8

Questions 11-15 Order and speak

Put sentences A-C in order. Record the opening, then read all three sentences in the correct order. Do not read the letters.

11. Support keeping a shared record.

Opening: A small class fund still needs a clear record.

A	This example shows how the record makes questions easier to resolve.
B	Recording each payment lets everyone check the total.
C	For example, a missing receipt may explain a difference.

12. Explain a benefit of comparing options.

Opening: We should know what each option includes.

A	For example, one offer may include delivery while the other does not.
B	That difference could change which option suits the budget.
C	Comparing two prices can reveal an extra cost.

13. Explain a way to plan a class target.

Opening: The target looks easier to discuss in smaller steps.

A	Those amounts can be compared with the money actually saved.
B	As a result, the group can see when it needs to adjust the timing.
C	Dividing it into weekly amounts gives the class a plan.

14. Explain why one result should be interpreted carefully.

Opening: One successful sale does not tell us everything.

A	The group should consider this before predicting the next event’s result.
B	The last event happened on a very busy school day.
C	That busy day may have brought more visitors than usual.

15. Respond to a concern about recording costs.

Opening: I understand that writing everything down takes time.

A	However, a short record can prevent confusion later.
B	The group can then focus on the costs that remain.
C	It shows which items have already been paid for.

Speaking Homework 3

Book 3 Unit 8

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

16. Support keeping a class spending record. Use a gerund subject, an example and a paraphrase.

Model using a different example: Comparing options helps a group understand a purchase. For example, one price may include delivery. A second price may leave that cost out. In other words, the lowest label is not always the lowest total.

17. A classmate says a small fund needs no records. Respond with a reason and a practical example.

Model: I understand that the event is small. However, checking costs still helps us plan. Last time, we nearly forgot the cost of envelopes. A brief list would make that item easier to remember.

18. Explain a possible benefit and limitation of a class fundraising event. End with a balanced view.

Model: Holding a book sale could add money to the library fund. It could also give used books new readers. However, the event needs space and organization. I would support it if the class could manage those tasks.

Speaking Homework 3

Book 3 Unit 8

Questions 19-20 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Write key words, then record your answer.

19. Event: payments £50. Materials £18. Explain the remaining amount and why both figures matter.

Model using different data: The class received forty pounds. Materials cost fifteen pounds. The remaining amount was therefore twenty-five pounds. This shows why recording costs matters as well as payments.

20. Explain a planning recommendation using a gerund subject and a consequence.

Model: Sharing the plan before buying materials can reveal missing items. A classmate may notice a cost others forgot. As a result, the group can adjust the list early. This makes the next step easier to organize.

Speaking Homework 3

Book 3 Unit 8

Questions 21-22 Describe the picture

Write key words, then record one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: decision, responsible, spend money

21. Imagine the family needs one winter coat. Recommend comparing two coats before buying and explain your reason with a visible detail.

Words: afford, decision, spend money

22. Note: one coat costs £30 and the other £45. Both fit the child. Recommend what else the family should check, then paraphrase your advice.

Speaking Homework 3

Book 3 Unit 8

Questions 23-25 Describe the picture

Write key words, then record one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: put aside, savings, save money

23. Imagine the woman is setting aside money for a course. Explain how an envelope could support the plan, then restate your point.

Words: savings, responsible, save money

24. Savings record: £12 last week and £18 this week. Describe the change, give a reason to keep a record and restate that reason.

Words: payment, responsible, decision

25. Imagine two people share this envelope fund. Recommend how they could record payments and explain your recommendation.

Writing Homework 3

Book 3 Unit 8

Questions 1-5 Build sentences

Put the word groups in order. Use each group once. Do not add words or change word forms. Write each full sentence.

1. Start with "Sales".

from twenty units to forty units, rose, Sales

2. Start with "There was".

of ten units, There was, during the period, an increase

3. Start with "The final figure".

The final figure, was, fifty, approximately

4. Start with "Product A grew,".

declined, Product B, Product A grew,, whereas

5. Start with "Overall,".

show, the figures, Overall,, a clear upward trend

Questions 6-10 Complete the sentences

Complete each sentence. Follow the word choices or clues in each question.

6. Choose to or by. Totals: 20 to 30.

Sales rose _____ thirty units.

7. Choose of or by. Totals: 20 to 30.

Sales increased _____ ten units.

8. Choose of or to after increase. Totals: 20 to 30.

There was an increase _____ ten units.

9. Choose approximate or approximately before a number.

The final figure was _____ fifty.

10. Choose whereas or because to contrast two trends.

A rose, _____ B fell.

Writing Homework 3

Book 3 Unit 8

Questions 11-15 Choose the sentence order

Read sentences A-C. Tick one sequence for each question.

11. Order a data paragraph.

A	Overall, the final figure was twice the starting total.
B	Sales rose from twenty to thirty and then to forty units.
C	The series shows monthly sales over three months.

☐ C-B-A ☐ B-A-C ☐ A-B-C

12. Order a comparison of two products.

A	These opposite changes left A ten units ahead of B.
B	In that comparison, A rose from ten to thirty units while B fell from forty to twenty.
C	The figures compare sales of Product A and Product B.

☐ B-A-C ☐ B-C-A ☐ C-B-A

13. Order a description using an approximation.

A	It was therefore approximately fifty.
B	Using that rounded value makes the overall scale easier to describe.
C	The first figure was forty-nine units.

☐ A-C-B ☐ C-A-B ☐ B-A-C

14. Order an overview with a limitation.

A	However, the change across these three stages alone does not explain why the total increased.
B	The total rose by ten units in each of three stages.
C	The figures show a steady increase across the period.

☐ A-C-B ☐ C-A-B ☐ C-B-A

15. Order a summary of recovery.

A	This recovery brought the final figure back to thirty units.
B	After this fall, it recovered to its starting level.
C	The total started at thirty units before falling to fifteen.

☐ C-B-A ☐ B-A-C ☐ A-B-C

Writing Homework 3

Book 3 Unit 8

Questions 16-18 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Use the figures in each question in your own answer.

16. Monthly sales: 21, 35, 49 units. Introduce the series, describe the change and use one approximation.

Model using different data: The series shows sales over three months. Sales rose from twelve to eighteen and then to twenty-eight units. The final total was approximately thirty. Overall, the series shows an upward trend.

17. Sales: A 10 to 30. B 40 to 20. Write a comparison using whereas and a concluding sentence.

Model using different data: The figures compare two products. X rose from twenty to fifty units, whereas Y fell from sixty to forty. X finished ten units ahead of Y. Overall, the products followed opposite trends.

18. Quarterly totals: 30, 15, 30. Describe the key changes using by and to. End with an overview.

Model using different data: The total first stood at forty units. It fell by twenty to twenty units. It then rose to forty again. Overall, the total returned to its starting level.

Questions 19-20 Follow the model

Use the model to help you make one focused paragraph of 4-5 sentences. Use the figures in each question in your own answer.

19. Figures: 20, 30, 40 units. Summarize the trend and state one thing the data cannot explain.

Model using different data: The figures rise from ten to twenty and then thirty. Each increase is ten units. The series therefore shows steady growth. However, it does not explain the cause of that growth.

20. Sales: A 98 to 102. B 45 to 75. Summarize A approximately and describe B’s change accurately.

Model using different data: X moves from forty-nine to fifty-one units. It remains at approximately fifty. Y rises from twenty to forty units. Overall, Y changes more, although X still finishes higher.

Writing Homework 3

Book 3 Unit 8

Questions 21-22 Describe the picture

Write one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: revenue, financial, value

21. Imagine the student is studying this series: class-project revenue was £98, £102 and £101 in three weeks. Summarize it with an approximate figure and a conclusion.

Words: expenditure, financial, factor

22. Imagine the student is comparing project costs: £120 in June and £90 in July. Use from, to and by, then conclude.

Writing Homework 3

Book 3 Unit 8

Questions 23-25 Describe the picture

Write one short paragraph of 3-4 sentences for each question. Use the words if helpful.

Words: savings, financial, value

23. Imagine this family is discussing a savings record: £200 in March, £250 in April and £300 in May. Describe the trend and conclude.

Words: expenditure, financial, factor

24. Household spending: £180 in April and £195 in May. Describe the rise, give an approximate amount for May and conclude.

Words: income, financial, value

25. Imagine the family compares two monthly income records: A rose from £950 to £1,000. B stayed at £800. Compare the trends and end with a conclusion.
